

# Scope and general policies of the journal

## **Scope**

Articles published in the *Florida Entomologist (FLAENT)* are open access and reflect all aspects of basic and applied entomological and acarological science of relevance to Florida agriculture, urban environments, and natural resources. Research from the southeastern U.S., the Caribbean region, and Mexico is particularly invited as these areas are important sources of invasive species in Florida.

Florida Entomologist is the official journal of the Florida Entomological Society (FES).

*FLAENT* is an online open access journal. It publishes only English-language articles with Spanish or Portuguese abstracts. Articles are published immediately into an online annual open issue.

### Article (manuscript) categories

Research Article, Review Article, Scientific Note, Book Review, Editorial

## Peer review, turnaround times and preprint policies

### Peer review information

Florida Entomologist is a single-blind journal. Manuscripts will receive at least two independent Reviewers selected by the Editors whenever possible. The Authors are strongly encouraged to provide the names, institution, country and e-mail addresses of up to four potential Reviewers. The Authors should make every effort to ensure that their recommended Reviewers are without any potential conflict of interest. Authors may also provide names of Reviewers they wish to exclude from reviewing their manuscripts.

The Editors reserve the right to reject submitted manuscripts without peer review if the studies are not novel or important enough to merit publication in the journal. Manuscripts deemed unsuitable (insufficient originality or limited interest to the target audience) also will be rejected without review.

## **Turnaround time**

*Florida Entomologist* aspires to inform Authors of the peer review decision within 6–8 weeks from submission date. Revised manuscripts should be returned within 1–12 weeks (depending on the decision). Accepted articles will be published online within 2–4 weeks of acceptance.

## Issue based publication

Articles are published immediately as DOI citable articles into an online annual open issue.

### **Rejection of manuscripts**

The principal criteria for publication of scientific articles are that the main results and conclusions must not have been published or submitted elsewhere and that they are of scientific importance.

Manuscripts dealing with subjects that have been well studied in the literature, and that do not resolve questions raised by previous studies, or manuscripts that are statistically underpowered, are likely to be rejected without peer review.

Manuscripts are also returned to Authors if they do not comply with the Instructions for Authors.

## **Appeals**

Manuscripts that have been rejected for publication will be reconsidered only at the discretion of the Editor(s). Authors wishing to request reconsideration of a previously rejected manuscript must do so in written form and submit a rebuttal by e-mail to the journal's editorial office. Authors should provide detailed reasons why they believe the manuscript should be reconsidered. If the rebuttal is accepted, the Author will be asked to re-submit the manuscript, or the decision will be reversed.

## **Preprint policy**

De Gruyter does not consider the following purposes of a paper as pre-publication: publication in the form of a congress abstract, publication as an academic thesis, publication as an electronic preprint on recognized servers such as arXiv, RePEc, bioRxiv, ResearchSquare, etc.

### **Inclusive language policy**

Inclusive language recognizes diversity, conveys respect for all people, is sensitive to differences and promotes equal opportunities. Content should not make assumptions about readers' beliefs or commitments; should not contain anything that might suggest that one person is superior to another because of age, gender, race, ethnicity, culture, sexual orientation, disability or health condition; and should use inclusive language throughout. Authors should ensure that their writing is free from prejudice, stereotypes, slang, references to the dominant culture and/or cultural assumptions.

We advise the following approach: Aim for gender neutrality by using plural nouns (clinicians, clients, participants) as standard and avoiding "he" or "she", wherever possible. Instead, please use "they". We recommend avoiding the use of descriptors that refer to personal characteristics such as age, gender, race, ethnicity, culture, sexual orientation, disability or health status unless they are relevant and valid.

# **Submission of manuscripts**

Submit manuscripts exclusively online at: https://mc.manuscriptcentral.com/flaent

We strongly recommend the Authors register with institutional e-mail addresses, and refrain from using private e-mail addresses. A cover letter must be submitted for each manuscript upon first submission. It should contain a brief statement by the Authors as to the element of novelty, significance and the reason why the conclusion is an important scientific advance, upon which they base their request for publication in *Florida Entomologist*. This summary provided in a cover letter should not extend 200 words. Please address the cover letter to the Editor-in-Chief. Revised manuscripts must be accompanied by a point-by-point reply to the Reviewers' criticisms. Major changes in the revised manuscript must be highlighted, preferably in tracked changes mode. A second, clean version should always be submitted for major changes.

