

CONTENTS

PART I

BEHAVIOR OF UNICELLULAR ORGANISMS

CHAPTER I

BEHAVIOR OF AMŒBA

	PAGE
1. Structure and Movements of Amœba	1
2. Reactions of Amœba to Stimuli	6
A. Reaction to Contact with Solids	6
B. Reactions to Chemicals, Heat, Light, and Electricity	9
C. How Amœba gets Food	12
3. Features of General Significance in the Behavior of Amœba	19
Literature	25

CHAPTER II

BEHAVIOR OF BACTERIA

1. Structure and Movements	26
2. Reactions to Stimuli	27
3. General Features in the Behavior of Bacteria	37
Literature	40

CHAPTER III

BEHAVIOR OF INFUSORIA; PARAMECIUM

Structure; Movements; Method of Reaction to Stimuli

Introductory	41
1. Behavior of Paramecium; Structure	41
2. Movements	44
3. Adaptiveness of the Movements	45
4. Reactions to Stimuli	47
5. "Positive Reactions"	54
Literature	58

CHAPTER IV

BEHAVIOR OF PARAMECIUM (CONTINUED)

Special Features of the Reactions to a Number of Different Classes of Stimuli

1. Reaction to Mechanical Stimuli	59
2. Reactions to Chemical Stimuli	62

	PAGE
3. Reactions to Heat and Cold	70
4. Reaction to Light	72
5. Orienting Reactions, to Water Currents, to Gravity, and to Centrifugal Force	73
A. Reactions to Water Currents	73
B. Reactions to Gravity	75
C. Reaction to Centrifugal Force	78
6. Relation of the Orientation Reactions to Other Reactions	78
Literature	79

CHAPTER V

BEHAVIOR OF PARAMECIUM (CONTINUED)

Reactions to Electricity and Special Reactions

1. Reactions to Electricity	80
A. Reaction to Induction Shocks	81
B. Reaction to the Constant Current	83
2. Other Methods of Reaction in Paramecium	89
Literature	91

CHAPTER VI

BEHAVIOR OF PARAMECIUM (CONTINUED)

Behavior under Two or More Stimuli ; Variability of Behavior ; Fission and Conjugation ; Daily Life ; General Features of the Behavior

1. Behavior under Two or More Stimuli	92
2. Variability and Modifiability of Reactions	98
3. Behavior in Fission and Conjugation	102
4. The Daily Life of Paramecium	104
5. Features of General Significance in the Behavior of Paramecium	107
A. The Action System	107
B. Causes of the Reactions, and Effects produced by them	108
Literature	109

CHAPTER VII

BEHAVIOR OF OTHER INFUSORIA

Action Systems. Reactions to Contact, to Chemicals, to Heat and Cold

1. The Action System	110
A. Flagellata	111
B. Ciliata	113
2. Reaction to Mechanical Stimuli	117
3. Reaction to Chemicals	120
4. Reaction to Heat and Cold	124
Literature	127

CHAPTER VIII

REACTIONS OF INFUSORIA TO LIGHT AND TO GRAVITY

	PAGE
1. Reactions to Light	128
A. Negative Reaction to Light: <i>Stentor caruleus</i>	128
B. Positive Reaction to Light: <i>Euglena viridis</i>	134
C. Negative and Positive Reactions compared	141
D. Reactions to Light in Other Infusoria	141
2. Reaction to Gravity and to Centrifugal Force	149
Literature	150

CHAPTER IX

REACTIONS OF INFUSORIA TO THE ELECTRIC CURRENT

1. Diverse Reactions of Different Species of Infusoria	151
A. Reaction to Induction Shocks	151
B. Reaction to the Constant Current	152
2. Summary	162
3. Theories of the Reaction to Electricity	164
Literature	169

CHAPTER X

MODIFIABILITY OF BEHAVIOR IN INFUSORIA, AND BEHAVIOR UNDER
NATURAL CONDITIONS. FOOD HABITS

1. Modifiability of Behavior	170
2. The Behavior of Infusoria under Natural Conditions	179
3. Food Habits	182
Literature	187

