

Supplementary material

Figure S1: The expression of circEXOC6 and candidate mRNA expression. (a) CircEXOC6 expression in different types of glioma and normal tissues was detected by qRT-PCR. (b) The expression of candidate mRNA in A172 cells transfected with miR-NC/miR-433-3p mimic was measured by qRT-PCR. All experiments were performed in triplicate, with each independent experiment set 3 times to generate an average value. * $P < 0.05$.