#### **ORCID**

The ORCID (Open Researcher and Contributor ID) is a non-profit, publisher-independent system that is used to uniquely identify academics and their publications. Click <a href="here">here</a> for detailed information about ORCID. Submitting Authors can login with username and password. If the journal uses ScholarOne as submission tool, Authors can also login with their ORCID number. Providing an ORCID number for each Author is strongly recommended. ORCID numbers should be listed on the title page.

### Submission declaration and verification

For information on plagiarism, please refer to <u>COPE – Committee of Publication Ethics</u>. Submission of a manuscript to a journal implies that the work described has not been published previously, except in the form of an abstract, academic thesis, lecture, or preprint; that it is not under consideration for publication elsewhere (multiple, redundant, concurrent publication); that publication of the work is approved by all Authors and tacitly or explicitly by the responsible Authorities where the work was carried out; and that, if accepted for publication, it will not be published elsewhere, no matter in which language, without the written consent of the Publisher. Exceptions are listed under Preprint policy.

To exclude potential overlap with prior publication(s), your manuscript may be checked by the plagiarism checker Crossref Similarity Check (<u>iThenticate</u>). Previously published material must be referenced appropriately in the manuscript, regardless of whether the material was previously published in a subscription based, hybrid or open access journal, or in another language.

### Scientific misconduct

Only articles that have not been or will not be published elsewhere will be published in the journal, excluding articles that fall under De Gruyter's <u>Repository Policy</u>. Multiple submissions/publications or redundant publications (i.e., republication of data already published by the same Authors) will be rejected. If identified

after publication, the journal reserves the right to publish a retraction note. In any case, Editors will follow COPE's Code of Conduct and implement its advice.

### **Research integrity**

The Authors are responsible for all aspects of the study and will ensure that any questions regarding the accuracy and integrity of any part of the work are adequately investigated and resolved.

With submitting your manuscript to *Florida Entomologist* the Authors declare that they are the sole and intellectual Authors of the manuscript. We do not accept submissions that name Artificial Intelligence (AI) and/or Machine Learning Tools as credited Author(s) on a manuscript because such tools cannot take responsibility for the submitted work and therefore cannot be considered as eligible Authors. Where such tools or technologies are used as part of the design or methodology of a research study, their use should be clearly described in the Acknowledgments section. In case of doubt, the Editorial Board reserves the right to ask the Authors to submit the raw experimental data.

## Post-acceptance

### **Galley proofs**

The corresponding Author of an article receives the galley proofs in electronic form to check them for editing and typesetting accuracy. Corresponding Authors receive an e-mail notification ("Check your proof") with a link to the online proofreading system (Proof Central) through which they can access their galley proofs. The interface is similar to MS Word: Authors can edit the text by entering their corrections directly, adding comments, and answering questions from the Copy Editor. If preferred, Authors can also annotate and upload edits to the PDF version.

All instructions for proof corrections, including deadlines, will be given in the e-mail notification to the corresponding Author, along with a user guide, providing step-by-step instructions for inserting corrections.

Substantial changes to an article accepted for publication will only be considered with the permission of the Editor or after additional peer review. The responsibility for proofreading lies solely with the Authors. According to De Gruyter policy, once an article has been accepted, no changes to the Author list and article title are allowed (except typos). The De Gruyter Production Team is instructed to enforce this policy during the production/proof correction process.

## **Open Access publication**

All De Gruyter open access publications are published under a <u>Creative Commons license</u>. The Creative Commons licenses specify the extent to which the work can be re-used by the scholarly community and the general public. For us as publisher, this means that we receive non-exclusive exploitation rights.

Permitted third party reuse of gold open access articles is determined by the user license. *Florida Entomologist* is published under the Creative Commons license CC-BY 4.0 (<a href="http://creativecommons.org/licenses/by/4.0">http://creativecommons.org/licenses/by/4.0</a>). The Creative Commons license is specified in the 'License to Publish', which you can download from the journal's website.

## **License Agreement**

During submission of an article, Authors will be asked to complete a 'License to Publish'.

