PREFACE	ix
INTRODUCTION	i
I. NAPOLEON BONAPARTE AND SCIENCE	4
<i>Introduction—4. Bonaparte as a Child of the Enlightenment—6. Bonaparte's Early Education: His Interests and Abilities—7. Bonaparte's Candidature for the Institute—9. Bonaparte's Early Relations with the Institute—12. The Institute of Egypt—14. Bonaparte's Continued Association with the First Class of the Institute—17. The Prize for Research on Voltaic Electricity—20. Precedents for the Award of Prizes for Scientific Work—25. Other prizes sponsored by Napoleon—28. The Exploitation of Beet Sugar in the Napoleonic State—32. Napoleon's Encouragement of French Industry—36. The Place of the Institute under the Consulate and Empire—40. Napoleon's Scientific Reading—46. Summary and Conclusion—49.</i>	
II. THE MEN OF ARCEUIL	56
<i>Napoleon and the Leaders of the Arcueil Group—56. Bonaparte and Berthollet—57. Bonaparte and Laplace—63. The Senate—66. Bonaparte and Chaptal—74. Bonaparte and Humboldt—75. The Patronage Enjoyed by Berthollet and Laplace at the Beginning of Their Careers—76. Social Advance through Science—79. Medical Education as an Entry to Science—81. Military Careers and Science—83. The Politics of the Arcueil Group—87. The Arcueil Group and 'Pre-positivism'—89. The Attitude of the Arcueil Group to Religion—91. Appreciation of the Arts at Arcueil—94. The Wives of</i>	

Members of the Arcueil Group—95. *C.-L. Berthollet*—97. *Laplace*—102. *Humboldt*—104. *Chaptal*—113. *Candolle*—116. *Biot*—120. *Malus*—122. *Arago*—125. *Poisson*—127. *Gay-Lussac*—128. *Thenard*—130. *Dulong*—131. *Descotils*—132. *Bérard*—134. *A. B. Berthollet*—136. 'Associate Members' of the Society of Arcueil—138.

III. THE ORGANIZATION OF SCIENCE IN FRANCE AT THE BEGINNING OF THE NINETEENTH CENTURY

147

The First Class of the Institute—147. *The Institute under the Consulate and Empire*—155. *A Crisis within the First Class*—158. *The Election of Members of the Arcueil Group to the First Class and to the Académie des Sciences*—161. *The Philomatic Society*—169. *The Société d'Encouragement*—179. *Minor Scientific Societies in Paris*—180. *General Societies Ostensibly Concerned with Science*—183.

IV. SCIENTIFIC INSTITUTIONS FOR TEACHING AND RESEARCH IN EARLY NINETEENTH-CENTURY FRANCE

190

Introduction—190. *The 'École Normale' of the Convention*—191. *The 'École Polytechnique': Foundation and Curriculum*—192; *The Entrance Examination*—196; *Gay-Lussac and Thenard*—198; *Examiners*—200; *Student Finance*—201; *Staff Finance*—203; *Militarization*—204; *The 'Conseil de Perfectionnement'*—206; *The 'École Polytechnique' and Arcueil*—208. *The 'Bureau des Longitudes'*—209. *The 'Collège de France'*—214. *The 'École des Mines'*—214. *The Faculty of Science*—216. *The Reconstitution of the 'École Normale' under Napoleon*—218. *The 'École Vétérinaire d'Alfort'*—219. *The 'Athénée de Paris'*—220. *The 'Muséum d'Histoire Naturelle'*—221. *The Teaching Duties of the Members of the Arcueil Group*—223.

V. THE ORIGINS OF THE SOCIETY OF ARCUEIL 232

Before the Revolution—232. After the Revolution—237. Berthollet's 'Statique chimique'—245. The Encouragement of Young Men—248. Berthollet and Gay-Lussac—250. Laplace and Biot—254. Capillarity—260. The Balloon Ascent—262. Humboldt and Gay-Lussac—264. The Difficulties of Publishing Scientific Memoirs—268. Early Foreign Visitors to Arcueil—271.

VI. THE ACTIVITIES OF THE SOCIETY OF ARCUEIL 277

The Significance of 1807—277. The Meetings of the Society—280. The Arcueil 'Season'—284. Gay-Lussac's Memoirs Read at Arcueil in 1807—285. The Inactivity of the Society in 1808—287. The Influence of Berthollet—290. Collaboration and Cross-fertilization—294. The General Problems of the Arcueil Group—297. Newtonianism at Arcueil—299. The Velocity of Sound—302. The Relationship between the Society of Arcueil and the First Class of the Institute—308. New Members of the Society—312. Memoirs Read at Later Meetings of the Society—319. Books by Members of the Society—326. Rivalry and Enmity within the Society—331.

VII. THE 'MÉMOIRES' OF THE SOCIETY OF ARCUEIL 336

Introduction—336. The Delay in Publication of Volume Three—337. The Free Expansion of Gases—340. The Polarization of Light—342. Sound—347. Magnetism—349. Optics and Chemistry—351. Gay-Lussac's Law of Combining Volumes of Gases—354. The Collaboration of Gay-Lussac and Thenard—360. Other Memoirs on General and Inorganic Chemistry—365. Dulong's Discovery of Nitrogen Trichloride—370. Organic Chemistry—373. Biological and Geographical Memoirs—

378. Conclusion—384. *The Communication and Reception of the 'Mémoires'*—385.

VIII. ARCUEIL—THE LAST PHASE (1814-1822) 395

The Overthrow of Napoleon and the Allied Occupation of Paris—395. *Berthollet's Work and Fortunes in the Years 1814-22*—398. *The Work of the 'Berthollet School'*—401. *The 'Annales de chimie et de physique'*—404. *New Alliances*—406. *Visitors to Arcueil*—410. *Berzelius at Arcueil*—411. *Berzelius and Dulong*—414. *Blagden's Later Visits to Arcueil*—417. *Dalton's Visit to Arcueil*—417. *The Death of Berthollet*—420. *The Death of Laplace*—423. *The Fate of the Houses at Arcueil*—424. *The Verdict on Arcueil*—426.

IX. THE INFLUENCE OF FORMER MEMBERS OF THE SOCIETY OF ARCUEIL ON NINETEENTH-CENTURY SCIENCE 429

The Influence of Humboldt—429. *German Students in Paris*—433. *Gay-Lussac and Thenard and Their Students*—439. *The Early Career of Dumas in Paris*—441. *Gerhardt and Laurent*—444. *Pasteur and Biot*—449. *Patronage by Arago*—454. *The Role of Former Members of the Society of Arcueil in the Affairs of the 'Académie des Sciences'*—461. *Influence through Publications*—465. *The Contributions of the Younger Members of the Arcueil Group to Nineteenth-century Science*—467. *State Support for Technology and Science (1830-1850)*—471.
