

CONTENTS

PREFACE	Page v
INTRODUCTION	XV
I. THE NATURE OF THE PROBLEM	I
1. <i>What is Mind?</i>	1.1-1.5
2. <i>The Phenomenal and the Physical World</i>	1.6-1.21
3. <i>Stimulus, Impulse, and the Theory of the Specific Energy of the Nerves</i>	1.22-1.37
4. <i>Differences in Quality are Differences in the Effects</i>	1.38-1.55
5. <i>The Unitary Character of the Sensory Order</i>	1.56-1.67
6. <i>The Order of Sensory Qualities not Confined to Conscious Experience</i>	1.68-1.74
7. <i>The Denial or Disregard of Our Problem by Behaviourism</i>	1.75-1.89
8. <i>The 'Absolute' Qualities of Sensations a Phantom-Problem</i>	1.90-1.107
II. AN OUTLINE OF THE THEORY	37
1. <i>The Principle of the Explanation</i>	2.1-2.19
2. <i>The Sensory Order in its Static and in its Dynamic Aspects</i>	2.20-2.31
3. <i>The Principle of Classification</i>	2.32-2.38
4. <i>Multiple Classification</i>	2.39-2.44
5. <i>The Central Thesis</i>	2.45-2.51
III. THE NERVOUS SYSTEM AS AN INSTRUMENT OF CLASSIFICATION	55
1. <i>An Inventory of the Physiological Data</i>	3.1-3.14
2. <i>Simplifying Assumptions on which the Operation of the Principle will be Discussed</i>	3.15-3.24
3. <i>Elementary Forms of Classification</i>	3.25-3.34
4. <i>Complex Forms of Classification</i>	3.35-3.51

CONTENTS

5. <i>The Classification of the Relations Between Classes</i>	3.52-3.70
6. <i>The Universal Character of the Process of Classification: Gestalt Phenomena and Abstract Concepts</i>	3.71-3.78
IV. SENSATION AND BEHAVIOUR	79
1. <i>Sensations and the Organism</i>	4.1-4.10
2. <i>Evolution and the Hierarchical Order of the Nervous System</i>	4.11-4.26
3. <i>From Specific Reflex to Generalized Evaluation</i>	4.27-4.35
4. <i>Proprioception of Low-Level Responses</i>	4.36-4.44
5. <i>Postures and Movements Connected with Perception</i>	4.45-4.47
6. <i>Patterns of Motor Responses</i>	4.48-4.55
7. <i>Biogenic Needs and Drives</i>	4.56-4.63
8. <i>Emotions and the James-Lange Theory</i>	4.64-4.72
V. THE STRUCTURE OF THE MENTAL ORDER	102
1. <i>Pre-Sensory Experience or 'Linkages'</i>	5.1-5.16
2. <i>The Gradual Formation of a 'Map' Reproducing Relations Between Events in the Environment</i>	5.17-5.32
3. <i>The 'Map' and the 'Model'</i>	5.33-5.49
4. <i>Associative Processes</i>	5.50-5.62
5. <i>Mechanical and Purposive Behaviour</i>	5.63-5.76
6. <i>The Model-Object Relationship</i>	5.77-5.91
VI. CONSCIOUSNESS AND CONCEPTUAL THOUGHT	132
1. <i>Conscious and Unconscious Mental Processes</i>	6.1-6.7
2. <i>Criteria of Consciousness</i>	6.8-6.15
3. <i>The Common Space-Time Framework</i>	6.16-6.21
4. <i>Attention</i>	6.22-6.28
5. <i>The Functions of Consciousness</i>	6.29-6.32
6. <i>'Concrete' and 'Abstract'</i>	6.33-6.43
7. <i>Conceptual Thought</i>	6.44-6.50
VII. CONFIRMATIONS AND VERIFICATIONS OF THE THEORY	147
1. <i>Observed Facts for which the Theory Accounts</i>	7.1-7.9
2. <i>Older Theories Comprised as Special Cases</i>	7.10-7.18
3. <i>New Experiments Suggested</i>	7.19-7.51
4. <i>Possibilities of Experimental Refutation</i>	7.52-7.56

CONTENTS

VIII. PHILOSOPHICAL CONSEQUENCES	165
1. <i>Pre-Sensory Experience and Pure Empiricism</i>	8.1-8.27
2. <i>Phenomenalism and the Inconstancy of Sensory Qualities</i>	8.28-8.39
3. <i>Dualism and Materialism</i>	8.40-8.47
4. <i>The Nature of Explanation</i>	8.48-8.56
5. <i>Explanation of the Principle</i>	8.57-8.65
6. <i>The Limits of Explanation</i>	8.66-8.86
7. <i>The Division of the Sciences and the 'Freedom of the Will'</i>	8.87-8.98
BIBLIOGRAPHY	195
INDEX	204
