

ACKNOWLEDGMENTS

First, with great thanks to Dr. Joseph Agonito, professor and scholar of the West, whose remarkable knowledge of the era and area's history informed my own great love for the frontier's legendary and mythical aspects over the decades during which I had the pleasure to team-teach a course on the subject with this admirable colleague and great friend. Second, to my son Shea Thaxter Brode, whose passion for the project and diligent research—as well as excellent proofreading—brought *Dream West* to fruition.

A particular word of appreciation to all those film companies whose motion pictures are summarized here and specifically for the use of images from their work. As a member of the media focusing on motion pictures and television for the past fifty years, I was provided many of these were provided to use for the purposes of promoting the films at the time of their release and maintaining their profiles in succeeding years. Others are from my personal collection. Each “still” is employed here to augment with visual content the verbal descriptions in order to provide the best academic book possible on the subject matter, to be used for serious study of the Western genre.
