|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Editors' Introduction<br>VINCENZO FANO, FRANCESCO ORILIA and<br>GIOVANNI MACCHIA                                                                                                              | 1   |
| On Russell's Metaphysics of <i>Time</i><br>GREGORY LANDINI                                                                                                                                    | 7   |
| Weak Discernibility and the Identity of Spacetime Points<br>DENNIS DIEKS                                                                                                                      | 43  |
| A Structural and Foundational Analysis of Euclid's Plane<br>Geometry: The Case Study of Continuity<br>PIERLUIGI GRAZIANI                                                                      | 63  |
| Can the Mathematical Structure of Space Be Known A Priori?<br>A Tale of Two Postulates<br>EDWIN MARES                                                                                         | 107 |
| Gunkology and Pointilism: Two Mutually Supervening<br>Models of the Region-Based and the Point-Based Theory<br>of the Infinite Two-Dimensional Continuum<br>MILOŠ ARSENIJEVIĆ and MILOŠ ADŽIĆ | 137 |
| This Moment and the Next Moment<br>FRANCESCO ORILIA                                                                                                                                           | 171 |
| $T \times W$ Epistemic Modality<br>ANDREA IACONA                                                                                                                                              | 195 |
| Towards a Theory of Multidimensional Time Travel<br>DOMENICO MANCUSO                                                                                                                          | 209 |
| Gödelian Time Travel and Weyl's Principle<br>VINCENZO FANO and GIOVANNI MACCHIA                                                                                                               | 237 |
| About the Authors                                                                                                                                                                             | 273 |
