

Index of Volume 8 (1990)

Number 1

G. Meeden

Admissible contour credible sets 1

H. Strasser

Global extrapolation of local efficiency 11

N. Pal, B. K. Sinha

Estimation of a common location of several exponentials 27

J. Eichenauer-Herrmann, W. Gohout, J. Lehn

Minimax estimation of a binomial probability under weighted absolute error loss 37

J. Pilz

Minimax linear estimation for fitting biased response surfaces 47

J. Hanousek

Robust Bayesian type estimators and their asymptotic representation 61

M. Sobel

Nonparametric loss functions for partitioning problems 71

J. Shao

Limiting behavior of Monte Carlo approximation to Bayesian action 85

Number 2

K. Hornik

Exponential rate optimal estimation of the generator of a finite Markov process 101

F. Konecny

Maximum likelihood estimation of a drift parameter from a partially observed diffusion in the case of small measurement noise 115

M. Bilodeau

On the choice of the loss function in covariance estimation 131

D. K. Dey, M. Ghosh, C. Srinivasan

A new class of improved estimators of a multinormal precision matrix 141

R.-D. Reiss

Asymptotic independence of marginal point processes of exceedances 153

F. C. Drost, W. C. M. Kallenberg, J. Oosterhoff
The power of EDF tests of fit under non-robust estimation
of nuisance parameters 167

C. Genest, S. Weerahandi, J. V. Zidek
Conditionalization and likelihood dominance in group
belief formation 183

Book Reviews 199

Number 3

L. Kuo, D. K. Dey
On the admissibility of the linear estimators of the Poisson
mean using linex loss functions 201

J. E. Alcaraz
The minimax estimation of Poisson means with the variational
form of a restricted Bayes estimator 211

P. Lahiri, R. C. Tiwari
Empirical Bayes rank order estimation with the Dirichlet
prior 231

A. K. Gupta, K. Krishnamoorthy
Improved estimators of eigenvalues of $\Sigma_1 \Sigma_2^{-1}$ 247

E.-E. A. A. Aly
Testing exponentiality against IFRA or NBU alternatives with
type II censored data 265

W. Schmid
Discussion of a LR test for detecting outliers in time
series data 271

Book Reviews 295

Number 4

M. Ghosh, Li Chu Lee, R. C. Littell
Empirical and hierarchical Bayes estimation
of the response function 299

N. Mukhopadhyay, M. Moreno
Comparing several populations by means of
accelerated sequential procedures 331

P. Laippala
Single decision approximation in empirical
Bayes sequential rules 357
