

Analysis

Volume 22 · Issue 3 · 2002

<i>M. Obradović, S. Ponnusamy, V. Singh and P. Vasundhra</i> Univalence, starlikeness and convexity applied to certain classes of rational functions	225
<i>B. Fritzsche, B. Kirstein and A. Lasarow</i> On Schwarz-Pick-Potapov block matrices of matrix-valued functions which belong to the extended Potapov class	243
<i>Mursaleen and O. H. H. Edely</i> On some statistical core theorems	265
<i>H. Alzer and S. Ruscheweyh</i> The arithmetic mean – geometric mean inequality for complex numbers	277
<i>R. Garunkštis, A. Laurinčikas, R. Šleževičienė, J. Steuding</i> On the universality of Estermann zeta-functions	285
<i>H. Linden</i> Containment regions for zeros of analytic functions	297
