

Journal of the American Osteopathic Association

Index to Volume 95

The index is divided into an AUTHOR INDEX and a SUBJECT INDEX. Monthly page numbers are continuous through each issue. Items indexed from the reader sections are identified by volume page numbers, which are continued from month to month. Inclusive pagination for reader pages by month is as follows:

Month	Pages
January	1-66
February	67-136
March	137-214
April	215-286
May	287-338
June	339-388
July	389-440
August	441-500
August Supplement	S1-S28
September	501-560
October	561-620
October Supplement	S1-S20
November	621-684
November Supplement	S1-S20
December	685-756
December Supplement	S1-S20

Included in the AUTHOR INDEX are entries arranged in alphabetical order for authors of original articles. Also included are listings for authors of signed editorials, book reviews, letters, and research abstracts.

The SUBJECT INDEX includes entries for all original articles, editorials, letters, and research abstracts.

Editorial titles are listed alphabetically under the heading EDITORIALS.

MEDI-NOTES include entries by month, with subjects and pagination. EDITORIAL COMMENTS and FEDERAL UPDATE also include entries by month, with subject and pagination. Entries for book reviews (identified by "BR") are indexed alphabetically by reviewers, under subject classification, under "Books."

Author Index

Included in this author index are entries arranged in alphabetical order for authors of original articles identified by an asterisk (*), with case reports further identified by the letters "CR." Letters are identified by the letter "L," and research abstracts are identified by the letters "RES." Also included are listings of authors of signed editorials, identified by the letter "E," book reviews, by the letters "BR," and software reviews by the letters "SR." Supplements to issues are designated by month and "Suppl."

Subject index

The index includes subject entries for all original articles identified by an asterisk (*), editorials identified by the letter "E," letters by the letter "L," and research abstracts by the letters "RES." Editorials and Letters are also listed alphabetically by title under the heading EDITORIALS and LETTERS, respectively. Research abstracts, presented at the 1995 AOA Convention in Boston in October, are listed alphabetically under the heading RESEARCH ABSTRACTS. Entries for contents of federal update are listed under the heading FEDERAL UPDATE, then by month and page. Entries for contents of medi-notes are listed under the heading MEDINOTES, then by month and page. Entries for contents of editorial comments are listed under the heading EDITORIAL COMMENTS, then by month and page. Entries for book reviews (identified by "BR") follow all entries under the letter "B," and entries for software reviews (identified by "SR") follow all entries under the letter "S."

Editorial comments

January, p 16:

- Smoking marijuana may lead to lung cancer
- Scintimammography may help detect breast cancer early
- Cimetidine found in breast milk
- Nicotine damages sperm
- Maternal rejection, difficult delivery linked to violent behavior in male teens
- Autoimmune disorder responsible for Rasmussen's encephalitis?

February, p 79:

- The human immunodeficiency virus attacks immune system almost immediately
- New method for isolating stem cells
- A herpes virus may be the cause of Kaposi's sarcoma
- More HIV-infected women than men are likely to die of the acquired immunodeficiency syndrome

March, p 158:

- Cigarette filters may pose health threat
- Children, adolescents, older minority women likely homicide victims
- Low condom use among persons involved in extramarital affairs
- Cardiologists have undesirable cholesterol levels

May, p 302:

- Lumpectomy/radiation treatment just as effective as mastectomy
- Tens of thousands of unborn children harmed by maternal cigarette smoking
- Deep vein thrombosis linked to mutant gene
- The human immunodeficiency virus develops immunity to experimental protease inhibitors

June, p 362:

- Serum amyloid P linked to Alzheimer's disease
- More elderly may have Alzheimer's disease than previously thought
- Antihypertensive alleviates side effects associated with benign pro-

static hypertrophy [correction, July p 402]

- Clostridium botulinum* used to reduce forehead wrinkles

July, p 409:

- Poll finds men irresponsible regarding birth control
- More concerns for long-term hormone replacement therapy
- Laparoscopy reduces clinical threshold for cholecystectomy

August, p 456:

- Unclear link between hormone-replacement therapy and breast cancer

September, p 512:

- Alternative estrogen-replacement therapy holds promise
- Soy protein seems to lower cholesterol

- Prompt diagnosis of bacterial vaginosis key to reproductive health

October is Child Health Month

October, p 570:

- Working conditions contribute to preterm births
- Average-weight persons at higher risk for earlier death

November, p 651:

- Fatty diet linked to prostate cancer?
- High doses of perinatal vitamin A supplements could pose risk to unborn
- Teenagers more knowledgeable about sexually transmitted diseases than adults, study finds
