

Index of Volume 20 (2002)

Number 1

E. Norberg

Comparison of statistical experiments with filtered probability spaces 1

G. S. Datta, M. Ghosh, Y. H. Kim

Probability matching priors for one-way unbalanced random effect models 29

K. Noda, Q. G. Wu, K. Shimizu

Γ -minimaxity of a generalized Bayes unbiased estimator in a multivariate linear model 53

N. Misra, I. D. Dhariyal, D. Kundu

Natural estimators for the larger of two exponential location parameters with a common unknown scale parameter 67

D. Pommeret

Information inequalities for the risks in simple quadratic exponential families 81

Correction Note 95

Book Reviews 97

Number 2

D. Heck-Boldebeck, F. Liese, G. Neuhaus

Optimal nonparametric tests for truncated data 111

M. Hušková, J. Steinebach

Asymptotic tests for gradual changes 137

A. Janssen, M. Kunz

Global extrapolations for power functions of one-sided nonparametric tests 153

G. V. Manco, A. Cohen

Inadmissibility of the studentized likelihood ratio test for testing order-restricted normal means 177

W. Schindler

Optimized timing attacks against public key cryptosystems 191

Book Reviews 211

Number 3

<i>M. Pensky</i> A new approach to empirical Bayes estimation with errors in variables	225
<i>A. Guillou</i> Subsampling for density estimation	241
<i>H. Hara</i> Estimating a covariance matrix in MANOVA model	257
<i>E. Cramer, U. Kamps, N. Schenk</i> On the joint completeness of independent statistics	269
<i>H. Stenger, S. Gabler, J. Schmidt</i> Survey sampling: A linear game	279
<i>M. Hušková, G. Neuhaus</i> Some simple unconditional and conditional tests for testing tumour onset times	297
<i>M. Z. Raqab</i> Characterizations of distributions based on the conditional expectations of record values . . .	309
Book Reviews	321

Number 4

<i>J. Hartung, D. Argaç</i> Confidence intervals on the among group variance component in an unbalanced and heteroscedastic one-way random effects model	331
<i>I. Horová, P. Vieu, J. Zelinka</i> Optimal choice of nonparametric estimates of a density and of its derivatives	355
<i>N. Gaffke, B. Heiligers, R. Offinger</i> On the asymptotic null-distribution of the Wald statistic at singular parameter points	379
<i>I. Molina, D. Morales, L. Pardo, I. Vajda</i> On size increase for goodness of fit tests when observations are positively dependent	399
<i>N. Kumar, G. P. Mehta, V. Kumar</i> Two new classes of subset selection procedures for location parameters	415
Book Reviews	429

Statistics & Decisions

International mathematical
journal for stochastic methods and models

2002

Volume 20/1

Oldenbourg

Coordinating Editors:

E. J. Dudewicz, Syracuse; D. Plachky, Münster; P. K. Sen, Chapel Hill

Book Review Editor: W. Wertz, Wien

Editorial Board:

E. J. Balder, Utrecht; P. Bartfai, Budapest; P. Chen, Syracuse; M. Csörgö, Ottawa; P. L. Davies, Essen; J. C. Fu, Winnipeg; J. K. Ghosh, Calcutta; M. Ghosh, Gainesville; S. S. Gupta, West Lafayette; L. R. Haff, La Jolla; B. Harris, Madison; A. Kozek, Sydney; O. Krafft, Aachen; T. Kusama, Tokyo; A. Le Breton, Grenoble; V. Mammnitzsch, Marburg; O. Moeschlin, Hagen; B. L. S. Prakasa Rao, New Delhi; R.-D. Reiss, Siegen; H. Rieder, Bayreuth; Y. Rinott, La Jolla; H. Rubin, West Lafayette; A. L. Rukhin, Baltimore; A. Sampson, Pittsburgh; W. Sendler, Trier; J. Sethuraman, Tallahassee; B. K. Sinha, Baltimore; H. Stenger, Mannheim; J. Štěpán, Prague; H. Strasser, Wien; K. Takeuchi, Yokohama; R. Theodorescu, Quebec; I. Vajda, Prague; L. Weiss, Ithaca; J. Wessels, Eindhoven.

Advisory Board:

A. Antille, Fribourg; S. Arnold, Pennsylvania; S. Bar-Lev, Haifa; T. Bednarski, Wrocław; E. Bofinger, Armidale; J. Chen, Athens; J. C. Gardiner, Michigan; L. B. Klebanov, St. Petersburg; N. Langberg, Tel Aviv; J. Lehn, Darmstadt; R. Michel, Wuppertal; N. Mukhopadhyay, Connecticut; P. Nüesch, Lausanne; D. Pallaschke, Karlsruhe; D. Ramachandran, Sacramento; P. Ressel, Eichstätt; S. Schach, Dortmund; J. Steinebach, Marburg; J. A. E. E. van Nunen, Delft; S. Yamada, Tokyo.

STATISTICS & DECISIONS provides an international forum for the discussion of theoretical and applied aspects of decision theoretically oriented mathematical statistics. Topics covered include classical and multiple statistical decision procedures (like estimation, ranking, selection, testing), asymptotic and nonparametric statistical procedures including sequential analysis, abstract and applied statistical inference for stochastic processes. Papers (and also survey papers) of fundamental mathematical importance giving impetus to further developments in decision theoretically oriented mathematical statistics and its applications are invited for publication. Major objectives of STATISTICS & DECISIONS are:

- 1) To encourage the trend of growing interaction between problems in mathematical stochastics and current research in different branches of applied resp. pure mathematics (for example: information theory, probability theory, game theory, control theory, stochastic automata resp. approximation theory, measure theory, functional analysis) useful for modelling, analysis and (optimal) solution of decision theoretically oriented statistical problems.
- 2) To encourage the further development of statistical decision theory in all its aspects, and to nurture applications in substantive fields, building on modern theory of statistical decisions.

Copyright: It is a fundamental condition that manuscripts have not been and will not be submitted for publication elsewhere. Submitting a manuscript means that the author agrees with the copyright for this contribution being transferred to the publisher. The copyright covers the publisher's exclusive right to produce and distribute the article or note. Photographic reproductions of the article or note, tables and figures are not allowed without the publisher's permission.

The use of general descriptive names, trade marks etc. in this publication, even if the former are not specifically identified, is not to be taken as a sign that such names are exempt from the relevant protective laws and regulations and may accordingly be used freely by anyone. Authors are requested to present copyright releases of published materials used in their contributions.

Re: Copyright in the USA: The appearance of the code at the top of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This authorization to photocopy items is granted for users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$3.00 per copy is paid directly to CCC, 27 Congress St., MA 01970. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is: 0721-2631.

This consent is given for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works or for resale.

Subscription information: Annual subscription price per volume (= 4 issues) € 240.- (Germany); € 255.- (elsewhere). (€ 231.- + € 9.- postage: (Germany), respectively € 15.- postage: (elsewhere)). For EU countries all prices are including 7% VAT. for all other countries they are gross prices.. Orders can either be placed with your bookdealer or sent directly to: Oldenbourg Wissenschaftsverlag, Postfach 80 13 60, D-81613 München.
