**SOCIETY AND THE ENVIRONMENT**

## SOCIETY AND THE ENVIRONMENT

The impact of humans on the natural environment is one of the most pressing issues of the twenty-first century. Key topics of concern include mounting natural resource pressures, accelerating environmental degradation, and the rising frequency and intensity of disasters. Governmental and nongovernmental actors have responded to these challenges through increasing environmental action and advocacy, expanding the scope of environmental policy and governance, and encouraging the development of the so-called green economy. Society and the Environment encompasses a range of social science research, aiming to unify perspectives and advance scholarship. Books in the series focus on cutting-edge global issues at the nexus of society and the environment.

Series Editors

Dana R. Fisher and Evan Schofer

Co-Founding Editor: Lori Peek

*Reforesting the Earth: The Human Drivers of Forest Conservation, Restoration, and Expansion*, Thomas K. Rudel
