

Statistics & Decisions

Volume 12 · Issue 2 · 1994

Larry Zaiqian Shen

Optimal robust estimates for semiparametric symmetric location models 113

S. S. Gupta, TaChen Liang, Re-Bin Rau

Empirical Bayes rules for selecting the best normal population compared
with a control 125

R. Höpfner

Estimating a parameter in a birth-and-death process model 149

H. Pruscha

Asymptotic parametric tests of nonlinear hypotheses 161

W. Seidel

On acceptance sampling by variables in superpopulation models 173

M. Pal, P. Maiti

On minimax allocation of stratified random sampling when only the order
of stratum variances is known 195

R. Selukar, P. Kulkarni

Analysis of logistic regression for ergodic predictor vectors 203

Book Reviews 213

Correction 217
