

## *Acknowledgments*

Most academic books are the result of a long journey involving many years and many people. *Pushing in Silence* began its journey well over a decade ago. My debt and gratitude for all the support I have received is enormous, but I will be brief. In its initial iterations María del Carmen Baerga guided my work at the University of Puerto Rico. My father, Félix Córdova Iturregui, read and commented on my earliest project in its entirety. Later, at the University of Michigan, Sueann Caulfield oversaw my research and writing as it evolved into a dissertation. Rebecca Scott, Marty Pernick, Marcia Inhorn, and Alex Minna Stern all influenced my work during those years as well. After my return to Puerto Rico, Lucy Peña helped steer me through the archives at the UPR School of Medicine. Recently, after years of setting this work aside, several colleagues in the Rochester area of upstate New York provided invaluable feedback on portions of the book. These include Anne Macpherson, Jonathan Ablard, Tom Lappas, Molly Ball, Ryan Jones, Aiala Levy, and Pablo Sierra. At Nazareth College, Olivia Staff assisted with formatting, notes, and proofreading. My mother, Carmen Suárez, and my sister, Cristina Córdova, not only were a source of emotional support, but they were on call on more than one occasion when I needed an extra set of eyes at a moment's notice. Elsie de Jesus shared her insight on a couple of my later chapters. I wish to express my gratitude to the anonymous reviewers and to Kerry Webb, Angelica Lopez-Torres, and Amanda Frost at the University of Texas Press, as well as Jay Marchand for the indexing. My greatest debt, however, goes to Clare Counihan, who spent long hours poring over my manuscript. Her keen eye and talent were exactly what I needed to move this book forward. My biggest inspiration, constant companion, and teacher, however, has been my son, Diego. This book is but a tiny testament to the ways he shapes my life.
