

Index of Volume 14 (1994)

Number 1

<i>Knut Petras</i>	
High order error constants of Clenshaw-Curtis product rules	1
<i>Hui-Hui Dai</i>	
On the general asymptotic expansions of $H_\nu^{(1)}$ -transform and related Bessel transforms	19
<i>N. Parhi, M. Kirane</i>	
Oscillatory behaviour of solutions of coupled hyperbolic differential equations	43
<i>B. Kuttner, B. Thorpe</i>	
Translativity of some absolute summability methods	57
<i>Raymond Mortini</i>	
Ideals generated by interpolating Blaschke products	67
<i>Harold G. Diamond, H. Halberstam, H.-E. Richert</i>	
Estimation of the sieve auxiliary functions q_κ in the range $1 < \kappa < 2$	75

Number 2/3

<i>Eberhard U. Stickel</i>	
A splitting method for the calculation of the matrix exponential	103
<i>Víctor H. Cortés, Patricio González</i>	
Levinson's theorem for impulsive differential equations	113
<i>David H. Armitage, Ciaran S. Nelson</i>	
The growth of superharmonic functions on sets of parallel lines	127
<i>Friedmar Schulz</i>	
Asymptotic expansions for solutions of elliptic differential inequalities	139
<i>Zhang Nan-Yue, Kenneth S. Williams</i>	
Some results on the generalized Stieltjes constants	147
<i>J. L. Geluk</i>	
Asymptotic behaviour of the convolution tail of distributions each having a first or second order regularly varying tail	163

<i>Marcus Jankowski</i> An estimate for the logarithmic derivative of meromorphic functions	185
<i>Gerhard Baur</i> Asymptotics for the α -integral	197
<i>Nikolai Botkin</i> Approximation schemes for finding the value functions for differential games with nonterminal payoff functional	203
<i>Wen Rong Li</i> On the transcendency of functions	221
<i>T. F. Xie, S. P. Zhou</i> On certain trigonometric series	227
<i>Garyfalos Papaschinopoulos</i> Exponential dichotomy, topological equivalence and structural stability for differential equations with piecewise constant argument	239
<i>Peter Rusev</i> Complete systems of Jacobi associated functions in spaces of holomorphic functions	249
<i>Ekkehard Krätzel, Dieter Wolke</i> Über die Anzahl der abelschen Gruppen gegebener Ordnung	257
<i>Weiyu Chen</i> Strong converse inequality for the F operators	267
<i>Bernard Klares</i> Linear differential system: Study at a pole of order one	281
<i>A. Bentrad</i> Probleme de Cauchy caracteristique à données singulières. Unicité et non unicité de la solution	303

Number 4

<i>J. Connor, J. Fridy, J. Kline</i> Statistically pre-Cauchy sequences	311
<i>A. Kroó, J. Szabados</i> Constructive properties of self-reciprocal polynomials	319

*D. S. Lubinsky, A. Sidi*Strong asymptotics for polynomials biorthogonal to powers of $\log x$ 341*Gerhard Ströhmer*Partially regular weak solutions for a system of equations modeling
liquid crystal motion 381*Ben Schweizer*

Global solutions of quasilinear wave equations and stability of minimal surfaces 393

Valdir A. Menegatto

Interpolation on spherical domains 415

Chen Zong-xuan

Zeros of meromorphic solutions of higher order linear differential equations 425

Author Index of Volume 14 439

Analysis

Volume 14 · Issue 4 · 1994

<i>J. Connor, J. Fridy, J. Kline</i> Statistically pre-Cauchy sequences	311
<i>A. Kroó, J. Szabados</i> Constructive properties of self-reciprocal polynomials	319
<i>D. S. Lubinsky, A. Sidi</i> Strong asymptotics for polynomials biorthogonal to powers of $\log x$	341
<i>Gerhard Ströhmer</i> Partially regular weak solutions for a system of equations modeling liquid crystal motion	381
<i>Ben Schweizer</i> Global solutions of quasilinear wave equations and stability of minimal surfaces ..	393
<i>Valdir A. Menegatto</i> Interpolation on spherical domains	415
<i>Chen Zong-xuan</i> Zeros of meromorphic solutions of higher order linear differential equations	425
