NO LIMITS

NO LIMITS

Edited by Costica Bradatan

The most important questions in life haunt us with a sense of boundlessness: there is no one right way to think about them or an exclusive place to look for answers. Philosophers and prophets, poets and scholars, scientists and artists—all are right in their quest for clarity and meaning. We care about these issues not simply in themselves but for ourselves—for us. To make sense of them is to understand who we are better. No Limits brings together creative thinkers who delight in the pleasure of intellectual hunting, wherever the hunt may take them and whatever critical boundaries they have to trample as they go. And in so doing they prove that such searching is not just rewarding but also transformative. There are no limits to knowledge and self-knowledge—just as there are none to self-fashioning.