### **Article Processing Charges (APCs)**

Authors who publish in **open access journals** must pay Article Processing Charges (APCs). The article processing charge (APC) for publishing a full research article in FLAENT is  $\\\in$  1,000/ USD 1,100 (for FES members  $\\\in$  800/ USD 880), for a scientific note  $\\\in$  800/ USD 880 (for FES members  $\\\in$  600/ USD 660). In some cases, open access is funded by an unrestricted educational grant, but this plays no role in the selection or publication of articles and has no influence on peer review. We may also consider requests for individual discounts or waivers, but only for journals whose APCs are not already discounted. For more information on De Gruyter's open access policy, please read our Open Access Policies.

## Ethical conduct of research

Manuscripts must follow certain ethical guidelines to be considered for publication. These can generally be found in the <u>Publication Ethics and Malpractice Statement</u>. Accordingly, before submitting your manuscript, please make sure that you and your co-Authors agree to the applicable requirements. For example, this may involve declaring and ruling out conflicts of interest or proving compliance with legal requirements related to human and other animal testing.

Furthermore, our <u>Code of Conduct for Publication Procedures and Ethics</u> defines the responsibility of De Gruyter as a publisher and the Editors we work with, to ensure the legitimacy and quality of our published research. Our principles are based on the guidelines of the <u>Committee on Publication Ethics (COPE)</u>.

# Acknowledgments

Authors may wish to acknowledge individuals, working groups, institutions, etc. who provided help and support (other than financial) during research and the preparation of the manuscript (e.g., language checking, writing assistance or proof reading of the article, etc.). Individuals acknowledged are not included on the title page, as a footnote to the title or otherwise.

We do not accept submissions that name Artificial Intelligence (AI) and/or Machine Learning Tools as credited Author(s) on a manuscript because such tools cannot take responsibility for the submitted work and therefore cannot be considered as eligible Authors. Where such tools or technologies are used as part of the design or methodology of a research study, their use should be clearly described in the Acknowledgments section.

## Authorization for the use of human subjects - Research ethics

Manuscripts that contain information on the use of humans should clearly state that the research complies with all relevant national regulations and institutional policies and has been approved by the Authors' Institutional Review Board or any equivalent Committee. Copies of the guidelines and policy statements must must be available for review by the Editor upon request. The Editors reserve the right to seek additional information or guidance from Reviewers on any cases in which concerns arise. All investigations with human subjects must be conducted by following the tenets of the <u>Declaration of Helsinki</u>, what is more Authors must identify the Committee or Institutional Review Board approving the experiments, and provide a statement indicating approval of the research. Protocol numbers should be provided if applicable. The work described in your article must have been also performed in accordance with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals <a href="http://www.icmje.org">http://www.icmje.org</a>.

For submission, please provide the "<u>Template for Ethical and Legal Declarations</u>" file that asks you to comment on Research Ethics. Make sure that the information in the manuscript matches the information in the template.

## Authorization for the use of experimental animals and wildlife in natural settings – Research ethics

Manuscripts that contain information on the use of non-human animals should clearly state that the research has complied with all relevant national regulations and institutional policies and has been approved by the Authors' Institutional Review Board or any equivalent Committee. Copies of the guidelines and policy statements must be available for review by the Editor upon request. The Editors reserve the right to seek additional information or guidance from Reviewers on any cases in which concerns arise. The research using animal subjects should be conducted according to the Principles of Laboratory Animal Care and similar documents (e.g. NIH). For manuscripts reporting experiments on live vertebrates or higher invertebrates, Authors must identify the Committee approving the experiments, and must confirm that all experiments were performed in accordance with relevant information (including protocol numbers).

For research involving wildlife in natural settings, Authors must have obtained Institutional Animal Care approval and state that they have complied with the relevant national, international, and institutional guidelines regarding the ethical treatment of the taxa of study.

For submission, please provide the "<u>Template for Ethical and Legal Declarations</u>" file that asks you to comment on Research Ethics. Make sure that the information in the manuscript matches the information in the template.

If a study did not require human or animal ethical approval, a corresponding statement should be given in the Methods section. Please submit the "<u>Template for Ethical and Legal Declarations</u>" file and provide the same information as in the manuscript, or *Not applicable*.

