Prologue / 1

PART ONE

PRELIMINARIES

1 / The Physical Setting / 5

The Changing Climate of the Last 20,000 Years / 12 • The Dating Method / 15 • The Ice Sheets / 15 • Ice and Sea / 19 • Ice and Fresh Water / 22 • Ice and Atmosphere / 26 • Ice-free Land: Refugia and Nunataks / 30

2 / The Fossil Evidence / 39

Fossils / 39 • Microfossils / 41 • Pollen / 47 • Sediment Cores and Pollen Diagrams / 52 • Dating: The Radiocarbon Method / 57 • Dating by Volcanic Ash Layers / 59

3 / Interpreting the Evidence / 61

Some of the Problems / 61 • Interpreting Pollen Diagrams / 63 • Interpreting Geographical Range Maps: Animals / 69 • Interpreting Geographical Range Maps: Plants / 75

4 / The Migration of Vegetation / 81

Shifting Zones of Vegetation / 81 • The Starting Conditions / 83 • Conditions in the Newly Deglaciaded Land / 87 • The Invasion by Plants / 91 • The Renewal of Vegetation / 96 • Ecological Inertia / 99 • Photoperiodism / 101

PART TWO

THE TIME OF MAXIMUM ICE

5 / Eighteen Thousand Years Ago: Life South of the Ice / 107

Large Mammals and Their Environments South of the Ice Sheets / 108 • Human Life South of the Ice / 112 • Plants South of the Ice Sheets / 115

6 / The Coasts / 125

North America as an Extension of Asia / 126 • The South Coast of Beringia / 128 • The Western Edge of the Ice / 130 • The East Coast Plains and Islands / 138 • The East Coast Refugia / 142

7 / Beringia and the Ice-free Corridor / 147

Beringia and Its Big Game / 148 • Human Life in Beringia / 153 • The Ice-free Corridor / 156 • Refugia Near the Ice-free Corridor / 160

PART THREE

THE MELTING OF THE ICE

8 / The Ice Begins to Melt / 167

South of the Ice: Tundra / 168 • South of the Ice: Forest Parkland and Muskeg / 171 • Stagnant Ice / 175 • Superglacial and Ice-walled Lakes and Their Ecology / 178

9 / The Great Proglacial Lakes / 185

Glacial Lakes Missoula and Columbia / 186 • Migration from Beringia / 189 • Glacial Lakes Agassiz and McConnell / 192 • The Precursors of the Great Lakes and Glacial Lake Ojibway / 199

10 / The Rising Sea / 207

The Sundering of Beringia / 208 • The Atlantic Shore / 210 • The Atlantic Coastlands / 214 • The Champlain Sea / 217 • The Tyrell Sea / 222

PART FOUR

THE PLEISTOCENE / HOLOCENE TRANSITION

11 / The End of an Epoch / 227

The End of the Pleistocene / 227 • The Changing Forest / 229 • The Prairie Grasslands / 232 • Transition in the West: The Interior / 238 • Transition in the West: The Coast / 244 • Beringia at the Turn of the Epoch / 248

12 / The Great Wave of Extinctions / 251

Extinction Waves: When, Where, and What / 252 • The Prehistoric Overkill Hypothesis / 254 • The Arguments against Overkill / 257 • Changing Environment Theories / 261 • Extinct Birds / 265

PART FIVE

OUR PRESENT EPOCH, THE HOLOCENE**13 / The Great Warmth / 269**

Some Northward Shifts of Northern Limits / 272 • The Hypsithermal at Sea / 277 • The Hypsithermal in the Mountains / 278 • Refugia from the Drought / 283 • Human Life in the Hypsithermal / 286

14 / The Neoglaciation / 291

The Spread of Muskeg / 292 • Increased Rain in the Prairies / 296 • The Shifting Ranges of Forest Tree Species / 299 • The Neoglacial and the Northern Treeline / 301 • Refugia Reestablished / 303 • Respite in the Neoglaciation / 305 • The Little Ice Age / 308

Epilogue / 311**Appendix 1: Names of Species: English and Latin / 313****Appendix 2: Names of Species: Latin and English / 323****Notes / 333****Index / 357**
