

Subject Index

Original Communications and Notes

- Absorption**
 Pressure, Temperature and pH Dependence of the Absorption Spectrum of Reduced Nicotinamide Adenine Dinucleotide 84
 Chromophore Content and Molar Absorptivity of Phytochrome in the P_r Form 431
- Acacetin**
 The *Para*-O-Methylation of Apigenin to Acacetin by Cell-Free Extracts of *Robinia pseudo-acacia* L. 916
- Accessory Sex Gland**
 On the Specificity of Juvenile Hormone Biosynthesis in the Male *Cecropia* Moth 579
- 3-Acetyl-3-devinylchlorophyllide a**
 Chlorophyll Biosynthesis: Various Chlorophyllides as Exogenous Substrates for Chlorophyll Synthetase 51
- Acetylcholinesterase**
 Molecular Forms of Purified Cytoplasmatic and Membrane Bound Bovine-Brain-Acetylcholinesterase Solubilized by Different Methods 968
- 8-O-Acetylmiosporosid**
 Iridoids in *Clerodendrum thomsonae* Balf. f., Verbenaceae 708
- Acridone Alkaloid**
 Rutacridone-epoxide, a New Acridone Alkaloid from *Ruta graveolens* 200
- Actin**
 Cytochalasin B-Induced ATPase Activity of Actin: Dependence on Monomer Concentration 1050
- Actin Polymerization**
 Cytochalasin B-Induced ATPase Activity of Actin: Dependence on Monomer concentration 1050
- Activation Volume**
 The Pressure Dependence of the Rotation of the N-Aralkylpyridinium Moiety in a Synthetic NAD⁺ Model System Studied by High Pressure HRNMR 366
- Active Particles**
 Which Polypeptides Are Characteristic for Photosystem II? Analysis of Active Photosystem II Particles from the Blue-Green Alga *Anacystis nidulans* 295
- Acyl-CoA**
 Lipid Labelling in Intact Chloroplasts from Exogenous Nucleotide Precursors 62
- Co²⁺-Acylamino Acid, Amido Hydrolase**
 Studies on the Zn²⁺/Co²⁺ Exchange with Acylamino Acid Amidohydrolase from Pig Kidney 951
- Adenosine 3'-phosphate**
In Vitro Biosynthesis of the Plant Sulpholipid: On the Origin of the Sulphonate Group 820
- Adenostoma fasciculatum**
 Analysis of Phenolic Acids by High Performance Liquid Chromatography Using a Step-Wise Gradient 357
- Adenylylation**
 Regulatory Properties of Glutamine Synthetase from the Nitrogen-Fixing Phototrophic Bacterium *Rhodospseudomonas palustris* 784
- Adenylylation/Deadenylylation**
In Vivo Control of Glutamine Synthetase in the Facultative Phototrophic Bacterium *Rhodospseudomonas sphaeroides* 407
- Agaricus**
 Cadmium as a Growth Factor for the Mushroom *Agaricus abruptibulbus* (Peck) Kauffmann 765
- Agmatine Ureohydrolase**
 Location of Several Enzymes of L-Arginine Catabolism in *Evernia prunastri* Thallus (N) 692
- Ajuga**
 Iridoids in Some *Teucrium* and *Ajuga* Species 697
- Alanine: Aldehyde Aminotransferase**
 Properties and Subcellular Localization of L-Alanine: Aldehyde Aminotransferase: Concept of an Ubiquitous Plant Enzyme Involved in Secondary Metabolism 625
- Algae**
 Comparative Binding of Photosystem II – Herbicides to Isolated Thylakoid Membranes and Intact Green Algae 1041
- Alkylating NAD-Analogs**
 Half-of-the-Sites Reactivity of Glyceraldehyde-3-phosphate Dehydrogenase from Rabbit Muscle with Structural Analogs of NAD 545
- Allosteric Interaction**
 Direct Allosteric Interaction of Oxygen and Bicarbonate: N-Acetyl-alanyl-seryl-phenylalanine, N-Terminal Sequence of the β -Chains of the Haemoglobins of Nil Crocodile (*Crocodylus niloticus*) and Mississippi Crocodile (*Alligator mississippiensis*) (N) 902
- Alternaria cineraria**
 $\alpha\beta$ -Dehydrocurvularin and Curvularin from *Alternaria cinerariae* (N) 1081
- Amine-Biosynthesis**
 Properties and Subcellular Localization of L-Alanine: Aldehyde Aminotransferase: Concept of an Ubiquitous Plant Enzyme Involved in Secondary Metabolism 625
- Amino Acid Analysis**
 Chemical Analysis and Structure of Poliovirus. I. Cysteine/Cystine Content, Complete Amino Acid Analysis and Hydrophobicity of Poliovirus and Its Naturally Occurring Empty Capsids 164
- Amino Acid Transformation**
 Radiation Damage to Polypeptides and Proteins in the Solid State, II. Radiolysis of Poly-L-Glutamic Acid (N) 1091
- 5-Aminolevulinate Dehydratase**
 An Evolutionary Tree Based on Monoclonal Antibody-Recognized Surface Features of a Plastid Enzyme (5-Aminolevulinate Dehydratase) 44
- Aminomethylphosphonic Acids**
 Synthesis and Biological Activity of Aminomethylphosphonic Acids Related to the Herbicide Glyphosate 242
- Ammonium Assimilation**
 Molecular Characterization of Glutamine Syn-

- thetase from the Nitrogen-Fixing Phototrophic Bacterium *Rhodospseudomonas palustris* . . . 246
- c-AMP
Gaschromatographic, Mass- and Infrared-Spectrometric Identification of Cyclic Adenosine-3':5-monophosphate (c-AMP) in Maize Seedlings (*Zea mays*) 193
- Amphibia
Are Yolk Phosvitins Carriers for Specific Cations? Comparative Microanalysis in Vertebrate Yolk Platelets (N) 686
- Anacystis
Which Polypeptides Are Characteristic for Photosystem II? Analysis of Active Photosystem II Particles from the Blue-Green Alga *Anacystis nidulans* 295
- Andrena
Pheromone Bouquet of the Mandibular Glands in *Andrena haemorrhoa* F. (Hym., Apoidea) . . . 928
- Aniba
Flavonoid Glycosides and Pyrones in *Aniba* Species (Lauraceae) 385
- Anthocyanins
The Corolation of *Gladiolus*. I. Survey of Anthocyanins in Petals of *Gladiolus* 378
Genetic Control of Chalcone Synthase Activity in Flowers of *Matthiola incana* R. Br. 619
Anthocyanin Carrying Structures in Specific Genotypes of *Matthiola incana* R. Br. 925
- Anthocyanin Biosynthesis
Genetic Control of Flavanone 3-Hydroxylase Activity and Flavonoid 3'-Hydroxylase Activity in *Antirrhinum majus* (Snapdragon) 411
- A-5-MeC Antibody
The Isolation of Antibodies Specific for 5-Methyl-Cytidine-Bovine Serum Albumin 459
- Antibody Quantitation
The Isolation of Antibodies Specific for 5-Methyl-Cytidine-Bovine Serum Albumin 459
- Antifungals
The Effect of Clotrimazole and Triadimefon on 3-Hydroxy-3-methyl-glutaryl-CoA-reductase-[EC 1.1.1.34] Activity in *Saccharomyces cerevisiae* 798
- Rh Antigens
Different Protein-Lipid Interaction in Human Red Blood Cell Membrane of Rh Positive and Rh Negative Blood Compared with Rh_{null} . . . 988
- Antimicrobial Activity
Rutacridone-epoxide, a New Acridone Alkaloid from *Ruta graveolens* 200
- Antimycotics
The Effect of Clotrimazole and Triadimefon on 3-Hydroxy-3-methyl-glutaryl-CoA-reductase-[EC 1.1.1.34] Activity in *Saccharomyces cerevisiae* 798
- Antirrhinum majus*
Genetic Control of Flavanone 3-Hydroxylase Activity and Flavonoid 3'-Hydroxylase Activity in *Antirrhinum majus* (Snapdragon) 411
Oxidation of Flavanones to Flavones with Flower Extracts of *Antirrhinum majus* (Snapdragon) . . . 737
- Antiserum Specificity
Immunoabsorption as a Means for the Purification of Low Molecular Weight Compounds: Isolation of Ecdysteroids from Insects 790
- Apigenin
Oxidation of Flavones to Flavones with Flower Extracts of *Antirrhinum majus* (Snapdragon) . . . 737
- Apo-Enzyme
Studies on the Zn²⁺/Co²⁺ Exchange with Acrylamino Acid Amidohydrolase from Pig Kidney . . . 951
- Arginase
Location of Several Enzymes of L-Arginine (Catabolism) in *Evernia prunastri* Thallus. (N) . . . 692
- Arrhenius Plots
Arrhenius Plots Indicate Localization of Photosynthetic and Respiratory Electron Transport in Different Membrane Regions of *Anabaena* . . . 1036
- Artemisia absinthium*
On the Essential Oil Components from *Artemisia absinthium* L. 369
- Artemisia dracunculus*
On the Composition of the Essential Oil from *Artemisia dracunculus* L. during the Vegetation Period 724
- Arum maculatum*
Properties and Subcellular Localization of L-Alanine: Aldehyde Aminotransferase: Concept of an Ubiquitous Plant Enzyme Involved in Secondary Metabolism 625
- Asclepiadaceae
Investigations on *Hoya species*. VIII. Leaf Flavonols and Di-C-glycosylflavones (N) . . . 1084
- Ascomycetes
Volatile Terpenes from *Ceratocystis fimbriata* (N) . . . 1075
- Ascorbic Acid
ESR Investigations on Blood Treated Intravenously with Ascorbic Acid 1
Paramagnetic Changes in Pulmonary Tumors . . . 5
On a Possible Mechanism of Action of Interferon . . . 323
Ascorbate Oxidase and Its Possible Involvement in Cancer 804
Is there an Equilibrium between Ascorbic and Dehydroascorbic Acids? (N) 1088
- Aspergillus oryzae*
Co²⁺-Substituted Acylamino Acid Amido Hydrolase from *Aspergillus oryzae* 751
- ¹⁴C- and ¹⁵N-Assimilation
Photosynthetic Assimilation of ¹⁵N-Ammonia and ¹⁵N-Nitrate in the Marine Diatoms *Bellerophora yucatanensis* (von Stosch) and *Skeletonema costatum* 834
- Assimilatory Nitrate Reductase
Electron Transport to Assimilatory Nitrate Reductase in *Azotobacter vinelandii* 1030
- ATP Synthesis
ATP Synthesis and Generation of Electrochemical Gradients of Protons in the Catecholamine Storage Organelle of the Adrenal Medulla . . . 1056
- ATPases
¹⁸O-Exchange by Hydrolyzing Enzymes: Extension of the Model to P_i Molecules with Inequivalent Oxygen Atoms in the Bound State . . . 539
- Atrazine
Trypsin-Mediated Removal of Herbicide Binding Sites within the Photosystem II Complex . . . 98
- Attractant
A Sex Attractant for *Sperchia intractana* Walker (Lepidoptera: Tortricidae) in New Zealand (N) . . 178
- Audiospectrographic Study
An Audiospectrographic Study of Male Stridulation in the Genus *Corixa* Geoffr. (Hemiptera, Corixidae) (N) 189
- Auxin
Properties of an ATP-Fueled, Cl⁻-Dependent Proton Pump Localized in Membranes of Microsomal Vesicles from Maize Coleoptiles . . . 997