PART II

BEHAVIOR OF THE LOWER METAZOA

CHAPTER XI

INTRODUCTION AND BEHAVIOR OF CŒLENTERATA

Introduction	188
Behavior of Cœlenterata	188
1. Action System. Spontaneous Activities	189
2. Conditions required for Retaining a Given Position: Righting Reactions, etc.	192
3. General Reaction to Intense Stimuli	197
4. Localized Reactions	198
5. The Rejecting Reaction of Sea Anemones	202
5. Locomotor Reactions in Hydra and Sea Anemones	203

	PAGE
7. Acclimatization to Stimuli	207
8. Reactions to Certain Classes of Stimuli	208
A. Reactions to Electricity	208
B. Reactions to Gravity	210
C. Reactions to Light	212
9. Behavior of Coelenterates with Relation to Food	216
A. Food and Respiratory Reactions in Hydra	216
B. Food Reactions in Medusæ	219
C. Food Reactions in Sea Anemones	221
10. Independence and Correlation of Behavior of Different Parts of the Body	227
11. Some General Features of Behavior in Coelenterates	230
Literature	232

CHAPTER XII

GENERAL FEATURES OF BEHAVIOR IN OTHER LOWER METAZOA

1. Definite Reaction Forms ("Reflexes")	233
2. Reaction by Varied Movements, with Selection from the Resulting Conditions	238
3. Modifiability of Behavior and its Dependence on Physiological States	250
Literature	259

PART III

ANALYSIS OF BEHAVIOR IN LOWER ORGANISMS, WITH A
DISCUSSION OF THEORIES

CHAPTER XIII

COMPARISON OF THE BEHAVIOR OF UNICELLULAR AND MULTICELLULAR ORGANISMS	260
---	-----

CHAPTER XIV

TROPISMS AND THE LOCAL ACTION THEORY OF TROPISMS	265
--	-----

CHAPTER XV

IS THE BEHAVIOR OF THE LOWER ORGANISMS COMPOSED OF REFLEXES?	277
--	-----

CHAPTER XVI

ANALYSIS OF BEHAVIOR IN LOWER ORGANISMS

Introductory	283
1. The Causes and Determining Factors of Movements and Reactions	283
A. The Internal Factors	283
(1) Activity does not require Present External Stimulation	283
(2) Activity may change without External Cause	285
(3) Changes in Activity depend on Changes in Physiological States	286

CONTENTS

xiii

	PAGE
(4) Reactions to External Agents depend on Physiological States	286
(5) The Physiological State may be changed by Progressive Internal Processes	287
(6) The Physiological State may be changed by the Action of External Agents	287
(7) The Physiological State may be changed by the Activity of the Organism	288
(8) External Agents cause Reaction by changing the Physiological State of the Organism	288
(9) The Behavior of the Organism at any Moment depends upon its Physiological State at that Moment	288
(10) Physiological States change in Accordance with Certain Laws	289
(11) Different Factors on which Behavior Depends	292

CHAPTER XVII

ANALYSIS OF BEHAVIOR (CONTINUED)

B. The External Factors in Behavior	293
(1) Relation to Physiological States	293
(2) Change of Conditions as a Cause of Reaction	293
(3) Reaction without External Change	296
(4) Reactions to Representative Stimuli	296
(5) Relation of Reaction to Internal Processes	298
(6) Summary of the External Factors which produce or determine Reactions	299

CHAPTER XVIII

ANALYSIS OF BEHAVIOR (CONTINUED)

2. The Nature of the Movements and Reactions	300
A. The Action System	300
B. Negative Reactions	301
C. Selection from the Conditions produced by Varied Movements	302
D. "Discrimination"	304
E. Adaptiveness of Movements	305
F. Localization of Reactions	306
G. Positive Reactions	309
3. Résumé of the Fundamental Features of Behavior	312

CHAPTER XIX

DEVELOPMENT OF BEHAVIOR	314
-----------------------------------	-----

CHAPTER XX

RELATION OF BEHAVIOR IN LOWER ORGANISMS TO PSYCHIC BEHAVIOR	328
---	-----

CHAPTER XXI

BEHAVIOR AS REGULATION, AND REGULATION IN OTHER FIELDS

	PAGE
1. Introductory	338
2. Regulation in Behavior	338
A. Factors in Regulation in the Behavior of Lower Organisms	339
3. Regulation in Other Fields	345
4. Summary	349
BIBLIOGRAPHY	351
INDEX	359

BEHAVIOR OF THE LOWER ORGANISMS
