

Index of Volume 7 (1987)

Number 1

Alfred M. Grundland and Bohdan Lawruk

Involutivity conditions for Riemann invariants 1

Yasutaka Sibuya

Analytizations of $D(A)$ -modules 33

Ekkehard Wagenführer

On meromorphic transformations reducing the Poincaré rank of a linear differential equation at a singular point 47

M. G. Murge and B. G. Pachpatte

On Itô type stochastic functional integral equation in two independent variables 71

Martin Fuchs

Regularity theorems for nonlinear systems of partial differential equations under natural ellipticity conditions 83

Kamel Betina

Mesure de l'irrégularité globale des opérateurs différentiels ordinaires 95

Number 2

F. Moricz and B. E. Rhoades

Approximation to continuous functions by triangular summability methods 113

Daniel Girela

BMO , A_2 -weights and univalent functions 129

H. Bor and B. Thorpe

On some absolute summability methods 145

Simson Baron

Certain constructive spaces and multipliers of double Fourier series 153

Aurel Cornea and Sirkka-Liisa Eriksson

Order continuity of the greatest lower bound of two functionals 173

Hüseyin Bor

On absolute summability factors 185

J. Steinebach

Note on a limit theorem for characteristic functions 195

Wolfgang Gawronski and Ulrich Stadtmüller

On the asymptotic distribution of zeros of $\sum_{n=1}^{\infty} (1-c^n)^x z^n$ 205

Number 3/4

Dieter Baum

Bemerkungen zur Halbachsenfunktion 221

Helmut Braß and Klaus-Jürgen Förster

On the Estimation of linear functionals 237

Volker Vogelsang

Absence of embedded eigenvalues of the Dirac equation for long range potentials 259

Eberhard Malkowsky

Klassen von Matrixabbildungen in paranormierten FK-Räumen 275

Martin Buntinas

Products of sequence spaces 293

J. Appell and P. P. Zabrejko

On the degeneration of the class of differentiable superposition operators in function spaces 305

Nira Dyn, Alan Edelman, and Charles A. Micchelli

On locally supported basis functions for the representation of geometrically continuous curves 313

Bruce Watson

A Tauberian Theorem between generalized Logarithmic and Abel-type summability methods 343

J. Szabados

On the convergence of the derivatives of projection operators 349

Friedmar Schulz and Graham Williams

Barriers and existence results for a class of equations of mean curvature type 359

Norbert Steinmetz

On the zeros of $(f^{(p)} + a_{p-1} f^{(p-1)} + \dots + a_0 f)f$ 375

Hans-Heinrich Körle

On the Nörlund means generated by real powers of n 391

Author Index of Volume 7 405
