

Call for Papers

The journal of *Gender and Sustainability in the Global South* (GSGS) is an interdisciplinary, international peer-reviewed journal. It aims to serve as a dedicated platform to encourage international dialogue and collaboration on the intricate relationship between gender and sustainability for global inclusivity, particularly in developing areas of the world. GSGS wishes to offer a platform for scholars, practitioners, and policymakers to engage in critical dialogue and share insights that can shape a more equitable and sustainable future.

for detailed information.

Aims and Scope

Gender and Sustainability in the Global South (GSGS) is an interdisciplinary, peer-reviewed journal that aims to advance our understanding of the complex connections between gender and sustainability in the context of the Global South. We strive to provide an inclusive space platform for diverse voices and perspectives, particularly those that are often marginalized or underrepresented.

GSGS is an open access journal that aims to play a key role in developing and strengthening knowledge production about gender and sustainability and to promote wider communication among scholars, practitioners and policy-makers around the world. We also hope that it will

be a key vehicle for research on gender and sustainability on topics ranging from social, economic, political, environmental, and cultural issues. The journal will be of interest to researchers, policy-makers, academics, undergraduate and postgraduate students, and practitioners in the fields of gender studies, international development, and sustainable development studies.

We are especially interested in PhD student research and welcome descriptions or abstracts of interesting thesis research. Please consider sending us a two- or three-page submission of your PhD work.

Themes

- Engendering sustainable development
- Gender equality and inequality in decision-making and governance for sustainable development
- Sustainability that fosters women's health and mental health
- Initiatives for empowerment of women and girls in sustainable development from policy to practice
- Evidence-informed gender inclusion practices in societies experiencing issues in development
- Development and realization of national policies and international treaties for sustainable development
- Implementation, monitoring, and evaluation of SDGs in different areas
- Aspects of cultural diversity, languages, traditions, social systems, globalization, immigration, and settlement, and their impacts on gender and social and other forms of sustainability
- Ethical and philosophical aspects of sustainable development
- Education and gender and sustainability
- Impact of safety, security, and disaster management on gender and sustainability
- Impacts of sustainable utilization of resources such as land, water, air and other natural resources on women
- Global climate effects on gender and sustainability
- Public health-related aspects related to gender and sustainability
- Policy and laws shaping or affecting gender and sustainability
- Environmental concerns and COVID-19 pandemic effects on women's sustainability

- Gender justice and climate justice
- Gender, AI and digital technologies for sustainable development
- Gender and the ethics of sustainability in emerging technologies
- Transnational feminism and sustainable development
- Indigenous knowledge, gender, and sustainable development
- Intersectionality in sustainability: gender, disability, and social inclusion
- Gendered impacts of climate-induced migration and displacement
- Gender and the future of work in the green economy

Article formats

Original research articles, review articles, case reports, commentaries, PhD thesis abstracts

Submission Guidelines

Manuscripts should be original, unpublished, and not under consideration for publication elsewhere. Submissions should be between 6,000 and 8,000 words, including references, tables, and appendices. All submissions should follow the [Chicago Manual of Style author date reference style](#).

Review Process

All submissions will undergo a rigorous double-anonymized peer review process. Authors will be notified of the decision within three months of submission.

Submission Procedure

You can easily submit your manuscript online. Simply go to <http://mc.manuscriptcentral.com/dggsgs>

and you will be guided through the whole submission and publishing process.

If you have any questions or need further information, please contact the editorial office at GSGSeditorial@163.com.

To be considered for the 2025 issue, manuscripts need to be submitted by **September 12, 2025**.

The journal of *Gender and Sustainability in the Global South* is committed to promoting diverse voices and perspectives. Empirical manuscripts from a broad range of theoretical orientations, conceptual discussions focused on gender and sustainable issues, as well as multidisciplinary perspectives (e.g., gender studies, geography, sociology, social work, psychology, cultural studies, history, economics, environmental studies et al) are welcome.

We especially encourage submissions from scholars based in the Global South and those who identify as part of underrepresented groups.

We look forward to receiving your contributions!