- Avena* Coleoptiles
Initial Phases of Growth Induced by Sterylglucosides and Indole-3-acetic Acid in *Avena* Coleoptiles (N) 900
- Avena sativa*
Application of Liquid Chromatography to a Study on 4-Coumarate: Coenzyme A Ligase Activity 199
Incorporation of [¹⁴C]Phenylalanine and [¹⁴C]Cinnamic Acid into Leaf Pieces and Mesophyll Protoplasts from Oat Primary Leaves for Studies on Flavonoid Metabolism at the Tissue and Cell Level 222
Preparation and Properties of Chromopeptides from the P_{fr} Form of Phytochrome 440
High Performance Liquid Chromatographic Analysis of Steroidal Saponins from *Avena sativa* L. (N) 1072
- Azadirachta indica*
Inhibition of Oogenesis and Ovarian Ecdysteroid Synthesis by Azadirachtin in *Locusta migratoria migratorioides* (R. & F.) 466
- Azadirachtin*
Inhibition of Oogenesis and Ovarian Ecdysteroid Synthesis by Azadirachtin in *Locusta migratoria migratorioides* (R. & F.) 466
- Azotobacter vinelandii*
Electron Transport to Assimilatory Nitrate Reductase in *Azotobacter vinelandii* 1030
- Bacterial Constituents
7-Hydroxy Tropolone from *Pseudomonas* sp. (N) 728
- Bacteriochlorophyllide a
Chlorophyll Biosynthesis: Various Chlorophyllides as Exogenous Substrates for Chlorophyll Synthetase 51
- Bacteriochlorophylls
Δ²,10-Phytadienol as Esterifying Alcohol of Bacteriochlorophyll b from *Ecotiorhodospira halochloris* 417
- Baker's Yeast
Inhibition by Cyclic Guanosine 3':5'-Monophosphate of the Soluble DNA Polymerase Activity, and of Partially Purified DNA Polymerase A (DNA Polymerase I) from the Yeast *Saccharomyces cerevisiae*
- Behavioral Mutant
Drosophila Males Produce a Pheromone which Inhibits Courtship 694
- Benzimidazole Nucleosides
Solution Conformation of Benzimidazole Nucleosides with the Aid of Model Analogues 126
- Bicarbonate
Direct Allosteric Interaction of Oxygen and Bicarbonate: N-Acetyl-alanyl-seryl-phenylalanine, N-Terminal Sequence of the β-Chains of the Haemoglobins of Nil Crocodile (*Crocodylus niloticus*) and Mississippi Crocodile (*Alligator mississippiensis*) (N) 902
- Bilayer
X-Ray Studies on Phospholipid Bilayers. I. Polymorphic Forms of Dimyristoyl Lecithin 875
- Biochemistry
Binding of Polylysine and Ethidium Bromide to Nucleosomal DNA: Comparison of Biochemical and Electron Microscopical Results 149
- 3-Biosides
Anthocyanin Carrying Structures in Specific Genotypes of *Matthiola incana* R. Br. 925
- Biosynthesis
Purification of Chalcone Synthase from Tulip Anthers and Comparison with the Synthase from *Cosmos* Petals 30
Formation of Fusaric Acid by Fungi of the Genus *Fusarium* (N) 338
Structure and Biosynthesis of Vitexin 2''-O-Xyloside in *Silene alba* 484
Methylation of 3',4' Di-OH C-Glycosylflavones in *Silene* 486
Conversion of Flavanone to Flavone, Dihydroflavonol and Flavonol with an Enzyme System from Cell Cultures of Parsley 742
The Para-O-Methylation of Apigenin to Acaetin by Cell-Free Extracts of *Robinia pseudoacacia* L. 916
Biosynthesis of 3-Carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline and 1-Methyl-3-carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline in a Callus Culture of *Stizolobium hassjoo* 1921
- Blood Vascular System
Vascular Specialization in Fish, but No Evidence for Lymphatics (N) 490
- Blepharisma japonicum*
Synthesis of Blepharismone, the Low-Molecular Conjugation Hormone of *Blepharisma japonicum* (N) 180
- Blepharismone
Synthesis of Blepharismone, the Low-Molecular Conjugation Hormone of *Blepharisma japonicum* (N) 180
- Blood Count
ESR Investigations on Blood Treated Intravenously with Ascorbic Acid 1
- Blue-Green Algae
Temperature Induced Changes in the Absorption Spectra of *Porphyridium cruentum* and *Anacystis nidulans* 1013
Arrhenius Plots Indicate Localization of Photosynthetic and Respiratory Electron Transport in Different Membrane Regions of *Anabaena* 1036
- Boletales
Metabolites of 1,2,4-Trihydroxybenzene from Fruiting Bodies of *Gomphidium maculatus* and *G. glutinosus* (Boletales) (N) 488
- Bony Fishes
Vascular Specialization in Fish, but No Evidence for Lymphatics 490
- Bovine-Brain
Molecular Forms of Purified Cytoplasmatic and Membrane Bound Bovine-Brain-Acetylcholinesterase Solubilized by Different Methods 968
- Bovine Satellite DNAs
A Family of Sequences with Regional Homology to Bovine 1.715 Satellite DNA 973
- Brassicaceae
Anthocyanin Carrying Structures in Specific Genotypes of *Matthiola incana* R. Br. 925
- Brown Algae
C₄-Metabolism in Marine Brown Macrophytic Algae 840
- Burley Tobacco
New Cembranoids from Burley Tobacco (N) 1077
- Cadmium
Cadmium as a Growth Factor for the Mushroom *Agaricus abruptibulbus* (Peck) Kauffmann 765

- Calcium
Effect of Isobutylmethylxanthine and Related Drugs on the Receptor Response (ERG; a-Wave) of the Frog Retina at Various Extracellular Calcium Concentrations 597
- Calf Thymus DNA
Physico-Chemical Characteristics of DNA Chromatin Fractions from Calf Thymus 361
- Calf Thymus Freezing
Lymphocyte Chalone from Calf Thymus: Problems of Large Scale Extraction and Assay 568
- Callus Culture
Biosynthesis of 3-Carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline and 1-Methyl-3-carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline in a Callus Culture of *Stizolobium hassjoo* 921
- Cancer
On a Possible Mechanism of Action of Interferon 323
- Cap Analogs
Preparation of 5',5''-Phosphate linked Dinucleosides 135
- Carbohydrate Moiety
Three Dimensional Structure of the Carbohydrate Moiety of a Lipopolysaccharide. Computer Calculations 71
- Carbohydrates
Discrimination of Two Fusogenic Properties of Aqueous Polyethylene Glycol Solutions 593
- 3-Carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline
Biosynthesis of 3-Carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline and 1-Methyl-3-carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline in a Callus Culture of *Stizolobium hassjoo* 921
- β -Carboxylation
C₄-Metabolism in Marine Brown Macrophytic Algae 840
- [¹⁴C] β -Carotene
Carotenoids in the Stick Insect, *Ectatosoma tiaratum* Isolation of β,ϵ -Caroten-2-ol and β,ϵ -Coroten-2-one 755
- Carotenoids
Effect of Vanadate and Iron Stress on the Pigment Composition of *Chlorella Fusca* 207
Partition of Phylloquinone K₁ between Digitonin Particles and Chlorophyll-Proteins of Chloroplast Membranes from *Nicotiana tabacum* 276
- Caryophyllaceae
Structure and Biosynthesis of Vitexin 2''-O-Xyloside in *Silene alba* 484
Methylation of 3',4' Di-OH C-Glycosylflavones in *Silene* 486
- Catecholamine Storage Organelles
ATP Synthesis and Generation of Electrochemical Gradients of Protons in the Catecholamine Storage Organelle of the Adrenal Medulla 1056
- Catharanthus roseus*
Medium-Induced Formation of Indole Alkaloids and Concomitant Changes of Interrelated Enzyme Activities in Cell Suspension Cultures of *Catharanthus roseus* 40
- Cations
Are Yolk Phosvitins Carriers for Specific Cations? Comparative Microanalysis in Vertebrate Yolk Platelets 686
- Cell Damage
Titration of Rat Liver with Digitonin: a Well Defined Short Term Damage of Cellular Metabolism 880
- Cell Cultures
Conversion of Flavanone to Flavone, Dihydroflavonol and Flavonol with an Enzyme System from Cell Cultures of Parsley 742
- Cell Fusion
Discrimination of Two Fusogenic Properties of Aqueous Polyethylene Glycol Solutions 593
- Cell Membrane
Rotation of Cells in an Alternating Electric Field: the Occurrence of a Resonance Frequency 173
- Cell Rotation
Rotation of Cells in an Alternating Electric Field: the Occurrence of a Resonance Frequency 173
- Cembranoids
New Cembranoids from Burley Tobacco (N) 1077
- Central Nervous System
Action Potentials in "Non-Spiking" Visual Interneurons 470
- Ceratocystis fimbriata*
Volatile Terpenes from *Ceratocystis fimbriata* (N) 1075
- C-Glycosylflavones
Incorporation of [¹⁴C]Phenylalanine and [¹⁴C]Cinnamic Acid into Leaf Pieces and Mesophyll Protoplasts from Oat Primary Leaves for Studies on Flavonoid Metabolism at the Tissue and Cell Level 222
- Chalcone Synthase
Purification of Chalcone Synthase from Tulip Anthers and Comparison with the Synthase from *Cosmos* Petals 30
Genetic Control of Chalcone Synthase Activity in Flowers of *Matthiola incana* R. Br. 619
- Change in Absorption
Temperature Induced Changes in the Absorption Spectra of *Porphyridium cruentum* and *Anacystis nidulans* 1013
- Changes in Amino Acid Compositions
Radiation Damage to Polypeptides and Proteins in the Solid State: Changes in Amino Acid Composition 310
- Cl⁻-Channel
Properties of an ATP-Fueled, Cl⁻-Dependent Proton Pump Localized in Membranes of Microsomal Vesicles from Maize Coleoptiles 997
- Chasing
Courtship-Like Tracking Behaviour in Wild-Type Female *Drosophila melanogaster* 475
- Chelating Ligands
Studies on the Zn²⁺/Co²⁺ Exchange with Acylamino Acid Amidohydrolase from Pig Kidney 951
- Chemosystematics
Flavonoidglycoside and Pyrone bei *Aniba*-Arten (Lauraceae) 385
- Chemotaxis
Receptor Specificity and Threshold Concentration in Chemotaxis of the Phaeophyte *Cutleria multifida* 262
- Chemotaxonomy
Iridoids in Some *Teucrium* and *Ajuga* Species 697
Investigations on *Hoya species*. VIII. Leaf Flavonols and Di-C-glycosylflavones (N) 1084
- Chlamydomonas reinhardtii* CW 15
In Vitro Biosynthesis of the Plant Sulpholipid: On the Origin of the Sulphonate Group 820
- Chlorella*
A Thioredoxin Activated Glutamine Synthetase in *Chlorella* 396

