

Analysis

Volume 15 · Issue 1 · 1995

Harold G. Diamond, H. Halberstam, H.-E. Richert

Monotonicity of the zero of the sieve auxiliary function $\tilde{\chi}_\kappa$ in the range $3/2 < \kappa < 2$ 1

Ha Huy Bang

A property of entire functions of exponential type 17

Thomas Töpfer

Arithmetical properties of functions satisfying q -difference equations 25

Thomas Sturzenhecker

L^∞ -estimates for capillary surfaces 51

Norio Yoshida

Forced oscillations of nonlinear parabolic equations with functional arguments 71

Erhard Heinz

Über Ungleichungen von T. Radó 85

Jürgen Appell, Alois Kufner

On the two-dimensional Hardy operator in Lebesgue spaces with mixed norms 91
