

Analysis

Volume 23 • Issue 1 • 2003

F. Móricz

Determination of jumps in terms of the Abel-Poisson mean of partially conjugate series..... 1

A. Laurinćikas, W. Schwarz, J. Steuding

The universality of general Dirichlet series..... 13

D. A. Herron, S. Yang

Quasixtremal distance sets..... 27

D. M. Israfilov

Uniform convergence of Bieberbach polynomials in closed Radon domains..... 51

M. E. Andersson

The Kaufman-Rickert inequality governs Rademacher sums..... 65

Z. Lou

Composition operator on Bloch type spaces..... 81

H. Volkmer

Coexistence of periodic solutions of Ince's equation..... 97