- Chlorella fusca*
Effect of Vanadate and Iron Stress on the Pigment Composition of *Chlorella Fusca* 207
- 4-Chloroaniline
Incorporation of Chlorinated Anilines into Lignin 714
- Chlorophyll
Esterification of Chlorophyllide in Prolamellar Body (PLB) and Prothylakoid (PT) Fractions from *Avena sativa* Etioplasts 58
Effect of Vanadate and Iron Stress on the Pigment Composition of *Chlorella Fusca* 207
Effect of Hydrogen Ion Concentration on the Absorption Spectrum and Fluorescence Life Time of Chloroplasts 638
- Chlorophyll a/b Ratio
Partition of Phylloquinone K₁ between Digitonin Particles and Chlorophyll-Proteins of Chloroplast Membranes from *Nicotiana tabacum* Light-Induced Accumulation and Stability of Chlorophylls and Chlorophyll-Proteins during Chloroplast Development in Radish Seedlings 421
- Chlorophyll Degradation
Light-Induced Accumulation and Stability of Chlorophylls and Chlorophyll-Proteins during Chloroplast Development in Radish Seedlings 421
Pyropheophytin a Accompanies Pheophytin a in Darkened Light Grown Cells of *Euglena* 827
- Chlorophyll Fluorescence
The Inhibition of Photosynthetic Light Reactions by Halogenated Naphthoquinones 645
- Chlorophyll-Proteins
Partition of Phylloquinone K₁ between Digitonin Particles and Chlorophyll-Proteins of Chloroplast Membranes from *Nicotiana tabacum* Light-Induced Accumulation and Stability of Chlorophylls and Chlorophyll-Proteins during Chloroplast Development in Radish Seedlings 421
- Chlorophyllides a and b
Chlorophyll Biosynthesis: Various Chlorophyllides as Exogenous Substrates for Chlorophyll Synthetase 51
- Chloroplast Development
Light-Induced Accumulation and Stability of Chlorophylls and Chlorophyll-Proteins during Chloroplast Development in Radish Seedlings 421
- Chloroplast Envelope
The Permeability Coefficients of the Plasmalemma and the Chloroplast Envelope of Spinach Mesophyll Cells for Phytohormones 672
- Chloroplast Membranes
Trypsin-Mediated Removal of Herbicide Binding Sites within the Photosystem II Complex 98
- Chloroplasts
Reinvestigation of the Effects of Disalicylidenepropanediamine (DSPD) and 2-Heptyl-4-hydroxyquinoline-N-oxide (HQNO) on Photosynthetic Electron Transport 109
Effect of Hydrogen Ion Concentration on the Absorption Spectrum and Fluorescence Life Time of Chloroplasts 638
Subcellular Compartmentation of Indole-3-acetic Acid in Mesophyll Cells of *Spinacia oleracea* 679
Evidence for a Transcarboxylase Reaction in Maize Chloroplast Extracts (N) 688
Effects of Linolenic Acid on the Spectral Properties and Picosecond Fluorescence of Pea Chloroplasts 1021
- Chromatin
Physico-Chemical Characteristics of DNA Chromatin Fractions from Calf Thymus 361
- Chrysosplenium americanum*
Polymethylated Flavonols of *Chrysosplenium americanum*. I. Identification and Enzymatic Synthesis 730
- Cineraria
 $\alpha\beta$ -Dehydrocurvularin and Curvularin from *Alternaria cinerariae* (N) 1081
- Cinnamoyl Putrescines
Effects of Glyphosate on Shikimic Acid Accumulation in Tobacco Cell Cultures with Low and High Yields of Cinnamoyl Putrescines 210
- Circadian Rhythm
Effect of Lithium Chloride on the Circadian Rhythm in the Flight Activity of the Microchiropteran Bat, *Tapozous melanopogon* 1068
- Circular Dichroism
Protamines. VII. Circular Dichroism Study of Salmine A I 305
Effect of Hydrogen Ion Concentration on the Absorption Spectrum and Fluorescence Life Time of Chloroplasts 638
- Clerodendrum*
Iridoids in *Clerodendrum thomsonae* Balf. f., Verbenaceae 708
- C₄-Metabolism
C₄-Metabolism in Marine Brown Macrophytic Algae 840
- C-Methylated Flavones
Epicuticular Leaf Flavonoids from *Eucalyptus* Species and from *Kalmia latifolia* 913
- Coa/Co β -Isomerism
CO α /Co β -Isomerism of the Cobalt Methylated Corrinoids. CD and ORD Spectra of Several Isomer Pairs 497
- Cobyric Acid
About the Iron Analogues of Cobalamin and Cobyric Acid 9
- Coenzyme Derivatives
Interactions between Tryptophan Synthase from *Escherichia coli* and Derivatives of the Coenzyme Pyridoxal 5'-Phosphate 778
- Coleoptile
Properties of an ATP-Fueled, Cl⁻-Dependent Proton Pump Localized in Membranes of Microsomal Vesicles from Maize Coleoptiles 997
A H⁺/Ca²⁺ Antiporter in Membranes of Microsomal Vesicles from Maize Coleoptiles, a Secondary Energized Ca²⁺ Pump 1009
- Collagen
Fitting of SAXS-Curves by Nonlinear Regression 333
- Colony Assay
Lymphocyte Chalone from Calf Thymus: Problems of Large Scale Extraction and Assay 568
- Compartmental Analysis
Subcellular Compartmentation of Indole-3-acetic Acid in Mesophyll Cells of *Spinacia oleracea* 679
- Computer Programs
A Program Package for the Analysis of Peptide Conformations on the TR 440 (N) 347
- Concentrations
Effect of Oxygen on Photosynthetic CO₂ Fixation of *Synechococcus* 93
- Conformation Analysis
Solution Conformation of Benzimidazole Nucleosides with the Aid of Model Analogues 126

- Coniferyl Alcohol
Incorporation of Chlorinated Anilines into Lignin 714
- Conjugation
Synthesis of Blepharismone, the Low-Molecular Conjugation Hormone of *Blepharisma japonicum* 180
- Continuous $^{14}\text{CO}_2$ Evolution
In vivo Evidence for a Functional Glycolytic Compartment in Synchronous Yeast Cells 615
- Contrast
A Simple Coding Procedure Enhances a Neuron's Information Capacity (N) 910
- Copper and Spin Concentration of Blood
ESR Investigations on Blood Treated Intravenously with Ascorbic Acid 1
- Copper Proteins
Ascorbate Oxidase and Its Possible Involvement in Cancer 804
- Corixa*
An Audiospectrographic Study of Male Stridulation in the Genus *Corixa* Geoffr. (Hemiptera, Corixidae) (N) 189
- Corpus allatum*
On the Specificity of Juvenile Hormone Biosynthesis in the Male *Cecropia* Moth 579
- Cosmos
Purification of Chalcone Synthase from Tulip Anthers and Comparison with the Synthase from *Cosmos* Petals 30
- p*-Coumaroyl-CoA
Application of Liquid Chromatography to a Study on 4-Coumarate: Coenzyme A Ligase Activity 197
- Courtship
Courtship-Like Tracking Behaviour in Wild-Type Female *Drosophila melanogaster* 475
- Crayfishes
Isolation of Nuclei from Crayfish Tissues and Demonstration of Nuclear Ecdysteroid Receptors 326
- Cross-Linking
Reassociation of Lactic Dehydrogenase from Pig Heart Studied by Cross-Linking with Glutaraldehyde 772
- Cryopreservation
Lymphocyte Chalone from Calf Thymus: Problems of Large Scale Extraction and Assay 568
- Crystal Packing Forces
Influence of Crystal Packing Forces on Molecular Structure in 4-Thiouridine. Comparison of *anti* and *syn* Forms 956
- Crystals
Anthocyanin Carrying Structures in Specific Genotypes of *Matthiola incana* R. Br. 925
- Cruciferae
Enzymatic Preparation and Properties of Some Desulfo-glucosinolates 16
- Cultures
Effect of Glucocorticoids, Insulin and a Growth Promoting Tripeptide on the Biosynthesis of Plasma Proteins in Serum-Free Hepatocyte Cultures (N) 350
- Curvularin
 $\alpha\beta$ -Dehydrocurvularin and Curvularin from *Alternaria cinerariae* (N) 1081
- Cutleria multifida*
Receptor Specificity and Threshold Concentration in Chemotaxis of the Phaeophyte *Cutleria multifida* 262
- Cyanobacteria
Hydrogen Evolution Catalyzed by Hydrogenase in Cultures of Cyanobacteria 87
- Cyclic AMP-Dependent and -Independent
Protein Kinases in HeLa Cells and in Human Cervix Carcinoma 552
- Cyclic Guanosine Monophosphate
Inhibition by Cyclic Guanosine 3':5'-Monophosphate of the Soluble DNA Polymerase Activity, and of Partially Purified DNA Polymerase A (DNA Polymerase I) from the Yeast *Saccharomyces cerevisiae* 813
- Cyclostomes
Are Yolk Phosvitins Carriers for Specific Cations? Comparative Microanalysis in Vertebrate Yolk Platelets (N) 686
- Cytochalasin B
Cytochalasin B-Induced ATPase Activity of Actin: Dependence on Monomer Concentration 1050
- Cytoplasm
Intracellular Effect of Hydroxyalkenals on Animal Tumors 572
- Cytoplasmatic
Molecular Forms of Purified Cytoplasmatic and Membrane Bound Bovine-Brain-Acetylcholinesterase Solubilized by Different Methods 968
- Dark Fixation
 C_4 -Metabolism in Marine Brown Macrophytic Algae 840
- DEAE
The Isolation of Antibodies Specific for 5-Methyl-Cytidine-Bovine Serum Albumin 459
- Dehydroascorbic Acid
Is there an Equilibrium between Ascorbic and Dehydroascorbic Acids? (N) 1088
- $\alpha\beta$ -Dehydrocurvularin
 $\alpha\beta$ -Dehydrocurvularin and Curvularin from *Alternaria cinerariae* (N) 1081
- Dehydrogenases
Pressure, Temperature and pH Dependence of the Absorption Spectrum of Reduced Nicotinamide Adenine Dinucleotide 84
- Desulfo-Glucosinolates
Enzymatic Preparation and Properties of Some Desulfo-glucosinolates 16
- Diacylsulphoquinovosyl Glyceride
In Vitro Biosynthesis of the Plant Sulpholipid: On the Origin of the Sulphonate Group 820
- Digitonin
Titration of Rat Liver with Digitonin: a Well Defined Short Term Damage of Cellular Metabolism 880
- A-Dihydrobilindiones
Chromophore Content and Molar Absorptivity of Phytochrome in the P_r Form 431
- Dihydrocoumarin
Dryopteris, ein neuartiges C_{17} -Flavan aus *Dryopteris filix-mas* 607
- Dimethylallyl Transferase
Induction of Phytoalexin Synthesis in Soybean. Structure and Reactions of Naturally Occurring and Enzymatically Prepared Prenylated Pterocarpans from Elicitor-Treated Cotyledons and Cell Cultures of Soybean 234
- Dimyristoyl Lecithin
X-Ray Studies on Phospholipid Bilayers. I. Polymorphic Forms of Dimyristoyl Lecithin 875

