- 1 *Evolutionary Paleoecology: The Maturation of a Discipline*
Warren D. Allmon and David J. Bottjer 1
- 2 *Scaling Is Everything: Brief Comments on Evolutionary
Paleoecology*
James W. Valentine 9
- 3 *What's in a Name? Ecologic Entities and the Marine
Paleoecologic Record*
William Miller III 15
- 4 *The Ecological Architecture of Major Events in the Phanerozoic
History of Marine Invertebrate Life*
David J. Bottjer, Mary L. Droser, Peter M. Sheehan,
and George R. McGhee Jr. 35
- 5 *Stability in Ecological and Paleoecological Systems:
Variability at Both Short and Long Timescales*
Carol M. Tang 63

- 6 *Applying Molecular Phylogeography to Test Paleoeological Hypotheses: A Case Study Involving Amblema plicata (Mollusca: Unionidae)*
Bruce S. Lieberman 83
- 7 *Nutrients and Evolution in the Marine Realm*
Warren D. Allmon and Robert M. Ross 105
- 8 *The Role of Ecological Interactions in the Evolution of Naticid Gastropods and Their Molluscan Prey*
Patricia H. Kelley and Thor A. Hansen 149
- 9 *Evolutionary Paleoeology of Caribbean Coral Reefs*
Richard B. Aronson and William F. Precht 171
- 10 *Rates and Processes of Terrestrial Nutrient Cycling in the Paleozoic: The World Before Beetles, Termites, and Flies*
