## **Tables**

Table 1.1	Water reservoirs and fluxes	11
Table 1.2	Select examples of virtual water flows	18
Table 1.3	Global freshwater use by sector	20
Table 1.4	Amount of energy required to provide 1 m <sup>3</sup> of safe drinking water	24
Table 1.5	Indicative yields and water requirements for biofuel crops	28
Table 2.1	Average water use per person	33
Table 2.2	Tourism sector water use in major destination countries	43
Table 3.1	Water use per guest per day, various accommodation contexts	48
Table 3.2	Breakdown of water consumption in USA lodging facilities	51
Table 3.3	Summary of statistics of hotels in 1990 USA accommodation study	52
Table 3.4	Water consumption per available room per day, USA, 1990	53
Table 3.5	Percentage of hotel properties using specific water conservation methods, USA, 1990	53
Table 3.6	Indicative examples of water consumption for various accommodation categories and types of consumption in USA 1990 hotel survey	54

Table 3.7	Hot water use in USA lodging facilities	56
Table 3.8	Water use for pools and spas, Rhodes, Greece	60
Table 3.9	Laundry items, unit numbers and weight at two Rhodes hotels, 2013	66
Table 3.10	Available technologies and potential water and energy savings in California's commercial, industrial and institutional (CII) sector	69
Table 3.11	Energy use at hotels in Rhodes, Greece	77
Table 3.12	Foodstuff use in kg per guest night in Greek case study hotel	79
Table 3.13	Summary of resource use intensities in global tourism, 2010	84
Table 4.1	Kuoni's skills map for water management	90
Table 4.2	Planning for water management	92
Table 4.3	Aspects to be considered in a water audit	93
Table 4.4	Typical water saving per guest room in a hotel in Australia	97
Table 4.5	Benchmarks for hotel managers, Accor	98
Table 4.6	Action plan summary sheet for a hotel in Kenya, Kuoni	99
Table 4.7	Importance of different foods, Rhodes, Greece	120
Table 4.8	Comparison of water use indicators: Scientific and corporate approaches	136
Table 5.1	Future water stress in major tourism regions	149