- Dioxygenases
Conversion of Flavanone to Flavone, Dihydroflavonol and Flavonol with an Enzyme System from Cell Cultures of Parsley 742
- Diphenylether
Mode of Inhibition of Photosynthetic Electron Transport by Substituted Diphenylethers 848
- Dipole
Rotation of Cells in an Alternating Electric Field: the Occurrence of a Resonance Frequency 173
- Diptera
Action Potentials in "Non-Spiking" Visual Interneurons 470
- Co²⁺ Dissociation Constant
Studies on the Zn²⁺/Co²⁺ Exchange with Acylamino Acid Aminohydrolase from Pig Kidney 951
- Diterpenoid Alcohols
42,10-Phytadienol as Esterifying Alcohol of Bacteriochlorophyll b from *Ectothiorhodospira halochloris* 417
- Diterpenoids
New Cembranoids from Burley Tobacco (N) 1077
- Diuron
Trypsin-Mediated Removal of Herbicide Binding Sites within the Photosystem II Complex 98
- DNA Circular Permutation
Partial Denaturation Mapping of Phage T4 DNA at Low Temperature 980
- DNA Content
DNA Content and Fragmentation of the Egg Nucleus of *Trichoplax adhaerens* 564
- DNA Denaturation Map
Partial Denaturation Mapping of Phage T4 DNA at Low Temperature 980
- DNA Polymerase I
Inhibition by Cyclic Guanosine 3':5'-Monophosphate of the Soluble DNA Polymerase Activity, and of Partially Purified DNA Polymerase A (DNA Polymerase I) from the Yeast *Saccharomyces cerevisiae* 813
- DNA Polymerase A
Inhibition by Cyclic Guanosine 3':5'-Monophosphate of the Soluble DNA Polymerase Activity, and of Partially Purified DNA Polymerase A (DNA Polymerase I) from the Yeast *Saccharomyces cerevisiae* 813
- DNA Polymerase Activity
Inhibition by Cyclic Guanosine 3':5'-Monophosphate of the Soluble DNA Polymerase Activity, and of Partially Purified DNA Polymerase A (DNA Polymerase I) from the Yeast *Saccharomyces cerevisiae* 813
- Drosophila melanogaster*
Courtship-Like Tracking Behaviour in Wild-Type Female *Drosophila melanogaster* 475
Drosophila Males Produce a Pheromone which Inhibits Courtship (N) 694
- Dryopteris filix-mas* (L.) Schott
Dryopterin, a Novel C₁₇-Flavan from *Dryopteris filix-mas* 607
- Dye-Ligand Chromatography
Molecular Characterization of Glutamine Synthetase from the Nitrogen-Fixing Phototrophic Bacterium *Rhodospseudomonas palustris* 246
- Ecdysteroids
Inhibition of Oogenesis and Ovarian Ecdysteroid Synthesis by Azadirachtin in *Locusta migratoria migratorioides* (R. & F.) 466
- Immunoadsorption as a Means for the Purification Low Molecular Weight Compounds: Isolation of Ecdysteroids from Insects 790
- Effect of Oxygen and CO₂ Concentrations
Effect of Oxygen on Photosynthetic CO₂ Fixation of *Synechococcus* 93
- Effects of Hydrogen Peroxide
Electrophoretic and Chemical Studies on the X-Ray Damage of Malate Synthase 516
- Egg Nucleus
DNA Content and Fragmentation of the Egg Nucleus of *Trichoplax adhaerens* 564
- Eggs
Fatty Acid Composition of Eggs during Development of the Cotton Leaf-Worm, *Spodoptera littoralis* Boisduval 562
- Ehrlich Ascites Tumor Cells
The Effect of Glucosone on the Proliferation and Energy Metabolism of *in vitro* Grown Ehrlich Ascites Tumor Cells 255
- Electric Field
Rotation of Cells in an Alternating Electric Field: the Occurrence of a Resonance Frequency 173
- Electron Acceptors
Site of Action of 2,5-Dimethoxy-3,6-Dichloro-*p*-Benzoquinone in the Photosynthetic Electron Transport Chain 656
- Electron Microscopy
Radiation Damage to Polypeptides and Proteins in the Solid State: Changes in Amino Acid Composition 310
Isolation and Morphological Characterization of the Potato Lefroll Virus (PLRV) 884
Radiation Damage to Polypeptides and Proteins in the Solid State, II. Radiolysis of Poly-L-Glutamic Acid (N) 1091
- Electron Transport
Reinvestigation of the Effects of Disalicylidenepropanediamine (DSPD) and 2-Heptyl-4-hydroxyquinoline-N-oxide (HQNO) on Photosynthetic Electron Transport 109
The Inhibition of Photosynthetic Light Reactions by Halogenated Naphthoquinones 645
- Electron Transport to Nitrate Reductase
Electron Transport to Assimilatory Nitrate Reductase in *Azotobacter vinelandii* 1030
- Electroreceptors
Electroreceptors and Direction Specific Arrangement in the Lateral Line System of Salamanders? (N) 493
- Electroretinogram
Effect of Isobutylmethylxanthine and Related Drugs on the Receptor Response (ERG; a-Wave) of the Frog Retina at Various Extracellular Calcium Concentrations 597
- Embryotoxicity
Thalidomide-Like Malformations Caused by a Tween Surfactant in Mice 904
- Empty Capsids
Chemical Analysis and Structure of Poliovirus. I. Cysteine/Cystine Content, Complete Amino Acid Analysis and Hydrophobicity of Poliovirus and Its Naturally Occurring Empty Capsids 164
- Endothelial Cells
Vascular Specialization in Fish, but No Evidence for Lymphatics (N) 490

- Energy Calculations
A Program Package for the Analysis of Peptide Conformations on the TR 440 (N) 347
- Energy Metabolism
The Effect of Glucosone on the Proliferation and Energy Metabolism of *in vitro* Grown Ehrlich Ascites Tumor Cells 255
- Energy-Transfer Inhibition of ATP Synthesis
Multifunctional Mode of Action of Substituted Nitrodiphenylethers in *Scenedesmus* Cells 633
- Enzymatic Synthesis
Polymethylated Flavonols of *Chrysosplenium americanum* I. Identification and Enzymatic Synthesis 730
- Enzyme Kinetics
 ^{18}O -Exchange by Hydrolyzing Enzymes: An *ab initio* Calculation 534
 ^{18}O -Exchange by Hydrolyzing Enzymes: Extension of the Model to P_i Molecules with Inequivalent Oxygen Atoms in the Bound State 539
- Enzyme Mechanism
 ^{18}O -Exchange by Hydrolyzing Enzymes: Extension of the Model to P_i Molecules with Inequivalent Oxygen Atoms in the Bound State 539
- Enzyme Purification
Purification and Properties of a New Enzyme from *Evernia prunastri*, which Reduces L-Usnic Acid 35
- Envelope
Lipid Labelling in Intact Chloroplasts from Exogenous Nucleotide Precursors 62
- Envelope Polypeptides
Purification of Murine and Feline Type-C Virus Envelope Polypeptides as Micellar Protein Complexes (N) 353
- Epidermis
Distribution of Phenylalanine Ammonia-Lyase and 4-Coumarate: CoA Ligase in Oat Primary Leaf Tissues 389
- Erythrocyte
Immobilization of Erythrocytes by Radiation Polymerization of Glass-Forming Monomers at Low Temperatures 1062
- ESR
ESR Investigations on Blood Treated Intravenously with Ascorbic Acid 1
Paramagnetic Changes in Pulmonary Tumors . . 5
Ascorbate Oxidase and Its Possible Involvement in Cancer 804
On a Possible Mechanism of Action of Interferon Altered Heme Environments in Opossum and Rabbit Methemoglobins 964
Is there an Equilibrium between Ascorbic and Dehydroascorbic Acids? (N) 1088
- ESR and Infrared Studies
Different Protein-Lipid Interaction in Human Red Blood Cell Membrane of Rh Positive and Rh Negative Blood Compared with Rh_{null} 988
- ESR Spectroscopy
Interaction of Phloretin with the Human Red Cell Membrane and Membrane Lipids: Evidence from Infrared, Raman and ESR Spectroscopy 586
- Essential Oil
On the Essential Oil Components from *Majorana hortensis* Moench 23
On the Essential Oil Components from *Artemisia absinthium* L. 369
On the Composition of the Essential Oil from *Artemisia drancunculus* L. during the Vegetation Period 724
- Ethane Production
Stimulation of Wound Reactions in Potato Tubers by Thiabendazole 115
- Ethidium Bromide
Binding of Polylysine and Ethidium Bromide to Nucleosomal DNA: Comparison of Biochemical and Electron Microscopical Results 149
- Etioplast
Red Light Induced Change in the Saponin Content of Prolamellar Bodies in *Avena sativa* 869
High Performance Liquid Chromatographic Analysis of Steroidal Saponins from *Avena sativa* L. (N) 1072
- Eucalyptus globulus*
Epicuticular Leaf Flavonoids from *Eucalyptus* Species and from *Kalmia latifolia* 913
- Euglena*
Pyropheophytin a Accompanies Pheophytin a in Darkened Light Grown Cells of *Euglena* 827
- Evernia prunastri*
Purification and Properties of a New Enzyme from *Evernia prunastri*, which Reduces L-Usnic Acid 35
Location of Several Enzymes of L-Arginine Catabolism in *Evernia prunastri* Thallus. (N) 692
- Evolutionary Tree
An Evolutionary Tree Based on Monoclonal Antibody-Recognized Surface Features of a Plastid Enzyme (5-Aminolevulinate Dehydratase) 44
- Exchange
ATP Synthesis and Generation of Electrochemical Gradients of Protons in the Catecholamine Storage Organelle of the Adrenal Medulla . . . 1056
- ^{18}O -Exchange
 ^{18}O -Exchange by Hydrolyzing Enzymes: An *ab initio* Calculation 534
 ^{18}O -Exchange by Hydrolyzing Enzymes: Extension of the Model to P_i Molecules with Inequivalent Oxygen Atoms in the Bound State 539
- $\text{Zn}^{+2}/\text{Co}^{+2}$ Exchange
 Co^{+2} -Substituted Acylamino Acid Amido Hydrolase from *Aspergillus oryzae* 751
- External Flavonoid Aglycones
Epicuticular Leaf Flavonoids from *Eucalyptus* Species and from *Kalmia latifolia* 913
- Extinction Coefficient
Chemical Analysis and Structure of Poliovirus. I. Cysteine/Cystine Content, Complete Amino Acid Analysis and Hydrophobicity of Poliovirus and Its Naturally Occurring Empty Capsids . . 164
- Facultative Phototrophic Bacteria
In Vivo Control of Glutamine Synthetase in the Facultative Phototrophic Bacterium *Rhodospseudomonas sphaeroides* 407
- Farinose Exudate
Unusual Flavanones from a Rare American Fern 604
- Fatty Acids
Fatty Acid Composition of Eggs during Development of the Cotton Leaf-Worm, *Spodoptera littoralis* Boisduval 562

