

Index of Volume 9 (1991)

Number 1/2

K.-S. Mak, A. L. Rukhin

Adaptive tests and optimal exponential rates of error probabilities 1

L. Horváth, R. A. Johnson

Tests of fit for composite hypotheses with censored data 21

S. Datta

Nonparametric empirical Bayes estimation with $O(n^{-1/2})$ rate of a truncation parameter 45

A. E. Gelfand, D. K. Dey

On Bayesian robustness of contaminated classes of priors 63

D. Sengupta

On shrinkage towards an arbitrary estimator 81

R. Magiera

Admissible sequential estimators of ratios between two linear combinations of parameters of exponential-type processes 107

M. Calvo, J. M. Oller

An explicit solution of information geodesic equations for the multivariate normal model 119

L. Rüschendorf

Identifiability of transformed observations 139

B. L. Granovsky

Admissibility of Monte Carlo procedures 151

M. T. Wells

ε -Solutions of minimization problems in statistics 177

Z. Shi

Empirical process of U-statistic structure 181

Book Reviews 197

Number 3

El Sayed Sorour

A dynamic Kiefer-Wolfowitz stochastic approximation procedure 201

TaChen Liang

Empirical Bayes selection for the highest success probability in Bernoulli processes with negative binomial sampling 213

H. L. Koul, P. K. Sen

Weak convergence of a weighted residual empirical process in autoregression 235

S. S. Gupta, TaChen Liang

On the asymptotic optimality of certain empirical Bayes simultaneous testing procedures for Poisson populations 263

A. L. Rukhin

Admissible estimators of discriminant coefficients 285

Number 4

W. Wefelmeyer

Efficient estimation in multiplicative counting process models 301

J. Eichenauer-Herrmann

Gamma-minimax estimation in exponential families with quadratic variance functions 319

S. T. Rachev, L. Rüschendorf

Recent results in the theory of probability metrics 327

T. N. Sriram

Second order approximation to the risk of a sequential procedure measured under squared relative error loss 375

J. Fujii

Partitions of sample space and smallest pairwise sufficient subfields 393