#### **Author contributions**

In view of research integrity, Authorship is generally confined to an individual who has made a substantial intellectual or practical contribution to the conception or design of the project or the acquisition, analysis, or interpretation of data for the work of a publication and/or has drafted the work or reviewed/revised it critically for important intellectual content. The individual(s) listed as Author(s) must agree to be accountable for said contribution and approve of the final version. **Honorary Authorship is not allowed.** 

Individuals who helped or participated in certain substantive aspects of the project or work (e.g., technical services staff), but whose contributions were not of sufficient extent to be listed as co-Authors, should be appropriately acknowledged, usually in the Acknowledgements section.

Authors must declare their responsibility for the entire content of the manuscript and may indicate the individual contributions of each Author, if applicable. The Author contribution statement should appear before the Reference section as the following default statement: *All Authors have accepted responsibility for the entire content of this manuscript and approved its submission.* or *The Author has accepted responsibility for the entire content of this manuscript and approved its submission.* 

Please submit the "<u>Template for Ethical and Legal Declarations</u>" file that asks you to comment on Author Contribution. Make sure that the information in the manuscript matches the information in the template.

## **Competing interests**

A conflict of interest for a particular manuscript exists when a participant in the peer review and publication process – Author, Reviewer, and Editor – has ties to activities that could inappropriately influence his or her judgment, regardless of whether the judgment is actually affected. Financial relationships with industry (for example, employment, consultancies, stock ownership, honoraria, patent applications, expert testimony, grants and other funding), either directly or through immediate family, are usually considered the most important conflicts of interest. However, conflicts can occur for other reasons, such as financial support of the study, ties to health insurance, politics or other stakeholders, personal relationships, academic competition, and intellectual passion.

To ensure fair and objective decision-making, Authors must declare any associations that pose a conflict of interest (financial, personal or professional) in connection with the manuscript under evaluation. This must be declared during the submission process and also at the end of the manuscript.

Please submit the file called "<u>Template for Ethical and Legal Declarations</u>" that asks you to comment on the Competing interests. Make sure that the information in the manuscript matches the information in the template. If you do not have a statement to make, please insert *None declared*.

# **Research funding**

Funding sources should be listed at the end of the manuscript, before the References and indicated in the "Template for Ethical and Legal Declarations". When the study benefitted from funding through an

unrestricted grant or other resources provided to a university, college, other research institution, or an individual Author, state the name of the institute or organization that provided the funding along with the grant number, if applicable.

## Data availability

Florida Entomologist requires Authors to follow our <u>Data Sharing Policy</u>, which must comply with the European GDPR (*General Data Protection Regulation*) rules. Research data should be made widely available to the research community to demonstrate the robustness and validity of the research presented in the journal, to enable and encourage replication of the results, and to allow the community with opportunities to learn.

Sequences published in *Florida Entomologist* must be deposited in the EMBL/NCBI/DDBJ Nucleotide Sequence Databases and this is the responsibility of the Author(s). An accession number for the database must be given in the paper.

Genomic sequences uploaded to GenBank must always rely on voucher specimens, preferably deposited in an international collection with easy access to researchers. Manuscripts reporting new genomic sequences of arthropods without voucher specimens will be not considered.

By publishing in the journal, Authors are required to provide a data availability statement (DAS) in their articles. The DAS confirms the presence or absence of shared data. The DAS should include information on where the data supporting the findings reported in the article can be found, including, if applicable, hyperlinks to publicly archived datasets analysed or generated during the study. If research data are not publicly available, this must be stated in the manuscript, as well as the conditions for accessing the data.

Authors are encouraged to share their data but are not required to do so. The decision to publish will not be affected by whether or not Authors share their research data.

The DAS should be included either before the References and in the "<u>Template for Ethical and Legal Declarations</u>", which is required for submission.

# Preparation of manuscript

## Title page information

Please provide the following information on the first page of your manuscript during the submission process:

## • Author names

Write at least one given and family name in full. For all other names, initial is sufficient. List Authors in the order you want them to appear in the final version. Indicate the corresponding Author by using an asterisk "\*" after the family name. Please note that as per De Gruyter policy, no Author list changes are permitted after acceptance of a manuscript.

