

Analysis

Volume 16 • Issue 2 • 1996

<i>Ekkehard Krätzel</i> Double exponential sums	109
<i>Ferenc Móricz</i> The maximal Fejér operator is bounded from $H^1(T)$ into $L^1(T)$	125
<i>Iulius Borcea</i> The Sendov conjecture for polynomials with at most seven distinct zeros	137
<i>Garyfalos Papaschinopoulos</i> A linearization result for a differential equation with piecewise constant argument	161
<i>Rong Yuan, Jialin Hong</i> Almost periodic solutions of differential equations with piecewise constant argument	171
<i>Peter Köhler</i> A reduction method for linear functionals and its applications	181
<i>S. Baron, E. Liflyand, M. Skopina</i> On the summability of double Fourier series at a point	195
<i>Vladimir Umanskiy</i> An estimate of the integral $\int_a^b u'(x) v(x) dx$ with Hölder continuous functions $u(x)$ and $v(x)$	207
