

## Acknowledgments

---

This book has been published with the financial support of Dr. Craig Cooper, the Dean of Arts and Science at Nipissing University, the Department of History at Nipissing University, and Nipissing University's Office of Research Services. It has also received financial support from the Faculty of Humanities at the Norwegian University of Science and Technology (NTNU) in Trondheim. The editors gratefully acknowledge this support, without which the publication of this book would not have been possible. We are also grateful for other support that this project received over the years from NTNU. Early versions of the chapters in this volume were presented at a workshop held in 2008 at the Fondation Maison des sciences de l'homme in Paris with the assistance of the Institut pour l'histoire de l'aluminium (FMSH) and the Centre Franco-Norvégien en Sciences Sociales et Humaines. Many thanks to Ivan Grinberg, Maurice Laparra, and Mauve Carbonell of the Institut pour l'histoire de l'aluminium, and to Marek Kretschmer and Kirstin Skjelstad at the FMSH for their hospitality and their generosity as well as their encouragement of this project. Last but not least, we are very thankful for the patient, professional, and skilful services provided by Randy Schmidt, Ann Macklem, Judy Phillips, and UBC Press in bringing this book to publication.
