
ACKNOWLEDGMENTS

Writing this book has been a real labor of love. It represents the culmination of forty years of personal and professional relationships in Costa Rica. Special appreciation goes to my wife, Ethelle, and my son, Craig, who have traveled with me from Minnesota to Costa Rica many times and helped with everything from wildlife observations to editing and preparing the manuscript. In 1985, Karen Johnson, the owner of Preferred Adventures Ltd. in St. Paul, Minnesota, urged us to try leading a birding trip to Costa Rica. We finally agreed and led our first trip in 1987. It was the beginning of a wonderful experience that has enabled us to meet many special people in our tour groups as well as Costa Rican tourism outfitters, guides, and ecolodge staffs.

Michael Kaye, the owner of Costa Rica Expeditions, has been very supportive of this project and has coordinated our travel there. He facilitated travel to visit several sites for photography purposes, including Monteverde Lodge. Carlos Gómez Nieto is the extraordinary guide who has led all but one of our Costa Rican birding trips. Carlos is the premier birder in Costa Rica, and his vast knowledge of wildlife behavior and identification has helped us

accumulate our wildlife records, which now exceed 27,000 observations. Manuel Salas and Marco Antonio “Niño” Morales have been the drivers for most of our trips and have been invaluable in spotting birds and in providing us with safe and memorable travel experiences.

Other people have helped with facilitating our travels and the collection of information and photos. They include Lisa and Kathy Erb at Rancho Naturalista; Don Efraín Chacón, Rolando Chacón, and the rest of the Chacón family; Amos Bien of Rara Avis; Gail Hewson-Hull; Luis Diego Gómez; and the late Dr. Alexander Skutch and Pamela Skutch at Los Cusingos.

Biologists and scientists provided expertise on species identification and life history data, including Dr. Daniel Janzen, Dr. Graciela Candelas, Dr. Alexander Skutch, Dr. Frank T. Hovore, and Jorge Corrales of the Instituto Nacional de Biodiversidad (INBIO).

And finally, special appreciation goes to all the Costa Rican travelers who have accompanied us on our birding trips and provided the companionship, sharp eyes, and friendships that have enriched our lives.