- Fe(III)Cobalamin
About the Iron Analogues of Cobalamin and
Cobyrlic Acid 9
- Females
Courtship-Like Tracking Behaviour in Wild-
Type Female *Drosophila melanogaster* 475
- 9(11)-Ferne
9(11)-Ferne and Its 21-Epimer as an Epi-
cuticular Layer on Ferns (N) 896
- Ferredoxin
Electron Transport to Assimilatory Nitrate Re-
ductase in *Azotobacter vinelandii* 1030
- Ferulic Acid Esters
Ferulic Acid-Sucrose Esters from Immature
Anthers of *Tulipa* cv. "Apeldoorn" 721
- Fibronectin
Effect of Lectins and Chemical Modification on
the Hemagglutinin Activity of Human Plasma
Fibronectin 863
- ¹⁴CO₂ Fixation
Effect of Oxygen on Photosynthetic CO₂ Fix-
ation of *Synechococcus* 93
- Flavan
Dryopteris, ein neuartiges C₁₇-Flavan aus
Dryopteris filix-mas 607
- Flavanone
Genetic Control of Flavanone 3-Hydroxylase
Activity and Flavonoid 3'-Hydroxylase Activity
in *Antirrhinum majus* (Snapdragon) 411
- Flavanone Oxidase
Oxidation of Flavanones to Flavones with Flow-
er Extracts of *Antirrhinum majus* (Snapdragon) 737
- Flavins
Isolation and Identification of an Oxygen Re-
ducing Factor (ORF) from Isolated Spinach
Chloroplast Lamellae 284
- Flavodoxin
Electron Transport to Assimilatory Nitrate Re-
ductase in *Azotobacter vinelandii* 1030
- Flavonoid Biosynthesis
Oxidation of Flavanones to Flavones with Flow-
er Extracts of *Antirrhinum majus* (Snapdragon) 737
- Flavonoid 3'-Hydroxylase
Genetic Control of Flavanone 3-Hydroxylase
Activity and Flavonoid 3'-Hydroxylase Activity
in *Antirrhinum majus* (Snapdragon) 411
- Flavonoids
Purification of Chalcone Synthase from Tulip
Anthers and Comparison with the Synthase from
Cosmos Petals 30
Flavonoid Glycosides and Pyrones in *Aniba-*
Species (Lauraceae) 385
Genetic Control of Flavanone 3-Hydroxylase
Activity and Flavonoid 3'-Hydroxylase Activity
in *Antirrhinum majus* (Snapdragon) 411
Genetic Control of Chalcone Synthase Activity
in Flowers of *Matthiola incana* R. Br. 619
Conversion of Flavanone to Flavone, Dihy-
droflavonol and Flavonol with an Enzyme Sys-
tem from Cell Cultures of Parsley 742
The Para-O-Methylation of Apigenin to Aca-
cetin by Cell-Free Extracts of *Robinia pseudoa-*
cacia L. 916
- Flavonol
Investigations on *Hoya species*. VIII. Leaf Fla-
vonols and Di-C-glycosylflavones (N) 1084
- Flight Activity
Effect of Lithium Chloride on the Circadian
Rhythm in the Flight Activity of the Micro-
chiropteran Bat, *Taphozous melanopogon* 1068
- Fluorescence Lifetimes
Effect of Hydrogen Ion Concentration on the
Absorption Spectrum and Fluorescence Life
Time of Chloroplasts 638
Effects of Linolenic Acid on the Spectral Proper-
ties and Picosecond Fluorescence of Pea Chloro-
plasts 1021
- Fly Eye
A Simple Coding Procedure Enhances a
Neuron's Information Capacity (N) 910
- α -Formylphenylacetic Acid
Chemical Synthesis of α -Formylphenylacetic
Acid, the Postulated Precursor of Tropic Acid 611
- Fragmentation
DNA Content and Fragmentation of the Egg
Nucleus of *Trichoplax adhaerens* 564
- Free Radical
Is there an Equilibrium between Ascorbic and
Dehydroascorbic Acids? (N) 1088
- Frog Retina
Effect of Isobutylmethylxanthine and Related
Drugs on the Receptor Response (ERG;
a-Wave) of the Frog Retina at Various Ex-
tracellular Calcium Concentrations 597
- Fusaric Acid
Formation of Fusaric Acid by Fungi of the
Genus *Fusarium* (N) 338
- Fusarium*
Formation of Fusaric Acid by Fungi of the
Genus *Fusarium* (N) 338
- Fusogenic Properties
Discrimination of Two Fusogenic Properties of
Aqueous Polyethylene Glycol Solutions 593
- Gamones
Synthesis of Blepharismone, the Low-Molecular
Conjugation Hormone of *Blepharisma japonicum*
(N) 180
- GC-MS-Analysis
Gaschromatographic, Mass- and Infrared-Spec-
trometric Identification of Cyclic Adenosine-
3':5'-monophosphate (c-AMP) in Maize Seed-
lings (*Zea mays*) 193
Mammalian Pheromone Studies, IV. Terpenoid
Compounds and Hydroxy Esters from the Dor-
sal Gland of the Springbok, *Antidorcas mar-*
supialis (N) 340
Mammalian Pheromone Studies, V. Compounds
from the Preorbital Gland of the Grysbock,
Raphicerus melanotis (N) 344

Methylation of 3',4' Di-OH C-Glycosylflavones in *Silene* 486
- JH Biosynthesis
On the Specificity of Juvenile Hormone Biosynthesis in the male *Cecropia* Moth 579
- Kalanchoe bl.*
Succulence - Induction in *Kalanchoe bloßfeldiana* under Long-Day Conditions by a Lipophyle Fraction out of Flowering *Kalanchoe* and MS-Identification of Pterosterone 465
- Kalmia latifolia*
Epicuticular Leaf Flavonoids from *Eucalyptus* Species and from *Kalmia latifolia* 913
- 7-Keto-cholesterol
Steroids of Human Thymi (N) 1086
- Kinetic Properties
Co⁺²-Substituted Acylamino Acid Amido Hydrolase from *Aspergillus oryzae* 751
- Kok Effect
The Kok Effect and Its Relationship to Photorespiration in Tobacco 450
- Lactic Dehydrogenase
Reassociation of Lactic Dehydrogenase from Pig Heart Studied by Cross-Linking with Glutaraldehyde 772
- Lactone
Dryopterin, a Novel C₁₇-Flavan from *Dryopteris filix-mas* 607
- Lamiaceae
Oviposition Deterrence Activity in Some Lamiaceae Plants against Some Insect Pests 122
- Lateral Line Afferents
Electroreceptors and Direction Specific Arrangement in the Lateral Line System of Salamanders? (N) 493
- Lateral Line Efferents
Electroreceptors and Direction Specific Arrangement in the Lateral Line System of Salamanders? (N) 493
- Leaf Wax
9(11)-Ferne and Its 21-Epimer as an Epicuticular Layer on Ferns (N) 896
- Lectins
Effect of Lectins and Chemical Modification on the Hemagglutinin Activity of Human Plasma Fibronectin 863

- Leukemia
 Ascorbate Oxidase and Its Possible Involvement in Cancer 804
- Leukemia L 1210
 Specific Positional Distribution of Acyl Moieties in Phospholipids is not Generally Deleted in Neoplastic Cells 81
- Li⁺
 Effect of Lithium Chloride on the Circadian Rhythm in the Flight Activity of the Microchiropteran Bat, *Taphozous melanopogon* . . . 1068
- Lichen Substances
 Pannaric Acid and Prophyrylic Acid Methyl Ester Lichen Substances in the Genus *Psoroma* (N) 893
- Life Cycle
 Life Cycle of *Sarcocystis* between Poikilothermic Hosts. Lizards are Intermediate Hosts for *S. podarcicolubris* sp. nov, Snakes Function as Definitive Hosts (N) 1093
- Lifetimes
 Effects of Linolenic Acid on the Spectral Properties and Picosecond Fluorescence of Pea Chloroplasts 1021
- Ligase
 Application of Liquid Chromatography to a Study on 4-Coumarate: Coenzyme A Ligase Activity 197
- Lignin
 Incorporation of Chlorinated Anilines into Lignin 714
- Liliaceae
 Ferulic Acid-Sucrose Esters from Immature Anthers of *Tulipa* cv. "Apeldoorn" 721
- Liliopsida
 The Cyanogenic Glycoside of *Holcus mollis* (N) . . 336
- Linolenic Acid
 Effects of Linolenic Acid on the Spectral Properties and Picosecond Fluorescence of Pea Chloroplasts 1021
- Lipid and Fatty Acid Composition
 Light-Dependent Changes in the Lipid and Fatty Acid Composition of Phycocyanin-Free Photosynthetic Lamellae of *Synechococcus* . . . 856
- Lipid Peroxidation
 Stimulation of Wound Reactions in Potato Tubers by Thiabendazole 115
- Lipid Phase Transition
 Temperature Induced Changes in the Absorption Spectra of *Porphyridium cruentum* and *Anacystis nidulans* 1013
- Lipid Transition Temperature
 Different Protein Lipid Interaction in Human Red Blood Cell Membrane of Rh Positive and Rh Negative Blood Compared with Rh_{null} . . . 988
- Lipid Transport
 Lipid Labelling in Intact Chloroplasts from Exogenous Nucleotide Precursors 62
- Lipopolysaccharide
 Three Dimensional Structure of the Carbohydrate Moiety of a Lipopolysaccharide. Computer Calculations 71
- Liver Perfusion
 Titration of Rat Liver with Digitonin: a Well Defined Short Term Damage of Cellular Metabolism 880
- Lizard
 Life Cycle of *Sarcocystis* between Poikilothermic Hosts. Lizards are Intermediate Hosts for *S. podarcicolubris* sp. nov, Snakes Function as Definitive Hosts (N) 1093
- Localization
 Isolation and Partial Characterization of the Membrane-Bound NADH Dehydrogenase from the Phototrophic Bacterium *Rhodospseudomonas capsulata* 400
- Locusta migratoria*
 Inhibition of Oogenesis and Ovarian Ecdysteroid Synthesis by Azadirachtin in *Locusta migratoria migratorioides* (R. & F.) 466
- Long Spacing
 Fitting of SAXS-Curves by Nonlinear Regression 333
- Low Temperature
 Immobilization of Erythrocytes by Radiation Polymerization of Glass-Forming Monomers at Low Temperatures 1062
- Lung Cancer
 Ascorbate Oxidase and Its Possible Involvement in Cancer 804
- Luteolin
 Oxidation of Flavanones to Flavones with Flower Extracts of *Antirrhinum majus* (Snapdragon) . . 737
- Lymphatics
 Vascular Specialization in Fish, but No Evidence for Lymphatics (N) 490
- Lymphocyte Chalone
 Lymphocyte Chalone from Calf Thymus: Problems of Large Scale Extraction and Assay . . . 568
- Lymphocyte Responsiveness
 Lymphocyte Chalone from Calf Thymus: Problems of Large Scale Extraction and Assay . . . 568
- Maize
 Gaschromatographic, Mass- and Infrared-Spectrometric Identification of Cyclic Adenosine-3':5'-monophosphate (c-AMP) in Maize Seedlings (*Zea mays*) 193
- Majorana hortensis* M.
 On the Essential Oil Components from *Majorana hortensis* Moench 23
- Malate Synthase
 Electrophoretic and Chemical Studies on the X-Ray Damage of Malate Synthase 516
- Mammalian Type-C Viruses
 Purification of Murine and Feline Type-C Virus Envelope Polypeptides as Micellar Protein Complexes (N) 353
- Mandibular Glands
 Pheromone Bouquet of the Mandibular Glands in *Andrena haemorrhoa* F. (Hym., Apoidea) . . . 928
- Marine Diatoms
 Photosynthetic Assimilation of ¹⁵N-Ammonia and ¹⁵N-Nitrate in the Marine Diatoms *Bellerophon yucatanensis* (von Stosch) and *Skeletonema costatum* 193
- Mass-Spectrometry
 Gaschromatographic, Mass- and Infrared-Spectrometric Identification of Cyclic Adenosine-3':5'-monophosphate (c-AMP) in Maize Seedlings (*Zea mays*) 834
- The Kok Effect and Its Relationship to Photorespiration in Tobacco 450
- Dependence of Photorespiration and Photosynthetic Unit Sizes on Two Interdependent Nuclear Gene Factors in Tobacco 619
- Iroids in *Clerodendrum thomsonae* Balf. f., Verbenaceae 708

