Preface ix

Introduction: Biology's Untenable Dualism 1

- 1 What Was Reductionism? 25
- 2 Reductionism and Developmental
Molecular Biology 56
- 3 Are There Really Informational Genes
and Developmental Programs? 94
- 4 Dobzhansky's Dictum and the Nature
of Biological Explanation 134
- 5 Central Tendencies and Individual
Organisms 157
- 6 Making Natural Selection Safe for
Reductionists 177
- 7 Genomics, Human History, and
Cooperation 201
- 8 How Darwinian Reductionism
Refutes Genetic Determinism 222
