

List of Tables and Figures

Tables

3.1	Frequency of in-group neighborly interactions (percentages)	53
3.2	Frequency of neighborly interactions between migrants and locals (percentages)	54
3.3	Social trust between migrants and locals in Shanghai by <i>hukou</i> status (percentages)	55
6.1	Demographic comparison of China in 2010 and the US in 1920, when their respective populations were 50% urban	114
8.1	The Beijing ring roads	145
9.1	Descriptive statistics of subjective well-being and sociodemographic characteristics by pathways to urban residency in Beijing	166
9.2	Multiple regressions on subjective well-being of the whole sample (N = 4,941)	171
9.3	Multiple regressions on subjective well-being of the four migrant groups	173
10.1	The loadings and factors of Shenzhen's factorial ecology	191
10.2	P index for locals and migrants	195

Figures

1.1	Letter from Fei Xiaotong to Robert Park, 1943, University of Chicago Special Collection	4
1.2	The cover of an edited volume dedicated to Robert Park, compiled in 1933	6
1.3	Half-demolished Xiancun, an urban village in Guangzhou	11
1.4	The "airport slum" in Mumbai, where residents live in precarious proximity to airport runways	12
1.5	Complexo do Alameo, a large cluster of favelas in Rio de Janeiro	13

3.1	The key differences between the moral order in the traditional rural society and the city	45
6.1	US and Chinese urban population growth, 1860–1920 (for the US) and 1960–2020 (for China)	103
6.2	US share of global GDP and the share of the US population living in urban areas, 1800–1960	105
6.3	China's share of global GDP and the share of the Chinese population living in urban areas, 1960–2020	107
6.4	The population of New York City and the City of Detroit, 1860–2020	109
6.5	Population pyramids for the US in 1920 and China in 2010, the respective years that their urban populations reached the 50% mark	114
8.1	The fourth ring road	142
8.2	Drawing exercise, June 20, 2016	148
8.3	The protruding steel bars of unfinished villas	151
8.4	Driving at night on the second ring road in <i>Beijing is coming</i> (Lee, 2008)	153
9.1	Population composition in Beijing, 1978–2014	159
9.2	Spatial distribution of 80 primary sampling units for the household survey in Beijing	163
9.3	Diverse pathways to urban residency in Beijing	165
9.4	Differences in subjective well-being by pathways to urban residency in Beijing	168
9.5	Disparities in socioeconomic status by pathways to urban residency in Beijing: Associations between pathways to urban residency and subjective well-being	170
9.6	Predicted self-rated physical and mental health and years living in Beijing among the four migrant groups	177
10.1	Location and map of Shenzhen	190
10.2	Index of Dissimilarity for migrants	194
10.3	The Location Quotient of locals	196
10.4	The Location Quotient of migrants	196
10.5	The Location Quotient of migrants living in Shenzhen below two years	197
10.6	The Location Quotient of migrants living in Shenzhen between two and six years	197
10.7	The Location Quotient of migrants living in Shenzhen above six years	198
10.8	The location and space of Foxconn, Shenzhen	199
10.9	Landscape of Foxconn	201