- Matthiola incana*
 Genetic Control of Chalcone Synthase Activity in Flowers of *Matthiola incana* R. Br. 662
 Anthocyanin Carrying Structures in Specific Genotypes of *Matthiola incana* R. Br. 925
- Media Effects
 Medium-Induced Formation of Indole Alkaloids and Concomitant Changes of Interrelated Enzyme Activities in Cell Suspension Cultures of *Catharanthus roseus* 40
- Membrane
 X-Ray Studies on Phospholipid Bilayers. I. Polymorphic Forms of Dimyristoyl Lecithin 875
- Membrane-Bound
 Molecular Forms of Purified Cytoplasmatic and Membrane Bound Bovine-Brain-Acetylcholinesterase Solubilized by Different Methods . . . 968
- Membrane Ghosts
 ATP Synthesis and Generation of Electrochemical Gradients of Proton in the Catecholamine Storage Organelle of the Adrenal Medulla . . 1056
- Membrane-Phloretin Interaction
 Interaction of Phloretin with the Human Red Cell Membrane and Membrane Lipids: Evidence from Infrared, Raman and ESR Spectroscopy 586
- Membrane Vesicles
 A H^+/Ca^{2+} Antiporter in Membranes of Microsomal Vesicles from Maize Coleoptiles, a Secondary Energized Ca^{2+} Pump 1099
- Mesophyll Protoplasts
 Distribution of Phenylalanine Ammonia-Lyase and 4-Coumarate: CoA Ligase in Oat Primary Leaf Tissues 389
- Metabolic Compartmentation
 Titration of Rat Liver with Digitonin: a Well Defined Short Term Damage of Cellular Metabolism 880
- Metabolism
 Carotenoids in the Stick Insect, *Ectatosoma tiaratum* Isolation of β,ϵ -Caroten-2-ol and β,ϵ -Caroten-2-one 755
- C_4 -Metabolism
 C_4 -Metabolism in Marine Brown Macrophytic Algae 840
- Methemoglobin
 Altered Heme Environments in Opossum and Rabbit Methemoglobins 964
- 1-Methyl-3-carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline
 Biosynthesis of 3-Carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline and 1-Methyl-3-carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline in a Callus Culture of *Stizolobium hassjoo* 921
- Methyl Corrinoids
 Coa/Co β -Isomerism of the Cobalt Methylated Corrinoids. CD and ORD Spectra of Several Isomer Pairs 497
- Methylation
 Methylation of 3',4' Di-OH C-Glucosylflavones in *Silene* (N) 486
- O-Methyltransferase
 Polymethylated Flavonols of *Chrysosplenium americanum*. I. Identification and Enzymatic Synthesis 730
- Micellar Complexes
 Purification of Murine and Feline Type-C Virus Envelope Polypeptides as Micellar Protein Complexes (N) 353
- Microbial Acylamino Acid Amido Hydrolase
 Co $^{+2}$ -Substituted Acylamino Acid Amido Hydrolase from *Aspergillus oryzae* 751
- Mode of Action
 The Effect of Clotrimazole and Triadimefon on 3-Hydroxy-3-Methyl-Glutaryl-CoA-Reductase-[EC 1.1.1.34] Activity in *Saccharomyces cerevisiae* 798
- Model *syn* and *anti* Conformations
 Solution Conformation of Benzimidazole Nucleosides with the Aid of Model Analogues . . 126
- Molecular Forms
 Molecular Forms of Purified Cytoplasmatic and Membrane Bound Bovine-Brain-Acetylcholinesterase Solubilized by Different Methods . . . 968
- Molecular Structures
 Influence of Crystal Packing Forces on Molecular Structure in 4-Thiouridine. Comparison of *anti* and *syn* Forms 956
- Monoclonal Antibodies
 An Evolutionary Tree Based on Monoclonal Antibody-Recognized Surface Features of a Plastid Enzyme (5-Aminolevulinate Dehydratase) 44
- Monoterpenes
 Volatile Terpenes from *Ceratocystis fimbriata* (N) 1075
- Morphology
 Binding of Polylysine and Ethidium Bromide to Nucleosomal DNA: Comparison of Biochemical and Electron Microscopical Results 149
- Mouse
 The Specific Labeling in Hypertonic Medium of a Spleen Protein (N) 183
 Thalidomide-Like Malformations Caused by a Tween Surfactant in Mice (N) 904
- Mushrooms
 Cadmium as a Growth Factor for the Mushroom *Agricus abruptibulbus* (Peck) Kauffmann . . . 765
- Mycelium
 Cadmium as a Growth Factor for the Mushroom *Agricus abruptibulbus* (Peck) Kauffmann . . . 765
- Myosin S1
 ^{18}O -Exchange by Hydrolyzing Enzymes: An *ab initio* Calculation 534
- NAD $^{+}$ -Model
 The Pressure Dependence of the Rotation of the N-Aralkylpyridinium Moiety in a Synthetic NAD $^{+}$ Model System Studied by High Pressure HRNMR 366
- NADH
 Pressure, Temperature and pH Dependence of the Absorption Spectrum of Reduced Nicotinamide Adenine Dinucleotide 84
- NADH Dehydrogenase
 Isolation and Partial Characterization of the Membrane-Bound NADH Dehydrogenase from the Phototrophic Bacterium *Rhodospseudomonas capsulata* 400
- ^{15}N -Labelled Amino Acids
 Photosynthetic Assimilation of ^{15}N -Ammonia and ^{15}N -Nitrate in the Marine Diatoms *Bel-lerocha yucatanensis* (von Stosch) and *Skeletonema costatum* 834
- Naphthoquinones
 The Inhibition of Photosynthetic Light Reactions by Halogenated Naphthoquinones 645

- Neural Coding
A Simple Coding Procedure Enhances a Neuron's Information Capacity (N) 910
- Neurosarcoma
Specific Positional Distribution of Acyl Moieties in Phospholipids is not Generally Deleted in Neoplastic Cells 81
- Nicotiana tabacum*
Effects of Glyphosate on Shikimic Acid Accumulation in Tobacco Cell Cultures with Low and High Yields of Cinnamoyl Putrescines 210
New Cembranoids from Burley Tobacco (N) 1077
- Nitrodiphenylethers
Multifunctional Mode of Action of Substituted Nitrodiphenylethers in *Scenedesmus* Cells 633
- Nitrogen Fixation
Molecular Characterization of Glutamine Synthetase from the Nitrogen-Fixing Phototrophic Bacterium *Rhodospseudomonas palustris* 246
- Nitrate
Nitrate Photo-Assimilation by the Phototrophic Bacterium *Rhodospseudomonas capsulata* E₁F₁ 1025
- Nitrate Reductase
Nitrate Photo-Assimilation by the Phototrophic *Rhodospseudomonas capsulata* E₁F₁ 1025
- Nitrite
Nitrate Photo-Assimilation by the Phototrophic Bacterium *Rhodospseudomonas capsulata* E₁F₁ 1025
- CNMR Data
On the Essential Oil Components from *Majorana hortensis* Moench 23
On the Essential Oil Components from *Artemisia absinthium* L. 369
- ³¹P-NMR
Preparation of 5',5''-Phosphate Linked Dinucleosides 135
¹⁸O-Exchange by Hydrolyzing Enzymes: An *ab initio* Calculation 534
¹⁸O-Exchange by Hydrolyzing Enzymes: Extension of the Model to P_i Molecules with Inequivalent Oxygen Atoms in the Bound State 539

Incorporation of [¹⁴C]Phenylalanine and [¹⁴C]Cinnamic Acid into Leaf Pieces and Mesophyll Protoplasts from Oat Primary Leaves for Studies on Flavonoid Metabolism at the Tissue and Cell Level 222
- Pseudomonas* sp.
7-Hydroxy Tropone from *Pseudomonas* sp. [1] 728
- Psoroma*
Pannaric Acid and Prophyritic Acid Methyl Ester Lichen Substances in the Genus *Psoroma* (N) 893
- Pterocarpan
Induction of Phytoalexin Synthesis in Soybean. Structure and Reactions of Naturally Occurring and Enzymatically Prepared Prenylated Pterocarpan from Elicitor-Treated Cotyledons and Cell Cultures of Soybean 234
- Pterosterone
Succulence - Induction in *Kalanchoe bloßfeldiana* under Long-Day Conditions by a Lipophyl Fraction out of Flowering Kalanchoe and MS-Identification of Pterosterone 465
- Pulmonary Tumors
Paramagnetic Changes in Pulmonary Tumors 5
- Ca²⁺ Pump
AH⁺/Ca²⁺ Antiporter in Membranes of Microsomal Vesicles from Maize Coleoptiles, a Secondary Energized Ca²⁺ Pump 1009
- Purification
Purification of Murine and Feline Type-C Virus Envelope Polypeptides as Micellar Protein Complexes 353
Isolation and Partial Characterization of the Membrane-Bound NADH Dehydrogenase from the Phototrophic Bacterium *Rhodospseudomonas capsulata* 400
- Pyridoxal 5'-Phosphate
Interactions between Tryptophan Synthase from *Escherichia coli* and Derivatives of the Coenzyme Pyridoxal 5'-Phosphate 778
- Pyrimidine Tracts
Physico-Chemical Characteristics of DNA Chromatin Fractions from Calf Thymus 361
- Pyrochlorophyllide a,
Chlorophyll Biosynthesis: Various Chlorophyllides as Exogenous Substrates for Chlorophyll Synthase 51