Author footnotes (superscript letters or numbers) to explain Authorship details are not all allowed in the Author line and will be converted to an Author note on the first page. Kindly stick to the wording as in the examples below:

- [Full name Author A] and [full name Author B] contributed equally to this work.
- [Full name Author A] and [full name Author B] contributed equally to this work and share first Authorship.
- [Full name Author A] and [full name Author B] share senior Authorship.
- [Full name Author A] and [full name Author B] share first Authorship.

### • Title and short title

Provide a descriptive, concise and comprehensible main title as well as an abbreviated form of the main title (running head) with no more than 75 characters (including spaces). The running head will be displayed on the top of each page of the final version.

The article title and subtitle should be in sentence case. Use lowercase letters after colon.

## Affiliations

For the corresponding Author supply the following details: e-mail address, department, institution, street, city, postal code and country; for all other Authors department, institution, city, postal code and country are mandatory. Please also provide all details concerning the current institutional affiliation in case you or any of the Author(s) changed affiliation during the manuscript preparation and publication process.

Supplying an ORCID is highly recommended (for more information and registration, please visit the ORCID webpage: <a href="https://info.orcid.org/benefits-for-researchers/">https://info.orcid.org/benefits-for-researchers/</a>)

• Please also indicate the word count, number of tables and figures, and whether your manuscript contains supplementary material.

## Language

All manuscripts must be written in clear and concise English. Please use British or American English consistently. Authors remain responsible for being their own copyEditors. If you have reasons to doubt your

proficiency with respect to spelling, grammar, etc. (e.g., because you are not fluent in English), then you may wish to employ – at your expense – the services of a professional language Editor.

### General format and manuscript elements

Please provide the manuscript in 12 pt font, left-aligned, double spaced and with continuous line numbers, and see the <u>Manuscript checklist</u> for detailed information on length and structure of specific article types.

#### **Abstract**

Give a concise summary of your article in an abstract of approx. 250 words in a single paragraph. Submit an abstract in English and resumen in Spanish, or resumo in Portuguese. The Editor will obtain a translation (into Spanish) if the Author does not provide an alternative language abstract.

As abstracts are published separately by abstracting and indexing services, please spell out abbreviations at first use and do not include footnotes, tables, figures or equations. Avoid using references. If it is essential to use a reference in the abstract, please expand it as per journal reference style (Harvard).

## **Keywords**

Keywords are used by abstracting and indexing services as well as search engines to facilitate finding your paper. Together with the abstract of your paper, they are a key tool enabling readers to find your paper and for increasing citations.

Supply 4–6 specific keywords in alphabetical order and lower case, separated by semicolon.

These can be single words, but also short phrases representing the content. Make sure to select precise and concise keywords to your field or sub-field of research. Avoid abbreviations and the repetition of words already used in the article's title.

### **Headings** (please refer to the Manuscript checklist)

Your manuscript should be subdivided into sections (and, if necessary, subsections). These sections should be labeled with headings in a consistent format and with a clear hierarchy of section headings. Limit your subsections to a maximum of four levels. For subdivided sections ensure that they have at least two subheadings on one level. Headings do not have an end period.

Headings should be numbered and in sentence case. Use lowercase letters after colon.

## **References**

Please adhere strictly to the reference style of *Florida Entomologist* (Harvard) as outlined in the <u>Reference Style Sheet</u>. The style sheet provides examples for different types of citations in the text as well as for different bibliographic items in the reference list. Provide evidence of acceptance for works "in press," otherwise cite as "unpublished" or "personal communication." For personal communications please provide the name of the person. Please note: All references mentioned in the reference list must be mentioned in the text, and vice versa.

