

Index of Volume 10 (1990)

Number 1

Do Ba Khang

On a class of accretive operators 1

Thomas Maxsein

Potenzreihen mit additiven Koeffizienten 17

Hermann Schmitz

A proof of the Toeplitz-Schur theorem based on the norm boundedness of weakly bounded sets 23

Dominikus Noll

Toeplitz sections and the Wilansky property 27

Ouaqqa Abderrahmane

Noyau et image de la transformation définie par intégration sur les droites de $\mathbb{P}_3(\mathbb{C})$ ne rencontrant pas une droite donnée 45

P. Erdős, Th. Maxsein und P. R. Smith

Primzahlpotenzen in rekurrenten Folgen 71

Eberhard U. Stickel

An algorithm for fast high precision computation of matrix exponential and logarithm 85

B. E. Rhoades

Corrigendum to: Generalized harmonic summability of a sequence of Fourier coefficients. (Analysis 4, 323-334 (1984)) 97

Number 2/3

R. Gérard and D. A. Lutz

Convergent factorial series solutions of singular operator equations 99

Ralitza Kovacheva

Diagonal rational Chebyshev approximants and holomorphic continuation of functions 147

Walter Bergweiler

Maximum modulus, characteristic, and area on the sphere 163

David H. Armitage and Ivor J. Maddox

Discrete Abel means 177

Nikolaos Danikas

On the multiplicative behaviour of normal functions 187

Frank Duzaar und Martin Fuchs

Existenz und Regularität von Hyperflächen mit vorgeschriebener mittlerer Krümmung 193

Tran Duc Van, R. Gorenflo and Le Van Hap

Sobolev-Orlicz spaces of infinite order and nonlinear differential equations 231

Stephen Y. Zheng

4π Uniqueness theorem for curved polygons 247

Steven B. Bank

On the oscillation of solutions of non-homogeneous linear differential equations 265

Horst Alzer

On an extension of Leibniz' product rule 295

Number 4

Joachim Herzog

On partitions into distinct parts $\geq Y$ 301

Hans-Heinrich Körle

Cesàro limitability by Tauberian conclusions 313

Binyamin Schwarz

On the geometry of some matrix domains 319

Patricio Gonzalez

Dimension of the vector space of analytic solutions of certain singular differential equations 337

Jeff Connor

Two valued measures and summability 373

He Yuzan and Ilpo Laine

The Hayman-Miles theorem and the differential equation $(y')^n = R(z, y)$ 387

Martin Wießner

A concept of regularity for summability of Dirichlet series 397

Wolfgang Lauf

Connectedness and local compactness in the automorphism space $\Sigma(G)$ 415
