

CONTENTS

List of Contributors	vii
----------------------	-----

1.	Crop Plants: Past, Present, and Future	
	Timothy J. Motley	1

PART 1 **GENETICS AND ORIGIN OF CROPS: EVOLUTION AND DOMESTICATION**

2.	Molecular Evidence and the Evolutionary History of the Domesticated Sunflower	
	Loren H. Rieseberg and Abigail V. Harter	31
3.	Molecular Evidence of Sugarcane Evolution and Domestication	
	Laurent Grivet, Jean-Christophe Glaszmann, and Angélique D'Hont	49
4.	Maize Origins, Domestication, and Selection	
	Edward S. Buckler IV and Natalie M. Stevens	67
5.	Contributions of <i>Tripsacum</i> to Maize Diversity	
	Mary W. Eubanks	91

PART 2 **SYSTEMATICS AND THE ORIGIN OF CROPS:
PHYLOGENETIC AND BIOGEOGRAPHIC RELATIONSHIPS**

6.	Evolution of Genetic Diversity in <i>Phaseolus vulgaris</i> L.	
	Roberto Papa, Laura Nanni, Delphine Sicard, Domenico Rau, and Giovanna Attene	121
7.	Cladistic Biogeography of <i>Juglans</i> (Juglandaceae) Based on Chloroplast DNA Intergenic Spacer Sequences	
	Mallikarjuna K. Aradhya, Daniel Potter, and Charles J. Simon	143
8.	Origin and Diversification of Chayote	
	Hugh Cross, Rafael Lira Saade, and Timothy J. Motley	171

PART 3 THE DESCENT OF MAN: HUMAN HISTORY AND CROP EVOLUTION

9. Using Modern Landraces of Wheat to Study the
Origins of European Agriculture
Terence A. Brown, Sarah Lindsay, and Robin G. Allaby 197
 10. Breadfruit Origins, Diversity, and
Human-Facilitated Distribution
Nyree Zerega, Diane Ragone, and Timothy J. Motley 213
 11. Genetic Relationship Between *Dioscorea alata* L. and
D. nummularia Lum. as Revealed by AFLP Markers
Roger Malapa, Jean-Louis Noyer, Jean-Leu Marchand, and Vincent Lebot 239
-

**PART 4 VARIATION OF PLANTS UNDER SELECTION:
AGRODIVERSITY AND GERMLASM CONSERVATION**

12. Evolution, Domestication, and Agrobiodiversity in the
Tropical Crop Cassava
Barbara A. Schaal, Kenneth M. Olsen, and Luiz J. C. B. Carvalho 269
13. Origins, Evolution, and Group Classification of
Cultivated Potatoes
David M. Spooner and Wilbert L. A. Hetterscheid 285
14. Evolution and Conservation of Clonally Propagated
Crops: Insights from AFLP Data and Folk Taxonomy of
the Andean Tuber Oca (*Oxalis tuberosa*)
Eve Emshwiller 308
15. Crop Genetics on Modern Farms: Gene Flow Between
Crop Populations
Kenneth Birnbaum 333

**Appendix I. Molecular Marker and Sequencing Methods
and Related Terms**

Sarah M. Ward 347

Appendix II. Molecular Analyses

Timothy J. Motley, Hugh Cross, Nyree Zerega, and
Mallikarjuna K. Aradhya 370

Index 379
