Editorial

The annual meeting of the Scandinavian Association for the Study of Pain (SASP) 3-5 April 2019 – S1

Abstracts

The longitudinal effect of habitual physical activity change on pain tolerance in a population-based cohort – The Tromsø Study 6 & 7 – S2

Single-Base Resolution Analysis of DNA Methylation in Fibromyalgia Women Compared with Their Healthy Sisters – S3

Spatial integration of electrical stimulation on the sole of the foot – S4

Persistent Pain in a Sami and Non-Sami Population. A SAMINOR study – S5

Patient-clinician brain concordance supports therapeutic alliance, facial mirroring, and placebo analgesia during pain treatment: A fMRI hyperscanning study – S6

Development of neuro-sensitivity after oxaliplatin administration – S7

The association between different levels of leisure time physical activity and chronic pain – The Tromsø Study 7 – S8

The association between shift intensity and headache in nurses – S9

Device survival and explant patterns in 449 patients treated with spinal cord stimulation – S11

The distribution of chronic pain conditions in a psychiatric outpatient population – S12

The Association of Age at Menarche and Chronic Pain: The Tromsø Study – S13

Screen time, sleep and pain in healthy youth and patients with prolonged pain or juvenile idiopathic arthritis – S14

Pain, opioid drug effects and post-operative analgesic consumption in day surgery patients: A prospective pilot study – S15

Alzheimer's Disease and Pain Sensitivity – A Mendelian Randomization Study – S16

Comparison of opioid naïve patients to opioid tolerant patients referred to the Acute Pain Service – S17

Group based physiotherapy and patient education in women with chronic pelvic pain - a randomized controlled trial – S18

Social stress up-regulates expression of Nr3C1 in the pituitary gland and IL-6 in the spleen – S19

CSF Biomarkers of Inflammation in Trigeminal Neuralgia Patients Operated with Microvascular Decompression – S20

Latency of ACC and SI processing of noxious and non-noxious electrical stimulation – S21

Anhedonia in Chronic Pain and Prescription Opioid Misuse – S22

Representations of the body and peripersonal space during tool-use in CRPS – S23