- Pyrones
Flavonoid Glycosides and Pyrones in *Aniba*
Species (Lauraceae) 385
- Pyropheophytin
Pyropheophytin a Accompanies Pheophytin a in
Darkened Light Grown Cells of *Euglena* 827
- Pyruvate Metabolism
In vivo Evidence for a Functional Glycolytic
Compartment in Synchronous Yeast Cells 615
- Quinone
Inhibition of Photosynthetic Electron Transport
by the Quinone Antagonist UHDBT 272
- Quinones and Quinonediarnines
Site of Action of 2,5-Dimethoxy-3,6-Dichloro-*p*-
Benzoquinone in the Photosynthetic Electron
Transport Chain 656
- Radiation Damage
Electrophoretic and Chemical Studies on the
X-Ray Damage of Malate Synthase 516
Radiation Damage to Polypeptides and Proteins
in the Solid State, II Radiolysis of Poly-L-Glu-
tamic Acid (N) 1091
- Radiation Damage to Proteins
Radiation Damage to Polypeptides and Proteins
in the Solid State: Changes in Amino Acid
Composition 310
- Radiation Polymerization
Immobilization of Erythrocytes by Radiation Po-
lymerization of Glass-Forming Monomers at
Low Temperatures 1062
- Raphanus*
Sinapine as a Supply of Choline for the Bio-
synthesis of Phosphatidylcholine in *Raphanus*
sativus Seedlings 215
- Rat
Titration of Rat Liver with Digitonin: a Well
Defined Short Term Damage of Cellular Metab-
olism 880
- Rat Hepatocytes
Effect of Glucocorticoids, Insulin and a Growth
Promoting Tripeptide on the Biosynthesis of
Plasma Proteins in Serum-Free Hepatocyte Cul-
tures (N) 350
- Reassociation
Reassociation of Lactic Dehydrogenase from Pig
Heart Studied by Cross-Linking with Glu-
taraldehyde 772
- Receptor Protein
Trypsin-Mediated Removal of Herbicide Bind-
ing Sites within the Photosystem II Complex . . 98
- Receptor Specificity
Receptor Specificity and Threshold Concentration
in Chemotaxis of the Phaeophyte *Cutleria multi-*
fida 262
- Reconstitution
Reassociation of Lactic Dehydrogenase from Pig
Heart Studied by Cross-Linking with Glu-
taraldehyde 772
- Red Light
Red Light Induced Change in the Saponin Con-
tent of Prolamellar Bodies in *Avena sativa* . . . 869
- Redox Potential
Is there an Equilibrium between Ascorbic and
Dehydroascorbic Acids? (N) 1088
- Regulation
Regulation of the Synthesis of Ribulose-1,5-
bisphosphate Carboxylase and Its Subunits in
the Flagellate *Chlorogonium elongatum*. II.
Coordinated Synthesis of the Large and Small
Subunits 942
- Reptilia
Direct Allosteric Interaction of Oxygen and Bi-
carbonate: N-Acetyl-alanyl-seryl-phenylalanine,
N-Terminal Sequence of the β -Chains of the
Haemoglobins of Nil Crocodile (*Crocodylus*
niloticus) and Mississippi Crocodile (*Alligator*
mississippiensis) (N) 902
- Resonance Frequency
Rotation of Cells in an Alternating Electric
Field: the Occurrence of a Resonance Frequency
Respiration 173
- Arrhenius Plots Indicate Localization of Photo-
synthetic and Respiratory Electron Transport in
Different Membrane Regions of *Anabaena* . . 1036
- Rhodopseudomonas capsulata*
Isolation and Partial Characterization of the
Membrane-Bound NADH Dehydrogenase from
the Phototrophic Bacterium *Rhodopseudomonas*
capsulata 400
Molecular and Kinetic Characterization of Xan-
thine Dehydrogenase from the Phototrophic
Bacterium *Rhodopseudomonas capsulata* 932
Nitrate Photo-Assimilation by the Phototrophic
Bacterium *Rhodopseudomonas capsulata* E₁F₁ . 1025
- Rhodopseudomonas palustris*
Molecular Characterization of Glutamine Syn-
thetase from the Nitrogen-Fixing Phototrophic
Bacterium *Rhodopseudomonas palustris* 246
Regulatory Properties of Glutamine Synthetase
from the Nitrogen-Fixing Phototrophic Bacteri-
um *Rhodopseudomonas palustris* 784
- Rhodopseudomonas sphaeroides*
In Vivo Control of Glutamine Synthetase in the
Facultative Phototrophic Bacterium *Rhodo-*
pseudomonas sphaeroides 407
- Ribulose-1,5-bisphosphate Carboxylase
Regulation of the Synthesis of Ribulose-1,5-
bisphosphate Carboxylase and Its Subunits in
the Flagellate *Chlorogonium elongatum*. II.
Coordinated Synthesis of the Large and Small
Subunits 942
- Robinia pseudoacacia*
The *Para*-O-Methylation of Apigenin to
Acacetin by Cell-Free Extracts of *Robinia*
pseudoacacia L. 916
- Rumex*
"Yellow Flavonols" as Components of Pollen
Pigmentation 204
- Ruta graveolens*
Rutacridone-epoxide, a New Acridone Alkaloid
from *Ruta graveolens* 200
- Rutaceae
Rutacridone-epoxide, a New Acridone Alkaloid
from *Ruta graveolens* 200
- Rutacridone-Epoxide
Rutacridone-epoxide, a New Acridone Alkaloid
from *Ruta graveolens* 200
- Salmine
Protamines. VII. Circular Dichroism Study of
Salmine A I 305
- Salts
Discrimination of Two Fusogenic Properties of
Aqueous Polyethylene Glycol Solutions 593

- Saponin
Red Light Induced Change in the Saponin Content of Prolamellar Bodies in *Avena sativa* . . . 869
- Sarcocystis*
Life Cycle of *Sarcocystis* between Poikilothermic Hosts. Lizards are Intermediate Hosts for *S. podarcolubris* sp. nov., Snakes Function as Definitive Hosts . . . 1093
- Sarcoma 180
Specific Positional Distribution of Acyl Moieties in Phospholipids is not Generally Deleted in Neoplastic Cells . . . 81
- Satellite DNA Evolution
A Family of Sequences with Regional Homology to Bovine 1.715 Satellite DNA . . . 973
- 1.715, 1.711b Satellite DNAs
A Family of Sequences with Regional Homology to Bovine 1.715 Satellite DNA . . . 973
- Secondary Structure Prediction
Protamines. VII. Circular Dichroism Study of Salmine A I . . . 305
- Senecio cruentus*
 $\alpha\beta$ -Dehydrocurvularin and Curvularin from *Alternaria cinerariae* (N) . . . 1081
- Sensitivity Threshold
Receptor Specificity and Threshold Concentration in Chemotaxis of the Phaeophyte *Cutleria multifida* . . . 262
- Sex Pheromone
A Sex Attractant for *Sperchia intractana* Walker (Lepidoptera: Tortricidae) in New Zealand (N) . 178
Drosophila Males Produce a Pheromone which Inhibits Courtship . . . 694
- Sexual Behavior
Drosophila Males Produce a Pheromone which Inhibits Courtship (N) . . . 694
- Shikimic Acid
Effects of Glyphosate on Shikimic Acid Accumulation in Tobacco Cell Cultures with Low and High Yields of Cinnamoyl Putrescines . . 210
- Signal-Receptor
Receptor Specificity and Threshold Concentration in Chemotaxis of the Phaeophyte *Cutleria multifida* . . . 262
- Silene*
Structure and Biosynthesis of Vitexin 2''-O-Xyloside in *Silene alba* (N) . . . 484
Methylation of 3',4' Di-OH C-Glycosylflavones in *Silene* (N) . . . 486
- Sinapine
Sinapine as a Supply of Choline for the Biosynthesis of Phosphatidylcholine in *Raphanus sativus* Seedlings . . . 215
- Sinapis alba*
Radioactively Labelled Phytic Acid from Maturing Seeds of *Sinapis alba* . . . 383
- Small Angle X-Ray Diffraction
Fitting of SAXS-Curves by Nonlinear Regression (N) . . . 333
- Solanaceae
New Cembranoids from Burley Tobacco (N) . . 1077
- Solanum tuberosum* L.
Stimulation of Wound Reactions in Potato Tubers by Thiabendazole . . . 115
- Solid State Radiolysis
Radiation Damage to Polypeptides and Proteins in the Solid State: Changes in Amino Acid Composition . . . 310
- Soybean
Induction of Phytoalexin Synthesis in Soybean. Structure and Reactions of Naturally Occurring and Enzymatically Prepared Prenylated Pterocarpans from Elicitor-Treated Cotyledons and Cell Cultures of Soybean . . . 234
- CD Spectra
Coa/Co β -Isomerism of the Cobalt Methylated Corrinoids. CD and ORD Spectra of Several Isomer Pairs . . . 497
- ORD Spectra
Coa/Co β -Isomerism of the Cobalt Methylated Corrinoids. CD and ORD Spectra of Several Isomer Pairs . . . 497
- Spectroscopy
Chromophore Content and Molar Absorptivity of Phytochrome in the P_r Form . . . 431
- Sperchia intractana*
A Sex Attractant for *Sperchia intractana* Walker (Lepidoptera: Tortricidae) in New Zealand (N) . 178
- Spin Concentration
Paramagnetic Changes in Pulmonary Tumors . 5
On a Possible Mechanism of Action of Interferon . 323
- Spin State
Altered Heme Environments in Opossum and Rabbit Methemoglobins . . . 964
- Spinach
The Permeability Coefficients of the Plasmalemma and the Chloroplast Envelope of Spinach Mesophyll Cells for Phytohormones . . . 672
- Spinach Chloroplast Lamellae
Isolation and Identification of an Oxygen Reducing Factor (ORF) from Isolated Spinach Chloroplast Lamellae . . . 284
- Spinacea oleracea*
"Yellow Flavonols" as Components of Pollen Pigmentation
Properties and Subcellular Localization of L-Alanine: Aldehyde Aminotransferase: Concept of an Ubiquitous Plant Enzyme Involved in Secondary Metabolism . . . 625
- Spiroacetals
Pheromone Bouquet of the Mandibular Glands in *Andrena haemorrhoa* F. (Hym., Apoidea) . . 928
- Spleen
The Specific Labeling in Hypertonic Medium of a Spleen Protein (N) . . . 183
- Spodoptera littoralis*
Fatty Acid Composition of Eggs during Development of the Cotton Leaf-Worm, *Spodoptera littoralis* Boisduval . . . 562
- Springene
Mammalian Pheromone Studies, IV. Terpenoid Compounds and Hydroxy Esters from the Dorsal Gland of the Springbok, *Antidorcas marsupialis* (N) . . . 340
- Stability of Chlorophylls
Light-Induced Accumulation and Stability of Chlorophylls and Chlorophyll-Proteins during Chloroplast Development in Radish Seedlings . 421
- Steroidal
High Performance Liquid Chromatographic Analysis of Steroidal Saponins from *Avena sativa* L. 1072
- Sterol Biosynthesis
The Effect of Clotrimazole and Triadimefon on 3-Hydroxy-3-Methyl-Glutaryl-CoA-Reductase-[EC 1.1.1.34] Activity in *Saccharomyces cerevisiae* . 798

