

List of Text Figures

Page

- ii *Figure 1*—Atlas. Frontispiece.
- 3 *Figure 2*—Map of the world showing antipodal continental land and continental shoreline antipodal coincidences.
- 4 *Figure 3*—Antipodes are points on earth opposite each other. Needle through China pierces South America.
- 4 *Figure 4*—Continental shorelines from the west coast of South America on the Equator through North America and the east coast of Asia to Sumatra on the Equator are cut by the ocean only at the Bering and Malacca Straits. The shorelines closely follow a half-great-circle.
- 5 *Figure 5*—Oblique transverse Hammer equal area graticule extended to encompass "1½" worlds.
- 5 *Figure 6*—Normal oblique Hammer equal area graticule extended beyond one world.
- 7 *Figure 7*—Map of the world showing the shortest ocean connections linking the three parts of the world ocean.
- 8 *Figure 8*—Various aspects of the Hammer projection by 45° changes in latitude and longitude on the normal projection of the map North Pole and 45° changes in latitude of the projection center. Obliques are all other aspects not on one of the three matrix coordinates labeled Normal, Transverse or Centered.
- 10 *Figure 9*—Oblique projection centered at 30° N. latitude with projection pole at 45° N. latitude.
- 59 *Figure 10*—Principal tectonic plate boundaries, Mercator projection, Burke & Kidd.
- 60 *Figure 11*—Antipodal tectonic plate map.
- 73 *Figure 12*—Centered transverse Hammer equal area graticule extended to encompass "1½" worlds.
