

Index of Volume 16 (1998)

Number 1

L. Györfi, M. Kohler, H. Walk

Weak and strong universal consistency of semi-recursive kernel and
partitioning regression estimates 1

B. F. Arnold, P. Stahlecker

Prediction in linear regression combining crisp data and Fuzzy prior information 19

K. Ohtani

The exact risk of a weighted average estimator of the OLS and Stein-rule
estimators in regression under balanced loss 35

C. Macci

On Bayesian experiments related to a pair of statistical
observations independent conditionally on the parameter 47

D. K. Dey, Kuo-ren Lou, S. Bose

A Bayesian approach to loss robustness 65

Dal Ho Kim

Bayesian robustness in small area estimation 89

Book reviews 105

Number 2

H. Strasser

Differentiability of statistical experiments 113

A. Cohen, D. Kushary

Universal admissibility of maximum
likelihood estimators in constrained spaces 131

A.-M. Fraise, M. Roy, C. P. Robert

Semi-tail upper bounds on admissible estimators in continuous
exponential families with a nuisance parameter 147

Keying Ye

Estimating a ratio of the variances in a balanced one-way random effects model 163

S. C. Bagui, B. K. Vaughn

Statistical classification based on k -rank nearest neighbor rule 181

S. Datta, N. Mukhopadhyay

Second-order asymptotics for multistage methodologies in partitioning a set of
normal populations having a common unknown variance 191

Book reviews 207

Number 3

V. Dupač, V. Fabian

Nonparametric estimation of a changing function 215

E. Liebscher

On a class of plug-in methods of bandwidth
selection for kernel density estimators 229

Y. Chung, C. Kim, S. Song

Linear estimators of a Poisson mean under
balanced loss functions 245

A. L. Rukhin

Decision-making with a no-decision option 259

E. Isogai, C. Uno

Sequential procedures for estimating the mean
with squared relative error loss 273

R. Wieczorkowski
Calculating the minimax estimator of a binomial probability
with entropy loss function and its comparison with other
estimators of a binomial probability 289

Book reviews 299

Number 4

G. Neuhaus
Conditional and unconditional two-sample rank tests for truncated data 307

A. Korostelev, S. Leonov
Bahadur-type risks and optimal designs in regression problems 333

Ming Yin
Asymptotic expansions for posterior probability in regression model 349

S. Zheng, A. F. Seila, T. N. Sriram
Asymptotically risk efficient two stage procedure
for estimating the product of $k(\geq 2)$ means 369

A. T. Martinsek
Fixed precision estimation in the Koziol-Green random censorship model 389

Book reviews 409

Referees of Volume 16 (1998) of S & D 421

Author Index of Volume 16 423