## Figures and figure captions

Graphs, line drawings, photographs, schemes, diagrams, etc. may be used to illustrate your findings. Publication of color figures is provided free of charge. The publication quality always depends directly on the quality and size of the delivered data. Please label the illustrations as "Figure [insert number]". Each figure can be either included in the manuscript or uploaded separately as a .jpg, .eps, .png or .tiff file. Images should have a minimum resolution of 300 dpi (color or black-white pixel graphics/half-tone images) in the intended size (600 dpi combination of pixel graphic and line drawing, 1200 dpi for line drawings). When drawing bar graphs, use patterning/color instead of grey scales (faint shading may be lost upon reproduction). Figures should not have any frames. Figures should be numbered consecutively using Arabic numerals (from 1) throughout the text. If you include multi-part figures, please make sure to label all parts of the figure using uppercase letters. Please make sure that all figures are explicitly referred to in the text. Indicate where to place the figure approximately (e.g., [Place Figure 1 near here]). Do not end the text immediately preceding the suggested positioning of a figure with a colon and avoid expressions such as "in Figure 1 below/above", as the exact positioning of these elements cannot be determined until after the manuscript has been typeset. Note that figures will usually be placed on the top or the bottom of the page in the final layout.

Provide a concise and self-explanatory caption for each figure in the manuscript **and** with figures when uploaded separately. In case of multi-part figures, in the caption, please describe the figure in general followed by a description of each of the parts clearly indicated with its corresponding uppercase letter.

The key to the symbols depicted in the figures should be included in the figure itself, where possible. Otherwise, include it in the caption. The caption itself should not be included in the figure.

Please make sure that letters, numbers, symbols, text, etc. included in the figure are clear, easy to read (not below 6 pt, preferably in Arial or Helvetica) and uniform in style.

It is the Authors' responsibility to use images that do not infringe on any copyrights, performing rights, trademark rights, personal rights or any other third-party rights or are otherwise unlawful. Copyright permissions can be obtained through the Copyright Clearance Center (https://www.copyright.com/).

## Tables and table captions

Number tables consecutively using Arabic numerals. Tables should be provided in an editable source format (Word, LaTex). Please avoid providing tables as image or Excel files.

Provide a short descriptive title, column heads, and (if necessary) footnotes to make each table self-explanatory. In column heads, separate units with a comma and use parentheses or square brackets for additional measures (e.g., %, range, etc.). Use footnotes in alphabetical order (a, b, c, etc.) to give emphasis or further information. Expand abbreviations used in tables in footnotes.

In case bold type is used to highlight information, please explain the meaning.

Avoid color, shading, vertical lines, and other cell borders. Note that most horizontal lines within the table body will be removed during the production process.

Indicate where to place the table approximately (e.g., [Place Table 1 near here]). Do not end the text immediately preceding the suggested positioning of a table with a colon and avoid expressions such as "in Table 1 below/above", as the exact positioning of these elements cannot be determined until after the manuscript has been typeset. Note that tables will usually be placed on the top or the bottom of the page in the final layout.

#### **Abbreviations**

The use of abbreviations and acronyms is permitted given that they are expanded in full when used the first time with the abbreviation in parentheses (applies to abstract and main text). Please use them consistently thereafter. Avoid using non-standard abbreviations unless they appear more than three times in the text. We recommend providing a list with an overview of all abbreviations and put this list at the end of the manuscript.

## **Equations and symbols**

Equations should be well-aligned and not crowded. Use only Latin and Greek alphabets. Avoid complicated superscripts and subscripts by introducing new symbols. Avoid repetition of a complicated expression by representing it with a symbol. For MS Word submissions create equations using the Microsoft equation Editor or a corresponding add-on. Do not submit math equations as images, but as editable text. Number displayed equations consecutively with Arabic numerals (if referred to in the text).

## **Chemical structures**

Chemical structures should be produced with the use of a drawing program such as ChemDraw. Structure drawing preferences (preset in ChemDraw from the "File" menu, choose "Apply document settings from ACS Document 1996") are as follows:

- 1. As drawing settings select: chain angle 120°; bond spacing 18% of width; fixed length 14.4 pt (0.508 cm, 0.2 in.); bold width 2.0 pt (0.071 cm, 0.0278 in.); line width 0.6 pt (0.021 cm, 0.0084 in.); margin width 1.6 pt (0.056 cm, 0.0222 in.); hash spacing 2.5 pt (0.088 cm, 0.0347 in.)
- 2. As text settings select: font Arial/Helvetica; size 10 pt.
- 3. Under the preferences choose: units points tolerances 5 pixels.
- 4. Under page setup choose: Paper US Letter; scale 100%.

