| PREFACE | v |
| PART I. INTRODUCTION | |
| I. HISTORICAL OUTLINE OF SHORT-WAVE DIATHERMY . . . | 3 |
| PART II. THE PHYSICAL ASPECTS OF SHORT-WAVE DIATHERMY | |
| II. THE PHYSICAL ASPECTS OF SHORT-WAVE DIATHERMY . . | 9 |
| Principles of construction of short-wave machines; spark-gap and tube machines; measurements | |
| PART III. EXPERIMENTATION WITH SHORT-WAVE DIATHERMY | |
| III. EXPERIMENTS ON BACTERIA AND OTHER ORGANISMS . . | 27 |
| Bacteria (staphylococci, streptococci, bacillus coli, tubercle bacillus, typhoid bacillus, gonococci, other microorganisms, general discussion); unicellular organisms; experiments on toxins; viruses; venom; plants | |
| IV. EXPERIMENTATION ON ANIMALS | 40 |
| Effect of short-wave treatment on growth and reproduction; action of different wave lengths on tissue; physiologic effects of short waves; biological effects of short waves; effect of short waves on blood and serum; action of short waves on electrolytes and colloids; local tissue changes; inflammation; temperature regulation after short-wave diathermy (temperature measurement) | |
| V. WAVE LENGTHS | 67 |
| Wave lengths for short-wave diathermy; microwaves; specific effect, or specificity | |
| PART IV. THE TECHNIC OF SHORT-WAVE DIATHERMY | |
| VI. SHORT-WAVE TREATMENTS | 77 |
| Effect of short waves on prominent parts; inconvenient effects of ex- posure to short waves; contraindications to short-wave diathermy; surgical application of short waves (preoperative and postoperative); combination of short waves with other forms of treatment (drugs, | |

surgical, physiotherapeutic, mechanotherapeutic measures, irradiation therapy, diets, opotherapy as required, etc.); electropyrrexia; short-wave diathermy as compared with diathermy (differences)

VII. GENERAL AND MECHANICAL PRINCIPLES IN SHORT-WAVE TECHNIC 97

Burns and their prevention; electrodes for short-wave diathermy (rigid electrodes, flexible electrodes, size of the electrodes, shape of the electrodes, technic of application, principles of application)

PART V. THE CLINICAL APPLICATIONS OF SHORT-WAVE DIATHERMY

VIII. INFECTIOUS, ALLERGIC AND METABOLIC DISEASES 119

General considerations; infectious diseases (the common cold, pneumonia, pulmonary tuberculosis, erysipelas, erysipeloid, actinomycosis); allergic diseases (bronchial asthma); diseases of metabolism and of the ductless glands (gout, obesity, diabetes mellitus, disorders of the endocrine function)

IX. DISEASES OF THE RESPIRATORY TRACT 130

Laryngitis; bronchitis; bronchiectasis; emphysema; pleurisy; empyema; abscess of the lung; pulmonary gangrene; technic of treatment

X. DISEASES OF THE GASTRO-INTESTINAL TRACT 143

The oral cavity (the dental structures, tonsillitis); spasm of the esophagus; the stomach; (gastritis, peptic ulcer, gastric neuroses); the intestines; the biliary passages; technic of treatment

XI. DISEASES OF THE GENITO-URINARY TRACT 155

The urinary tract (cystitis, pyelitis, nephritis, perirenal abscess; technic of treatment); the female genital tract (pelvic inflammation and infections, dysmenorrhea); the male genito-urinary tract (gonorrheal urethritis, diseases of the prostate, miscellaneous diseases, technic of treatment)

XII. DISEASES OF THE CIRCULATORY SYSTEM AND THE LYMPH GLANDS 171

The circulatory system (the heart); the vascular system; the lymph glands (tuberculous adenitis, Mikulicz' disease, noncontagious parotitis)

XIII. DISEASES OF THE LOCOMOTOR SYSTEM 184

The muscular system (tendovaginitis, bursitis); the bones (periostitis, osteomyelitis); the joints (arthritis, tuberculosis, technic of treatment, general comment); traumatic injuries

XIV. DISEASES OF THE NERVOUS SYSTEM 200

Neurosyphilis; neuritides; migraine; miscellaneous nervous conditions

CONTENTS

ix

(impairment of motility, Parkinson's disease, syringomyelia, epilepsy, mental disease, brain abscess, hiccup, urinary incontinence of nervous origin, neuroma); comment

XV. MISCELLANEOUS CONDITIONS 211

Diseases of the skin (furuncle, carbuncle, axillary sweat-gland infection and abscess, paronychia, cellulitis, and other infections of the extremities, phlegmon, miscellaneous diseases of the skin); diseases of the head (inflammatory disease of the sinuses, diseases of the eye, diseases of the ear, mastoiditis); mastitis

XVI. MALIGNANT DISEASE 244

PART VI. CONCLUSION

XVII. CONCLUSION 251

BIBLIOGRAPHY 257
