

# THE OTHER AIR FORCE

## War Culture

***Edited by Daniel Leonard Bernardi***

Books in this new series address the myriad ways in which warfare informs diverse cultural practices, as well as the way cultural practices—from cinema to social media—inform the practice of warfare. They illuminate the insights and limitations of critical theories that describe, explain, and politicize the phenomena of war culture. Traversing both national and intellectual borders, authors from a wide range of fields and disciplines collectively examine the articulation of war, its everyday practices, and its impact on individuals and societies throughout modern history.
