

Statistics & Decisions

Volume 13 · Issue 1 · 1995

<i>B. Droge, T. Georg</i> On selecting the smoothing parameter of least squares regression estimates using the minimax regret approach	1
<i>A. Carbonez, L. Györfi, E. C. van der Meulen</i> Partitioning-estimates of a regression function under random censoring	21
<i>E. Stoimenova</i> On the LFC of the natural classification rule under a new loss function	39
<i>M. S. Mulekar</i> Selecting best negative binomial population using two distance measures	53
<i>E. Gombay</i> Nonparametric truncated sequential change-point detection	71
<i>F. Marohn</i> Neglecting observations in Gaussian sequences of statistical experiments	83
Book Reviews	93