## Scientific names and non-abbreviated Latin expressions

*Biochemical*: As far as possible Authors should follow the recommendations of the Nomenclature Committee of IUBMB and the IUPAC–IUBMB Joint Commission on Biochemical Nomenclature (see http://www.chem.gmul.ac.uk/iubmb/).

Chemical: The IUPAC recommendations on chemical nomenclature (see

http://www.chem.qmul.ac.uk/iupac/index.html) should be followed.

Enzymes: The recommendations of the latest edition of enzyme nomenclature (see

http://www.chem.qmul.ac.uk/iubmb/enzyme, 1992) should be followed as far as possible. This includes the quoting of EC numbers.

The authority for the species name should be given at first mention of the species in the abstract and the main paper. Only Linnaeus should be abbreviated, and it should be abbreviated to L. The year of description should not be given unless the original publication is cited in the references list. Consult Catalogue of Life for accepted scientific names <a href="https://www.catalogueoflife.org/">https://www.catalogueoflife.org/</a>.

Scientific names of organisms should be cited in their complete form when first mentioned in the order genus – species – Authority – cultivar (cv.) or subspecies (ssp.) where appropriate. Latin genus and species names should be typed in italics. Subsequently, the genera should generally be abbreviated by their first letter, but avoid confusion: e.g., use *A. comosus* if the only genus with the first letter A in your manuscript is *Ananas*; but use unambiguous abbreviations if there is more than one genus with the same first letter, e.g., *Ananas* 

comosus, Aechmea nudicaulis = A. comosus, Ae. nudicaulis, etc. Common names of organisms must be accompanied by the correct scientific name when first mentioned. Give the order and family name in brackets when first mentioned as follows: (Order: Family). Genus and species should be written in full for the first occurrence in the Abstract and in the main body of the article and in table and figure legends. In succeeding occurrences, the genus name should be abbreviated to an initial. Genus name always has an initial

## **Units**

Time units: Second = s; Minute = min; Hour = h; Day = day/days; Week = week/weeks; Month = month/months; Year = year/years.

Numbers below 10 should be spelled out except before SI units and time units. Use a protected (non-breakable) narrow space between numerals and units.

capital and species are written in lowercase: 'sp.'/'spp.'/ 'ssp.'/ 'var.'/ 'L.'/ 'subsp.'/ etc. should be roman.

Use SI units. For more information, please visit <a href="https://www.bipm.org/en/measurement-units/si-base-units">https://www.bipm.org/en/measurement-units/si-base-units</a> or <a href="https://www.bipm.org/en/home">https://www.bipm.org/en/home</a>.

#### Audio and Video

For all examples connected to an audio/video recording, supply audio/video clips. Deliver these clips as separate files and do not integrate them directly into the manuscript.

Name all your clips using the following convention:

e.g., audio-1-smith.MP3, video-1-smith.MP4,

Florida Entomologist

[media]-[identifier]-[Author-family-name].[extension]

Indicate the position in the article by placing a marker as follows:

[associated audio-1-smith.wav with example (1)]

Provide a short caption for each media file and number them consecutively. Any other media files can be included as part of the supplementary material.

File naming: audiosupplement-1-smith.MP3,

[media.supplement]-[identifier]-[Author-family-name].[extension]

The following formats are preferred: audio files in MP3 (at least 16 bit) and video files in MP4 (at least a height of 480 pixels and a frame rate of 25). However, other common formats are also permitted.

## Supplementary material

Supplementary material, which may offer further information on your work but does not belong to the core part of the article, will not be part of the typeset article PDF. The material will be made available as a separate download in the online version of the article. Supplementary material may contain questionnaires for discussed surveys, protocols, code samples, datasets, extensive tables, additional figures, multimedia files (audio, video, animations), etc.

Please provide supplementary material data as separate file(s) of no more than 10 MB per file during submission. Note that the material should be publication-ready (not in track-changes mode), as it will not be typeset, but published exactly as supplied. Within the text, the supplementary material must be cited consecutively and be referred to as supplementary material data (e.g., see Supplementary Material, Fig. 1, or Figure S1, Table S1, etc.).

# Please contact Editorial Office for any further questions:

Ms. Ulrike Kitzing Journal Coordinator, De Gruyter Ulrike.Kitzing@degruyter.com
