

Contents

1 Introduction — 1

- 1.1 The universe of discourse — 1
- 1.2 Forms of repetitions — 4
- 1.3 Prolegomena for a future text theory — 6

2 Shapeless Repetition — 11

- 2.1 Phonic effects — 12
- 2.2 Two variables — 17
 - 2.2.1 The activity index — 17
 - 2.2.2 Excursus — 21
 - 2.2.3 Comparing activity indices — 25
- 2.3 Global indicators — 31
 - 2.3.1 Entropy — 33
 - 2.3.2 Comparison of two entropy values — 37
 - 2.3.3 The repeat rate — 38
 - 2.3.4 Moments of distributions — 40
- 2.4 Modelling using probability distributions — 49
- 2.5 Some text laws — 63
 - 2.5.1 The Zipf-Mandelbrot Law — 63
 - 2.5.2 The Simon-Herdan Model — 73
 - 2.5.3 Hřebíček's Reference Law — 77
 - 2.5.4 Type-Token Models — 80
 - 2.5.5 Perspectives — 89

3 Positional repetition — 91

- 3.1 The rhyme in “Erlkönig” — 91
- 3.2 Open rhymes — 94
- 3.3 The gradual climax — 97
 - 3.3.1 The linear climax — 97
 - 3.3.2 Reduced climax — 99
 - 3.3.3 The exponential climax — 101
- 3.4 Other positional repetitions — 106

4 Associative repetition — 111

- 4.1 Associative repetition of two words — 113
 - 4.1.1 Short texts — 114
 - 4.1.2 Long texts — 117

4.2	Presentation —	120
4.3	The minimal (acyclic) graph —	121
4.4	Vistas —	123
5	Iterative repetition —	127
5.1	Binary sequences —	128
5.2	Large samples —	133
5.3	Comparison of runs in two texts —	133
5.4	Runs of more than two kinds of elements —	135
6	Aggregative repetition —	137
6.1	Random distances: binary data —	137
6.2	Models of aggregation trends —	141
6.3	Brainerd's Markov-chain model —	146
6.4	Non-binary data —	155
6.5	Similarity aggregation —	158
6.6	Vistas —	161
7	Repetition in blocks —	163
7.1	The Frumkina law —	164
7.2	Testing the Frumkina law —	166
7.3	Vistas —	174
8	Parallel repetitions —	177
8.1	Cochran's Q-test —	178
8.2	Analysis of variance —	179
8.3	The chi-square test —	182
9	Cyclic repetition —	187
9.1	Fourier analysis —	189
10	Summary —	193