- Sterylglucosides
Initial Phases of Growth Induced by Sterylglucosides and Indole-3-acetic Acid in *Avena Coleoptiles* (N) 900
- Stick Insects
Carotenoids in the Stick Insect, *Ectatosoma tiaratum* Isolation of β,ϵ -Caroten-2-ol and β,ϵ -Caroten-2-one 755
- Stizolobium hassjoo*
Biosynthesis of 3-Carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline and 1-Methyl-3-carboxy-6,7-dihydroxy-1,2,3,4-tetrahydroisoquinoline in a Callus Culture of *Stizolobium hassjoo* 921
- Strain Specificity
Volatile Terpenes from *Ceratocystis fimbriata* (N) 1075
- Strictosidine Synthase
Medium-Induced Formation of Indole Alkaloids and Concomitant Changes of Interrelated Enzyme Activities in Cell Suspension Cultures of *Catharanthus roseus* 40
- Stridulation
An Audiospectrographic Study of Male Stridulation in the Genus *Corixa* Geoffr. (Hemiptera, Corixidae) 189
- Structure
Three Dimensional Structure of the Carbohydrate Moiety of a Lipopolysaccharide. Computer Calculations 71
- Subcellular Localization
Properties and Subcellular Localization of L-Alanine: Aldehyde Aminotransferase: Concept of an Ubiquitous Plant Enzyme Involved in Secondary Metabolism 625
- Subunits
Regulation of the Synthesis of Ribulose-1,5-bisphosphate Carboxylase and Its Subunits in the Flagellate *Chlorogonium elongatum*. II. Coordinated Synthesis of the Large and Small Subunits 942
- Succulence
Succulence - Induction in *Kalanchoe blofeldiana* under Long-Day Conditions by a Lipophyle Fraction out of Flowering *Kalanchoe* and MS-Identification of Pterosterone 465
- Sucrose
Ferulic Acid-Sucrose Esters from Immature Anthers of *Tulipa* cv. "Apeldoorn" 721
- Sulphonyl Group Incorporation
In Vitro Biosynthesis of the Plant Sulpholipid: On the Origin of the Sulphonate Group 820
- Surface Enhanced Raman Scattering
Hydrogen-Deuterium Exchange in Adenosine 5'-Monophosphate Detected by Surface Enhanced Raman Scattering (SERS) 809
- Suspension Cultures
Effects of Glyphosate on Shikimic Acid Accumulation in Tobacco Cell Cultures with Low and High Yields of Cinnamoyl Putrescines 210
- Synchrotron X-Ray
Fitting of SAXS-Curves by Nonlinear Regression 333
- Synchronous Yeast
In vivo Evidence for a Functional Glycolytic Compartment in Synchronous Yeast Cells 615
- Synechococcus*
Light-Dependent Changes in the Lipid and Fatty Acid Composition of Phycocyanin-Free Photosynthetic Lamellae of *Synechococcus* 856
- Ultrastructure of Differently Pigmented *Synechococcus* Cells (N) 907
- Synthesis
Regulation of the Synthesis of Ribulose-1,5-bisphosphate Carboxylase and Its Subunits in the Flagellate *Chlorogonium elongatum*. II. Coordinated Synthesis of the Large and Small Subunits 942
- Synthesis of Halogeno Analogues
Solution Conformation of Benzimidazole Nucleosides with the Aid of Model Analogues 126
- Synthetase
A Thioredoxin Activated Glutamine Synthetase in *Chlorella* 396
- Taphozous melanopogon*
Effect of Lithium Chloride on the Circadian Rhythm in the Flight Activity of the Microchiropteran Bat, *Taphozous melanopogon* 1068
- Teleosts
Are Yolk Phosvitins Carriers for Specific Cations? Comparative Microanalysis in Vertebrate Yolk Platelets (N) 686
- Teratogenicity
Thalidomide-Like Malformations Caused by a Tween Surfactant in Mice (N) 904
- Terpenes
On the Essential Oil Components from *Majorana hortensis* Moench 23
On the Essential Oil Components from *Artemisia absinthium* L. 369
On the Composition of the Essential Oil from *Artemisia dracuncululus* L. during the Vegetation Period 724
- Terpenoids
Mammalian Pheromone Studies, IV. Terpenoid Compounds and Hydroxy Esters from the Dorsal Gland of the Springbok, *Antidorcas marsupialis* (N) 340
- Territorial Marking
Mammalian Pheromone Studies, V. Compounds from the Preorbital Gland of the Grysbok, *Raphicerus melanotis* (N) 344
- 11-Tetradecenyl Acetate
A Sex Attractant for *Sperchia intractana* Walker (Lepidoptera: Tortricidae) in New Zealand 178
- Teucardosid
Iridoids in Some *Teucrium* and *Ajuga* Species 697
- Teucrium
Iridoids in Some *Teucrium* and *Ajuga* Species 697
- Thalidomide-like Malformations
Thalidomide-Like Malformations Caused by a Tween Surfactant in Mice (N) 904
- Thermoluminescence
Reinvestigation of the Effects of Disalicylidenepropanediamine (DSPD) and 2-Heptyl-4-hydroxyquinoline-N-oxide (HQNO) on Photosynthetic Electron Transport 109
Two Sites of Inhibition of the Photosynthetic Electron Transport Chain by the Herbicide Trifluralin 853
- Thiabendazole
Stimulation of Wound Reactions in Potato Tubers by Thiabendazole 115
- Thioredoxin
A Thioredoxin Activated Glutamine Synthetase in *Chlorella* 396

- 4-Thiouridine
Influence of Crystal Packing Forces on Molecular Structure in 4-Thiouridine. Comparison of *anti* and *syn* Forms 956
- Thylakoid Composition
Partition of Phylloquinone K₁ between Digaltonin Particles and Chlorophyll-Proteins of Chloroplast Membranes from *Nicotiana tabacum* 276
- Thylakoid Membrane
Which Polypeptides Are Characteristic for Photosystem II? Analysis of Active Photosystem II Particles from the Blue-Green Alga *Anacystis nidulans* 295
- Thylakoids
Esterification of Chlorophyllide in Prolamellar Body (PLB) and Prothylakoid (PT) Fractions from *Avena sativa* Etioplasts 58
Comparative Binding of Photosystem II - Herbicides to Isolated Thylakoid Membranes and Intact Green Algae 1041
- Tobacco Mutants
The Kok Effect and Its Relationship to Photorepiration in Tobacco 450
Dependence of Photorespiration and Photosynthetic Unit Sizes on Two Interdependent Nuclear Gene Factors in Tobacco 662
- Tortricidae
A Sex Attractant for *Sperchia intractana* Walker (Lepidoptera: Tortricidae) in New Zealand (N) 178
- Tracking
Courtship-Like Tracking Behaviour in Wild-Type Female *Drosophila melanogaster* 475
- Transcarboxylase
Evidence for a Transcarboxylase Reaction in Maize Chloroplast Extracts (N) 688
- Transplantable Tumours
Intracellular Effect of Hydroxyalkenals on Animal Tumours 572
- Trichoplax*
DNA Content and Fragmentation of the Egg Nucleus of *Trichoplax adhaerens* 564
- Trifluralin
Two Sites of Inhibition of the Photosynthetic Electron Transport Chain by the Herbicide Trifluralin 853
- 1,2,4-Trihydroxybenzene
Metabolites of 1,2,4-Trihydroxybenzene from Fruiting Bodies of *Gomphidius maculatus* and *G. glutinosus* (Boletales) [1] (N) 488
- Tropic Acid Biosynthesis
Chemical Synthesis of α -Formylphenylacetic Acid, the Postulated Precursor of Tropic Acid 611
- Tryptophan Decarboxylase
Medium-Induced Formation of Indole Alkaloids and Concomitant Changes of Interrelated Enzyme Activities in Cell Suspension Cultures of *Catharanthus roseus* 40
- Tryptophan Synthase
Interactions between Tryptophan Synthase from *Escherichia coli* and Derivatives of the Coenzyme Pyridoxal 5'-Phosphate 778
- Tulipa*
Purification of Chalcone Synthase from Tulip Anthers and Comparison with the Synthase from *Cosmos* Petals 30
Ferulic Acid-Sucrose Esters from Immature Anthers of *Tulipa* cv. "Apeldoorn" 721
- UDP-Galactose
Lipid Labelling in Intact Chloroplasts from Exogenous Nucleotide Precursors 62
- Ultrastructure
Ultrastructure of Differently Pigmented *Synechococcus* Cells (N) 907
- ¹⁸O₂-Uptake
The Kok Effect and Its Relationship to Photorepiration in Tobacco 450
- Urease
Location of Several Enzyme of L-Arginine Catabolism in *Evernia prunastri* Thallus (N) 692
- Urodele Lateral Line System
Electroreceptors and Direction Specific Arrangement in the Lateral Line System of Salamanders? (N) 493
- L-Usnic Acid
Purification and Properties of a New Enzyme from *Evernia prunastri*, which Reduces L-Usnic Acid 35
- Usnic Acid Dehydrogenase
Purification and Properties of a New Enzyme from *Evernia prunastri*, which Reduces L-Usnic Acid 35
- Vanadate
Effect of Vanadate and Iron Stress on the Pigment Composition of *Chlorella Fusca* 207
- Vascular Tissue
Distribution of Phenylalanine Ammonia-Lyase and 4-Coumarate: CoA Ligase in Oat Primary Leaf Tissues 389
- Vectors
Oviposition Deterrence Activity in Some Lamiaceae Plants against Some Insect Pests 122
- Vision
Action Potentials in "Non-Spiking" Visual Interneurons 470
- Vitamin B₁₂
About the Iron Analogues of Cobalamin and Cobyric Acid 9
CoA/Co β -Isomerism of the Cobalt Methylated Corrinoids. CD and ORD Spectra of Several Isomer Pairs 497
X-Ray Crystal Structure Analysis of Factor A (2-Methyladeninyl-cyanocobamide), a Native Vitamin B₁₂-Analogue 506
Vitamin B₁₂-factor A (2-Methyladeninyl-cyanocobamide)
X-Ray Crystal Structure Analysis of Factor A (2-Methyladeninyl-cyanocobamide), a Native Vitamin B₁₂-Analogue 506
- Vitexin
Structure and Biosynthesis of Vitexin 2''-O-Xyloside in *Silene alba* (N) 484
- Volatile Metabolites
Volatile Terpenes from *Ceratocystis fimbriata* (N) 1075
- Waterbug
An Audiospectrographic Study of Male Stridulation in the Genus *Corixa* Geoffr. (Hemiptera, Corixidae) (N) 189
- Wound Reactions
Stimulation of Wound Reactions in Potato Tubers by Thiabendazole 115

- X-Ray Crystal Structure Analysis
 X-Ray Crystal Structure Analysis of Factor A
 (2- Methyladeninyl-cyanocobamide), a Native
 Vitamin B₁₂-Analogue 506
- X-Ray Diffraction
 X-Ray Studies on Phospholipid Bilayers. I. Poly-
 morphic Forms of Dimyristoyl Lecithin 875
- Xanthine Dehydrogenase
 Molecular and Kinetic Characterization of Xan-
 thine Dehydrogenase from the Phototrophic
 Bacterium *Rhodospseudomonas capsulata* 933
- 2''-O-Xyloside
 Structure and Biosynthesis of Vitexin 2''-O-Xylo-
 side in *Silene alba* (N) 484
- Yeast
 Initiation of Protein Synthesis in Yeast: Binding
 of Met-tRNA_i 142
In vivo Evidence for a Functional Glycolytic
 Compartment in Synchronous Yeast Cells 615
- Zea mays*
 AH⁺/Ca²⁺ Antiporter in Membranes of
 Microsomal Vesicles from Maize Coleoptiles, a
 Secondary Energized Ca²⁺ Pump 1009
- Zinc
 Cadmium as a Growth Factor for the Mushroom
Agaricus abruptibulbus (Peck) Kauffmann 765
