Retraction of “Effect of C-phycocyanin on HDAC3 and miRNA-335 in Alzheimer’s disease”

<https://doi.org/10.1515/tnsci-2022-0808>
received March 28, 2024; accepted April 15, 2024

This article has been retracted at the request of the Editors.

The retraction is due to the discovery that Figure 3E is identical to Figure 6D in the previously published paper by Zhang, X., Wu, Q., Zhang, Q., Lu, Y., Liu, J., Li, W., Lv, S., Zhou, M., Zhang, X., Hang, C. titled “Resveratrol Attenuates

Early Brain Injury after Experimental Subarachnoid Hemorrhage via Inhibition of NLRP3 Inflammasome Activation” published in *Frontiers in Neuroscience*, 2017 Nov 3;11:611 (<https://doi.org/10.3389/fnins.2017.00611>).

This overlap compromises the originality and integrity of the results, and the final conclusions of the article could not be confirmed.

[#] These two authors contributed equally to this work.
