TABLE OF CONTENTS

Part I. Problem and Summary of Findings

1. Introduction 1
   Aim of Project 1
      Development of models 1
      Application of models 2
   General Approach 2
      Cohort analysis 3
      Component analysis 3
      Net changes 5
      Use of total working force 5
      Basic data utilized 5
   Basic Assumptions Used in Projecting 6
      Continuity of the occupational structure 6
      Economic and labor market conditions 7

2. The Projections for 1960 9
   Introduction 9
   Projected Numbers of Workers 10
   Projected Occupational Distribution 12
      Variations attributable to economic conditions 13
      Variations attributable to the size of the military forces 14
   Changes in Age Composition 15

Part II. The Components of Change

3. Summary of Components of Change 19
   The Entire Working Force 19
      Changes in the decade 1930-40 19
      Changes in the decade 1940-50 19
      Comparison of the changes in the two decades 20
      Possible changes in the decade 1950-60 21
   Components of Change Among the Various Occupations 22
      Accessions to occupations 23
      Withdrawals from occupations 26
      Components of change and occupational growth 26
      Summary 27

4. New Entries 28
   Rates of New Entries Into the Civilian Working Force 28
   New Entries by Occupation 30
   Occupational Distribution of New Entries in the 1930s as Compared With the 1940s 32
   Factors Associated With the Distribution of New Entries 33

5. Net Mobility 35
   Definition of Mobility Rates 35
   Total Mobility Rates 36
   Mobility Rates by Occupation 38
   Comparison of the Two Decades 39
   Factors Associated With Mobility Levels 39

6. Retirements 42
   Rates of Retirement From the Civilian Working Force 42
   Retirement Rates by Occupation 44
   The Retirement of Farmers 45
   Factors Associated With Occupational Differences in Retirement Rates 46

7. Patterns of Working Life 48
Introduction 48
Average Length of Working Life 49
The Occupational Ladder 50
Selected Working Life Histories 53
Professional, technical and kindred workers 54
Managers, officials and proprietors, except farm 54
Clerical and sales workers 54
Summary of the white collar occupations 55
Craftsmen, foremen and kindred workers 55
Operatives and kindred workers 55
Service workers 56
Laborers, except farm and mine 56
Summary of the manual occupations 56
Summary of all occupations 56
Occupational Mobility Prior to 1930 57
Summary 58

Part III. Methodology

8. Introduction 60
Resume of the Methodological Problems 60
Objectives 60
Description of universe studied 60
Major methodological problems 60
Resulting By-Product Statistics 62
Primary Sources of Data 62

9. Comparability of Data 64
Occupational Comparability 64
Comparability With Respect to Coverage 65
Comparability of Age Reporting 67

10. Census Survival Rates 69
Reasons for Using Census Survival Rates 69
Survival Differentials by Occupation 69
Detailed Explanation of Census Survival Rate Construction 70
The general computational procedures 70
Computing urban and rural survival rates for the 1930s 70

11. New Entries 74
New Entries as of the Census Year 74
Procedures 74
Underlying assumptions 74
Age limits for new entries 76
New Entries During a Decade 77
General procedures 77
Applied procedures 77
Considerations underlying these procedures 80

12. Retirements 82
Retirements as of the Census Year 82
Retirements During a Decade 82

13. Net Mobility 85
Computing Net Mobility for Cohorts Under Age 25 85
Computing Net Mobility for Cohorts Age 25 and Over 89
Operational Definition of Net Mobility 89

14. Occupational Change Patterns Summarized 91

15. The 1960 Projections 94
Rates of Change for Each of the Components 94
Deaths 94
New entries 94
Retirements 96
Net mobility 96
The Projection Calculations 99
Deaths 99
New entries 99
Retirements 99
Net mobility 99
Age Group Projections Revised 102
Cohort age 15 to 19 in 1960 102
Cohort age 20 to 24 in 1960 103
Cohort age 25 to 29 in 1960 103
Cohort age 30 to 34 in 1960 103
Cohort age 35 to 39 in 1960 103
Cohort age 40 to 44 in 1960 103
Cohort age 45 and over in 1960 103

16. Comparison of the Six City Study With This Study 104
Universe 104
Coverage 104
Occupational distribution 104
Method of observation 104
