

CONTENTS

CHAPTER I.

ATOLLS OR LAGOON-ISLANDS.

SECTION I.—DESCRIPTION OF KEELING ATOLL.

Corals on the outer margin—Zone of Nulliporæ—Exterior reef—Islets—Coral-conglomerate—Lagoon—Calcareous sediment—Scari and Holothuriæ subsisting on corals—Changes in the condition of the reefs and islets—Probable subsidence of the atoll—Future state of the lagoon . . . page 5 to 19

SECTION II.—GENERAL DESCRIPTION OF ATOLLS.

General form and size of atolls, their reefs and islets—External slope—Zone of Nulliporæ—Conglomerate—Depth of lagoons—Sediment—Reefs submerged wholly or in part—Breaches in the reef—Ledge-formed shores round certain lagoons—Conversion of lagoons into land . . . page 19 to 31

SECTION III.—ATOLLS OF THE MALDIVA ARCHIPELAGO—GREAT CHAGOS BANK.

Maldiva Archipelago—Ring-formed reefs marginal and central—Great depth in the lagoons of the southern atolls—Reefs in the lagoons all rising to the surface—Position of islets and breaches in the reefs, with respect to the prevalent winds and action of the waves—Destruction of islets—Connection in the position and submarine foundation of distinct atolls—The apparent disseverment of large atolls—The Great Chagos Bank—Its submerged condition and extraordinary structure page 32 to 40

CHAPTER II.

BARRIER-REEFS.

Closely resemble in general form and structure atoll-reefs—Width and depth of the lagoon-channels—Breaches through the reef in front of valleys, and generally on the leeward side—Checks to the filling up of the lagoon-channels—Size and constitution of the encircled islands—Number of islands within the same reef—Barrier-reefs of New Caledonia and Australia—Position of the reef relative to the slope of the adjoining land—Probable great thickness of barrier-reefs page 41 to 50

CHAPTER III.

FRINGING OR SHORE REEFS.

Reefs of Mauritius—Shallow channel within the reef—Its slow filling up—Currents of water formed within it—Upraised reefs—Narrow fringing-reefs in

deep seas—Reefs on the coast of E. Africa and of Brazil—Fringing-reefs in very shallow seas, round banks of sediment and on worn-down islands—Fringing-reefs affected by currents of the sea—Coral coating the bottom of the sea, but not forming reefs page 51 to 59

CHAPTER IV.

ON THE DISTRIBUTION AND GROWTH OF CORAL REEFS.

SECTION I.—ON THE DISTRIBUTION OF CORAL-REEFS, AND ON THE CONDITIONS FAVOURABLE TO THEIR INCREASE page 60 to 71
SECTION II.—ON THE RATE OF GROWTH OF CORAL-REEFS. page 71 to 79
SECTION III.—ON THE DEPTHS AT WHICH REEF-BUILDING POLYPIFERS CAN LIVE page 80 to 87

CHAPTER V.

THEORY OF THE FORMATION OF THE DIFFERENT CLASSES OF CORAL-REEFS.

The atolls of the larger archipelagoes are not formed on submerged craters, or on banks of sediment—Immense areas interspersed with atolls—Their subsidence—The effects of storms and earthquakes on atolls—Recent changes in their state—The origin of barrier-reefs and of atolls—Their relative forms—The step-formed ledges and walls round the shores of some lagoons—The ring-formed reefs of the Maldiva atolls—The submerged condition of parts or of the whole of some annular reefs—The disseverment of large atolls—The union of atolls by linear reefs—The great Chagos Bank—Objections, from the area and amount of subsidence required by the theory, considered—The probable composition of the lower parts of atolls page 88 to 118

CHAPTER VI.

ON THE DISTRIBUTION OF CORAL-REEFS WITH REFERENCE TO THE THEORY OF THEIR FORMATION.

Description of the coloured map—Proximity of atolls and barrier-reefs—Relation in form and position of atolls with ordinary islands—Direct evidence of subsidence difficult to be detected—Proofs of recent elevation where fringing reefs occur—Oscillations of level—Absence of active volcanos in the areas of subsidence—Immensity of the areas which have been elevated and have subsided—Their relation to the present distribution of the land—Areas of subsidence elongated, their intersection and alternation with those of elevation—Amount, and slow rate of the subsidence—Recapitulation page 119 to 148

APPENDIX.

Containing a detailed description of the reefs and islands in the coloured map, Plate III. page 151 to 205

GENERAL INDEX 207
