

Figures, Tables, and Appendices

Figures

- 1.1 Five major sources of hydro power and the proposed transmission path for a national power network / 13
- 1.2 Hydroelectric generating station with turbine and generator detail / 18
- 3.1 Power plants on the Niagara River, 1900-10 / 59
- 4.1 Québec's main system features / 78
- 5.1 Newfoundland and Labrador's main system features / 110
- 6.1 Manitoba's main system features / 139
- 7.1 British Columbia's main system features / 176

Tables

- 2.1 Provincial and Canadian government functions in the development of electricity supply / 28
- 3.1 Chronology of the privatization and its reversal at the Canadian Niagara Falls / 57
- 3.2 Annual quantity of electricity exported to the United States, 1908-20 / 74
- 4.1 Turbines and generators in power plants on the La Grande River, James Bay / 86
- 4.2 Consumption of electricity in manufacturing industries in Québec, 1962-84 / 87
- 4.3 Northern hydro expansion, Churchill Falls and James Bay, 1971-96 / 92
- 4.4 Hydro-Québec estimated power surplus / 93
- 4.5 Québec's international electricity trade, 1983-96 / 96
- 5.1 Newfoundland's reversal of hydro resource privatization / 113
- 5.2 Hydro-Québec electricity export hearings and interventions by Newfoundland / 119
- 5.3 Turbines and generators at Churchill Falls and Baie d'Espoir, 1967-85 / 126
- 5.4 Consumption of electricity in manufacturing industries, Newfoundland, 1975-8 / 129

- 5.5 Consumption of electricity by fish products and food-and-beverage production, Newfoundland / 129
- 6.1 Privatization and its reversal: hydroelectric resources in Manitoba, 1867-1966 / 144
- 6.2 Turbines and generators by power stations (over 100 MW) in Manitoba, 1923-92 / 149
- 6.3 Peak power and energy demand by major industrial customers in Manitoba, 1973-4 / 152
- 6.4 Consumption of electricity in manufacturing industries in Manitoba, 1975-84 / 153
- 6.5 Chronology of the controversy about hydro development in Manitoba, 1972-92/ 158
- 7.1 Privatization and its reversal: hydroelectric resources in BC, 1912-97 / 179
- 7.2 Turbines and generators in Peace River power stations, 1968-80 / 185
- 7.3 Turbines and generators in power stations (over 100 MW) by manufacturer in BC, 1930-84 / 186
- 7.4 Consumption of electricity in manufacturing industries in BC, 1962-84 / 193
- 7.5 BC Hydro capacity, reserve, and surplus, 1984-90 / 197
- 7.6 Chronology of building for export, BC, 1961-90s / 199
- 8.1 Descent from national to continental grid integration / 214
- 8.2 Privatizations and their reversals: hydroelectric resources in five provinces, 1887-1974 / 219
- 8.3 Generating capacity in five provinces, 1960-96 / 223
- 8.4 Manufacturing sectors that constitute about 80 percent of the total electricity consumption in five provinces, 1962-84 / 223

Appendices

- 1 Turbines and generators in Ontario power stations (over 100 MW), 1905-30 / 235
- 2 Excerpts from the survey of steam and electricity use in small industries by the Hydro-Electric Power Commission of Ontario (Ontario Hydro), 1911 / 236
- 3 Excerpts from the survey of industrial applicants in southern Ontario municipalities by the Hydro-Electric Power Commission of Ontario (Ontario Hydro), 1919-20 / 240
- 4 Consumption of electricity in manufacturing industries in Québec, 1962-84 / 242
- 5 Hydro-Québec, les grands secteurs industriels, 1973 et 1976 / 243
- 6 Hydro-Québec, les grands secteurs industriels, 1981 et 1984 / 243
- 7 Purchases in Newfoundland by the Churchill Falls (Labrador) Corporation by 1972 / 244
- 8 Costs of the Churchill Falls Project, 1971 / 244

- 9 Turbine and generator contract, press release of the Churchill Falls (Labrador) Power Corporation, 1967 / 245
- 10 Consumption of electricity in manufacturing industries, Newfoundland, 1975-8 / 246
- 11 Electricity as a percentage of the cost of production / 247
- 12 Turbines and generators by manufacturers, Manitoba, 1900-86 / 248
- 13 Ten largest customers of industrial electricity in Manitoba, 1989 / 248
- 14 Estimated and actual firm energy supplied to industrial and commercial customers from the Manitoba Hydro and Winnipeg Hydro systems, 1977-86 / 249
- 15 Consumption of electricity in manufacturing industries in Manitoba by year, 1975-84 / 249
- 16 Energy purchased by and energy sold from the integrated system of Manitoba Hydro and Winnipeg Hydro, 1977-86 / 250
- 17 Turbines and generators by power station (over 100 MW) in British Columbia, 1930-84 / 251
- 18 Consumption of electricity in manufacturing industries by year in BC, Yukon, and the Northwest Territories, 1962-74, and in BC, 1975-84 / 252
- 19 Electricity imports and exports by year from British Columbia, 1984-8 / 253
- 20 Turbines and generators installed in power plants (over 100 MW) in five provinces, 1900-86 / 254
