DEDICATION

This volume is dedicated to our friend John S. "Jack" McIntosh. Perhaps more than any other single person, Jack has influenced the course of sauropod studies since World War II. In addition to being one of the foremost students of sauropods (McIntosh and Berman, 1975; Berman and McIntosh, 1978; McIntosh, 1989, 1990a, b), Jack has devoted himself to archiving and interpreting original map and quarry data from the early history of North American dinosaur paleontology (Ostrom and McIntosh, 1966; Kohl and McIntosh, 1997). We close The Sauropods: Evolution and Paleobiology with an interview with Jack that records his thoughts on the past, present, and future of sauropod studies. Perhaps the greatest attribute of sauropod dinosaurs is that they attract students like Jack, whose devotion and contagious enthusiam continue after half a century.
