## Tables

|      |                                                                                                                                 |     |
|------|---------------------------------------------------------------------------------------------------------------------------------|-----|
| 4.1  | Key methodological choices                                                                                                      | 59  |
| 4.2  | Reference budgets and distribution of households concerned                                                                      | 62  |
| 4.3  | Minimum monthly income for a single person according to various French surveys                                                  | 64  |
| 5.1  | Progress of MIS research in Japan                                                                                               | 71  |
| 5.2  | Case study profiles that MIS Japan considered                                                                                   | 72  |
| 5.3  | MIS estimates: amount, as percentage of Public Assistance MLS and average pension                                               | 74  |
| 5.4  | MIS estimates against the Consumption Survey                                                                                    | 76  |
| 6.1  | Minimum income standards for older people in Singapore                                                                          | 92  |
| 7.1  | The orientation groups' definition of a decent living level and case study individual                                           | 103 |
| 7.2  | Essential items for Ms B/Mr B in relation to communication, the living area and the sleeping area                               | 105 |
| 10.1 | Comparing the updated original low-cost and new MIHL budget standards for unemployed families                                   | 144 |
| 12.1 | The 'basic needs' and 'modest-but-adequate' budgets for a single household                                                      | 176 |
| 14.1 | Individual costs in the minimum budget for different family types, kr. 2015                                                     | 200 |
| 14.2 | Household costs in the minimum budgets for different family groups, kr. 2015                                                    | 202 |
| 14.3 | The minimum costs of first, second and third child aged 18 years or under, kr. 2015                                             | 203 |
| 14.4 | Monthly minimum budget on different goods for single couples with one child and couples with two children in Denmark and Norway | 204 |
| 16.1 | Healthy food basket/budget, euros, spring 2015 prices                                                                           | 237 |
| 19.1 | Healthy food basket/budget, home-cooked meals, euros per month                                                                  | 277 |
| 19.2 | Adequate income and minimum incomes in Portugal, euros per month in 2017, working age people                                    | 282 |
| 19.3 | Adequate income and minimum incomes in Portugal, euros per month in 2017, pensioners                                            | 283 |

|      |                                                                     |     |
|------|---------------------------------------------------------------------|-----|
| 19.4 | Calculated consensual equivalence scales, MIS/raP approach          | 284 |
| 23.1 | Methods, principles and policy perspectives summarised and compared | 336 |

## Figures

|      |                                                                                                                                      |     |
|------|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| 2.1  | Minimum income standards research stages                                                                                             | 33  |
| 3.1  | Development of MESL                                                                                                                  | 41  |
| 3.2  | Social welfare benchmarked against urban MESL expenditure need                                                                       | 48  |
| 9.1  | Theoretical framework of the Belgian reference budgets                                                                               | 127 |
| 11.1 | Research phases in the ImPRovE project                                                                                               | 157 |
| 11.2 | Total monthly budget without housing costs per various family types, Barcelona reference city, euros, 2014                           | 158 |
| 11.3 | Total monthly budget for children, Barcelona reference city, euros, 2014                                                             | 159 |
| 11.4 | Total monthly budget for the safety in childhood basket per category for various family types, Barcelona reference city, euros, 2014 | 160 |
| 12.1 | Poverty incidence in the Netherlands according to the budget approach and the relative EU criterion, 1985–2014/2016                  | 177 |
| 12.2 | Poverty risks and number of (poor) persons in various population groups, 1985 and 2016                                               | 178 |
| 14.1 | The minimum costs for families with two children versus one child with an age-span of three years, 2015                              | 203 |
| 18.1 | Constituting dimensions of reference budgets                                                                                         | 260 |
| 23.1 | Minimum income standards and reference budget methodologies                                                                          | 334 |
